39	Didn't know the park exists.	9/15/2020 11:54 AM
40	None	9/15/2020 7:54 AM
41	None	9/14/2020 2:34 PM
42	I am surprised that you call this a park. It is an embarrassment! The time and money spent on this corner were wasted. Where are the trees, green grass and bushes?? There are many shrubs, trees and grasses that can grow without fertilizer as I hear that that is part of the problem since there is a well there. What is appealing about this corner?? From the looks of this corner, I feel like we live in the ghetto part of the city. You owe the citizens that live near that corner some respect. After all, they pay taxes and vote.	9/14/2020 1:49 PM
43	The sidewalk for walking .	9/13/2020 8:10 PM

146	None! This park is an eye sore. We don't know why they went to the effort of planting beautiful grass, and then letting it die. It's irritating that the baseball fields get more attention. If there is an effort to make green spaces throughout the city, they should all be kept green.	8/27/2020 6:37 PM

5	Splash pad and playground	9/21/2020 3:17 PM
6	Playground and splash pad	9/20/2020 4:17 PM
7	Pickleball!! Love this park and it's amazing, city of Providence, bogie often when we are there the PB courts are full, splash pad is being used, kids on the playground and someone running around the grass. Seriously, the use of this park is so beautiful to see. Well done!!	9/20/2020 1:01 PM
8	Splash pad, small trees	9/19/2020 11:04 PM
9	Splash pad, playground	9/19/2020 8:20 PM
10	Water park for kids	9/19/2020 1:18 PM
11	I have lived in Providence for decades and hoped to retire in peace. Without talking to us that live next to the park, the city installed pickle ball courts and now I listen to the constant sounds. The city should not only consider the wants of the people that use the parks but also the effects of those that live nearby. To show us they care, the city should stop the pickle ball so it is quiet again. Any new features should also encourage peace and quiet since the park is surrounded by townhomes and houses. Examples are a natural area for birdwatching, a walking path, or grassy area. Adding another loud "feature" is another slap to the face.	9/19/2020 12:07 PM

195	We haven't been yet, but I've heard positive things about this park.	9/1/2020 3:18 PM
196	We use the splash pad, playground, and green space in the summer. In the winter, we use the green space for playing in the snow. We also play in the abandoned area adjacent to the park - the hills are great for sledding. With new townhomes coming, the park is getting more crowded and we would love to see more green space! The pickle ball courts are very loud for us and our neighbors.	9/1/2020 2:36 PM

Providence City Parks, Trails, and Recreation Survey

#	PLEASE SPECIFY	DATE
1	Do we have other paved trails?	9/22/2020 4:35 PM
2	Providence canyon area hillside	9/19/2020 11:04 PM
3	running around sidewalks in the city. I don't know what other running/walking/biking trails there are	9/19/2020 8:20 PM
4	Paved area in spring creek	9/19/2020 7:59 PM
5	Brookside path	9/18/2020 3:37 PM
6	are there any?	9/18/2020 9:53 AM
7	None	9/18/2020 6:00 AM
8	Driving up providence canyon, walking the neighborhoods	9/17/2020 9:07 AM
9	walking around Providence City streets.	9/17/2020 7:47 AM
10	Where are they?	9/16/2020 7:20 PM
11	Running, walking	9/15/2020 9:53 PM
12	Are these trails clear	9/15/2020 9:51 PM
13	we have lovely and safe neighborhoods were we can walk on sidewalks.	9/15/2020 8:36 PM
14	The bike trail by my house	9/15/2020 6:12 PM
15	Use bike trails, pickle ball and splash pads	9/15/2020 5:16 PM
16	love to hike and mt bike	9/15/2020 4:16 PM
17	Walking path up above prov	9/15/2020 12:13 PM
18	I use these in Logan, and would love to have these in Providence. Where are they?	9/15/2020 11:54 AM
19	Didn't know there were any	9/14/2020 1:49 PM
20	The deer fence property is private property but many incorrectly believe it is federal land. This needs to be purchased along with multiple points of public access	9/13/2020 5:00 PM
21	unknown of other walking/ biking trails	9/13/2020 1:34 PM
22	Deer fence both directions	9/11/2020 8:40 PM
23	Not sure where any of these are. I would LOVE a map of running/walking/biking trails in Providence.	9/11/2020 2:41 PM
24	Because we literally have none, most streets don't even have usable sidewalks	9/11/2020 2:20 PM
25	I use what sidewalks we have in Prov. to run and bike with my family.	9/9/2020 1:53 PM
26	None	9/9/2020 12:15 PM
27	Road routes	9/9/2020 9:41 AM
28	I walk around Providence frequently and have wondered how The sidewalks have been allowed to change throughout the years instead of being consistent. Heavy sigh. My daughter rides her bike and loves the trail marker set out for the bike trail	9/9/2020 7:48 AM
29	None	9/8/2020 9:36 PM
30	This one area that I feel Providence can do a better job. More paved running/walking and biking trails would be appreciated. We live in such a beautiful place but walking around could be more enjoyable with more trails.	9/8/2020 12:40 PM
31	We love the sidewalk that goes along 1700 s to rendezvous park.	9/7/2020 9:34 PM
32	Maybe we did, but i'm not sure where paved trails are	9/7/2020 9:37 AM
33	mainly roads for biking, walking, jogging	9/6/2020 2:05 PM

Providence City Parks, Trails, and Recreation Survey

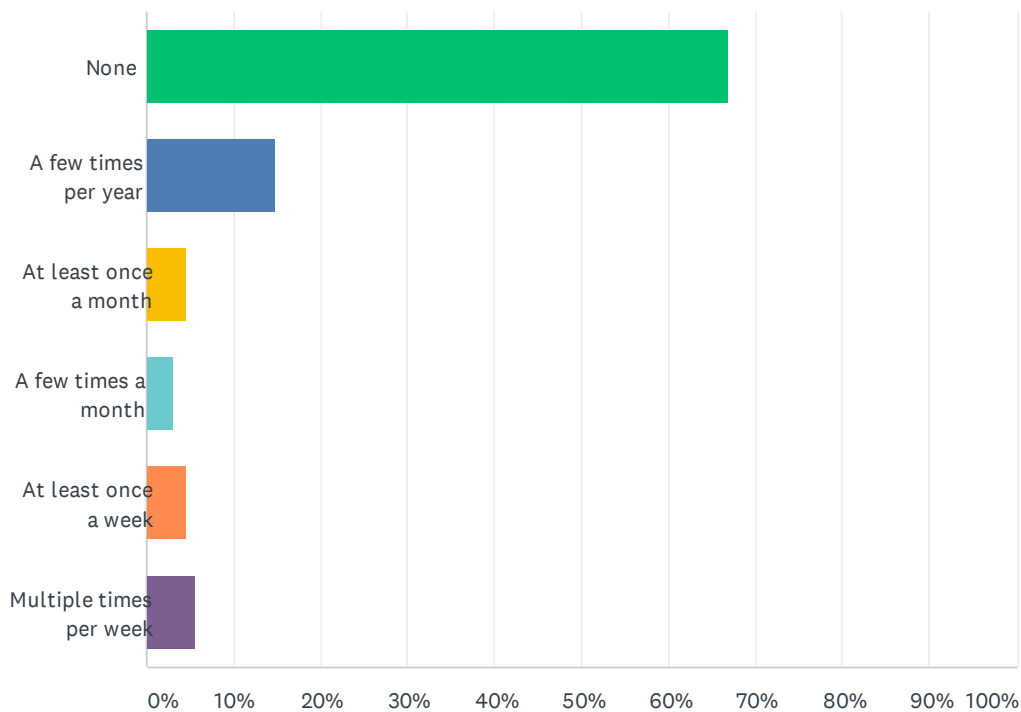

34	My beautiful wife and I walk almost daily on the city streets early in the morning for exercise.	9/6/2020 2:11 AM
35	na	9/5/2020 3:10 PM
36	wife and I both run around town, would love trails that are dedicated and that tie into surrounding cities trails across Cache valley	9/5/2020 2:32 PM
37	We use them for biking, walking, and running. Our family participates in one of these every day.	9/5/2020 2:15 PM
38	walking	9/5/2020 2:02 PM
39	If not yet mentioned, the one by the golf course.	9/5/2020 10:38 AM
40	I walk the neighborhood quite a bit	9/3/2020 9:03 PM
41	Are there others?	9/3/2020 7:53 PM
42	around Hampshire park	9/2/2020 9:15 PM
43	Walking in neighborhoods	9/2/2020 6:20 PM
44	I run up to 20 miles/week. I appreciate when there are sidewalks and bike lanes	9/2/2020 6:12 PM
45	Where? I know nothing about paved bike trails or I would use them. Do you mean the streets?	9/2/2020 4:44 PM
46	we don't have any paved road bike trails that I know of, so none.	9/2/2020 11:51 AM
47	Providence is low on sidewalks so we try to find the best ones for walking...	9/2/2020 10:21 AM
48	Walking	9/2/2020 8:43 AM
49	We love to cycle and walk as a family	9/2/2020 8:36 AM
50	We would love to have a paved safe three foot extension paved down canyon road. West side could be done. It is so unsafe to walk that road.	9/2/2020 8:28 AM
51	Roadways. Are there any paved trails?	9/2/2020 7:50 AM
52	Love to bike, hike and walk	9/2/2020 12:59 AM
53	canyon road,	9/1/2020 10:52 PM
54	Where are they?	9/1/2020 9:52 PM
55	We like to ride bikes as a family throughout Cache Valley	9/1/2020 9:18 PM
56	Do we have paved walking/biking trails in Providence? I run and bike on the roads because there are no real trails to go on as far as I know .	9/1/2020 8:55 PM
57	Run on providence streets and sidewalks	9/1/2020 6:50 PM
58	NA	9/1/2020 6:16 PM
59	We bike the roads a lot	9/1/2020 5:49 PM
60	Not sure where any of these are. We would like to.	9/1/2020 5:34 PM
61	Don't know of any others.	9/1/2020 5:18 PM
62	trail east of Grandview	9/1/2020 5:07 PM
63	Unaware if any other "trails"	9/1/2020 4:56 PM
64	Mostly trails through the parks	9/1/2020 4:44 PM
65	Sidewalks and road for walking daily. Wish there was a actual walking bike trail	9/1/2020 4:38 PM
66	none	9/1/2020 4:28 PM
67	Jogging	9/1/2020 4:07 PM
68	What other trails are there?????	9/1/2020 4:04 PM
69	None	9/1/2020 4:02 PM

Providence City Parks, Trails, and Recreation Survey

70	We just pick random trails to explore not sure how else to put it.	9/1/2020 4:01 PM
71	Hiking.	9/1/2020 3:50 PM
72	Not necessarily trails, but we do a lot of walking around providence and my kids ride bikes to activities.	9/1/2020 3:49 PM
73	Walking	9/1/2020 3:39 PM
74	Not aware of a lot of trails. Would like more information as we enjoy biking, walking, running trails	9/1/2020 3:37 PM
75	None	9/1/2020 3:31 PM
76	I bike to work in Logan and find our roads wide and safe. I'm not really familiar with any trails that aren't in the canyon.	9/1/2020 2:36 PM
77	I use the sidewalks all the time to walk my dogs.	9/1/2020 1:00 PM
78	Bike routes	8/30/2020 3:26 PM
79	In the early spring and late fall, I drive into Logan to use their paved trails.	8/30/2020 7:23 AM
80	path to the park on the bench	8/29/2020 7:40 PM
81	Some	8/29/2020 7:16 PM
82	Brookside Park, many sidewalks and roadways	8/27/2020 7:21 PM
83	I wish we had more trail options!! I have hiked in the canyon, but there were lots of mtn bikers. I've also done the Bonneville Shoreline Trail, which is great! But for running and walking I go on the paved trail between the houses in the Highlands. I wish we had more trails like that one!! So great to run on! It would be nice to have them in different parts of the city. I would also bike on them.	8/27/2020 6:37 PM
84	The trail down from eagle view drive to Sarah street	8/27/2020 4:47 PM
85	Sidewalks on little baldy area	8/27/2020 4:46 PM

Providence City Parks, Trails, and Recreation Survey

#	COMMENTS	DATE
1	Would love to see more trails	9/22/2020 4:35 PM
2	Little Baldy subdivision needs a park in it.	9/20/2020 4:17 PM
3	More biking and walking paths would be great. Many in our family have walked up the sidewalk in near the new Little Baldy subdivision because there is a lack of developed areas to walk in (blocks missing sidewalks, no bike paths, etc.). Also, I would like to see less city ties to baseball, particularly if it means my children will have more space to play while at school.	9/19/2020 8:20 PM
4	Roads and sidewalks are in poor condition making it difficult for using a stroller. And In many places a sidewalk isn't there at all	9/19/2020 9:13 AM
5	Would like paved biking trail, wish deer trail was on opposite side of fence line. Tennis lessons have been poorly marketed and canceled multiple times	9/19/2020 8:53 AM
6	Need more trails	9/18/2020 10:55 AM
7	There are islands of communities that do not have trails to get to elementary school, for example. The east bench is one of these, and a plan to incorporate the east bench in walkable and biking trails would be beneficial.	9/18/2020 10:09 AM
8	The survey won't allow both question	9/18/2020 9:53 AM
9	I THINK THERE NEEDS TO BE MORE BIKING AND WALKING/RUNNING AREAS AND DESTINATIONS	9/17/2020 8:38 PM
10	I would appreciate more connected trails/sidewalks through the city.	9/17/2020 4:46 PM
11	Recreational activities should not be happening right now with the pandemic	9/17/2020 11:21 AM
12	There is too much emphasis on baseball. Not enough fields for lacrosse, soccer and other sports. There is very little emphasis on passive recreation	9/17/2020 7:47 AM
13	walkers cannot use the Prov Canyon trail without fear of a bike hitting them. we need separate trails.	9/15/2020 8:36 PM
14	More pickleball!	9/15/2020 7:38 PM
15	Not all providence roads have a place to walk and no sidewalk	9/15/2020 6:12 PM
16	rec programs are unorganized and overpriced for what they offer	9/15/2020 4:22 PM
17	Packing the fields with people during the peak of the pandemic was a horrible idea. I think our city leaders are fools for their approach to the sports in Providence. You're setting a bad example for our children and our full grown child adults.	9/15/2020 1:09 PM
18	A walkway on first east hill would keep many of our kids and neighbors safe.	9/15/2020 12:13 PM
19	It would help if Providence would fix the sidewalks and build sidewalks where there are gaps in the grid.	9/15/2020 11:54 AM
20	I wish there were more organized opportunities for adults.	9/15/2020 7:54 AM
21	Need to add more to the soccer fields. Improved drainage & lighting. Also add lacrosse fields or designate a field for mixed use. Would be nice to have public property/open space on the North bench. The deer fence property is privste property but many incorrectly believe it is federal land. This needs to be purchased along with multiple points of public access. We are not teh small town we used to be.	9/13/2020 5:00 PM
22	Would love to see more accesible bike paths and a way to ride bikes with children on to/off of the benches.	9/13/2020 1:34 PM
23	I don't know much about either but would like to learn more	9/12/2020 9:28 AM
24	Love investment in more trails to hike and bike. A designated route up and down prov canyon would be awesome	9/11/2020 8:40 PM
25	Would love more safe walking and biking areas.	9/11/2020 7:39 PM
26	I would love better sidewalks to run on in some of the older parts of the city. A designated	9/11/2020 5:04 PM

Providence City Parks, Trails, and Recreation Survey

	walking/running/biking trail through the city would be awesome!	
27	It would be great to have a map of the trails. Just knowing where they are would be really helpful.	9/11/2020 2:41 PM
28	We need more sidewalks and better speed control.	9/11/2020 10:48 AM
29	Sidewalks!?!?!?!?!?	9/9/2020 1:53 PM
30	Need more where dogs are allowed.	9/9/2020 9:41 AM
31	Nibley has far surpassed Providence parks. North Logan is the same. I realize they may have bigger budgets but they're making constant updates to these parks and making them a more desirable, usable space.	9/8/2020 8:17 PM
32	City or county needs to acquire more public access points to Deer Fence trail.	9/8/2020 4:11 PM
33	We would love to see more bike paths along the roads and more paths in public space for biking.	9/7/2020 9:34 PM
34	More sidewalks	9/7/2020 7:55 AM
35	need places to walk/ride bikes like Logan's River Trail; too many roads are too narrow for two cars and a biker/walker.	9/6/2020 2:05 PM
36	I thought during the Corona Virus Era, folks were a little anal at people not being able to use the park!!!	9/6/2020 2:11 AM
37	Why so much money into baseball? Why do we cut kids for a city recreational baseball league? How often does a Providence only team play on the big field? Why no money into a basketball league? why do we not have a girls softball field? Title 9 why on earth would we put a fence through Providence Elementary play field? Did we ever pay towards the swimming pool at Mountain Crest? How about a new scorer complex? I hope you get the idea that for the past 30 plus years I do not like how our sports recreational department functions.	9/5/2020 4:03 PM
38	Based on this survey, it is apparent to me that the citizens need to be better informed as to whats available.	9/5/2020 3:10 PM
39	I wanted to check not satisfied on both but it won't let me. I don't know of any biking/walking paths in Providence. Need to put more effort/money into something besides baseball and there are plenty of soccer fields. Need more rec summer camps like volleyball and basketball. More advertising of camps like tennis and pickleball. I usually miss them. Need rec programs available for more sports. Could really use a facility for indoor sports. I think Smithfield does a great job and usually sign up for multiple camps even though they are so far away. They have a lot to offer and would love it if Providence could too. My son would use a bike park/skate park. A safe bike path to Logan, Ridgeline and parks. We often ride our bikes to Zollinger and get a flat tire from goat head burrs almost every time.	9/5/2020 2:54 PM
40	would love a golf course, a public pool, skate parks, climbing walls, more pickle ball, more parks kids play areas and connecting green space	9/5/2020 2:32 PM
41	Not organized at all	9/5/2020 2:02 PM
42	Twice I've had the city not give me a refund on sports - when my daughter broke her collar bone, and my son was signed up for kickball and the games ended up being way past bedtime, both times I got no refund which was pretty disappointing	9/3/2020 9:03 PM
43	It will not let me click on "not satisfied" twice.	9/3/2020 7:53 PM
44	I don't know of many trails.	9/3/2020 10:35 AM
45	Could use indoor pickleball somewhere for winter	9/3/2020 10:34 AM
46	It won't let me answer both - but the answer is very satisfied with both	9/3/2020 9:50 AM
47	Your communication for sports is poor. I tried to sign my son up for baseball. I called the city was transferred to someone and told to leave a message and he would call me back. Left 3 messages, never got called back.	9/3/2020 9:28 AM
48	Need better sidewalks	9/3/2020 9:11 AM
49	We need some food bike/walking/running trails... so many people use 200 west but it would be	9/3/2020 12:19 AM

Providence City Parks, Trails, and Recreation Survey

	better if we had a trail system similar to what logan city has going but that is connected!	
50	Very hard to work with Shaylor to get my kids on a team with a friend (one friend), missing shirts for teams, lack of advance notice when games will begin.	9/2/2020 9:23 PM
51	"bike routes" are often roads without even a shoulder let alone a bike lane	9/2/2020 9:15 PM
52	More biking and walking on sidewalks accommodations would be appreciated. Examples: pave shoulders on 200 W for the many, many bikers, make sidewalk continuous on one side of street on 1700 S, plow sidewalk on N Gateway Drive.	9/2/2020 6:26 PM
53	Wish there was more field space available for other sports--football and lacrosse.	9/2/2020 6:14 PM
54	Sheyler does a really good job with the programs and field maintenance.	9/2/2020 5:45 PM
55	There should be dog friendly parks, or even a small off leash park.	9/2/2020 5:31 PM
56	It would be nice to have a wide paved trail for biking and walking that goes through multiple cities in the valley- like the Murdock Canal Trail in Itah county. We used that one multiple times a week when we lived there. It was. I've because it was so wide, so there was plenty of room for serious bikers, kids on scooter and skateboards, runners, and people just out for a walk.	9/2/2020 12:01 PM
57	Bike lanes! Wide, paved, multi use trails needed!!!	9/2/2020 11:51 AM
58	Need more sidewalks, need better/more playground equipment, need to take better care of the grass	9/2/2020 10:21 AM
59	1 wish we had more	9/2/2020 9:59 AM
60	Too many cars block side walk	9/2/2020 8:43 AM
61	I don't feel like communication is very good between participants and organizers of the rec leagues.	9/2/2020 8:36 AM
62	Need more safer walking paths	9/2/2020 8:28 AM
63	We need more trails, paved and I paved	9/2/2020 7:50 AM
64	We can always use more biking and hiking trails	9/2/2020 12:59 AM
65	They need to be more advertising	9/1/2020 10:51 PM
66	It would be great to have a paved waking and biking trail like the River Walk in Logan.	9/1/2020 9:52 PM
67	Too much for baseball and not enough for other sports	9/1/2020 9:42 PM
68	Would like to see a paved bike path throughout the city	9/1/2020 9:21 PM
69	Could use more trails, bike lanes,	9/1/2020 9:00 PM
70	I would love to see more walking trails or bike paths.	9/1/2020 6:16 PM
71	More trails and consistent sidewalks	9/1/2020 6:09 PM
72	Some better roads, curbs, sidewalks could make things a bit safer	9/1/2020 5:49 PM
73	Need more connecting trails.	9/1/2020 5:18 PM
74	A plan is essential. Thank you for taking the steps. As communities are developed, so should the parks in proximity to those communities.	9/1/2020 4:56 PM
75	All fields and Buildings need updating at the main parks. Elementary school field is the nicest now.	9/1/2020 4:44 PM
76	The road is difficult to use since its small and sidewalks are small for walking with even 2 people side by side. Would love a walking bike trail in providence.	9/1/2020 4:38 PM
77	We would like to have a snow sledding hill for the winter time. Also I would like to have safer ways for my kids to cross busy roads so they can bike around town. During the summer flags went missing by Springcreek middle school and my daughter was almost hit by a driver that didn't watch for her crossing in the cross walk. I would like to have more side walk on the west	9/1/2020 4:28 PM

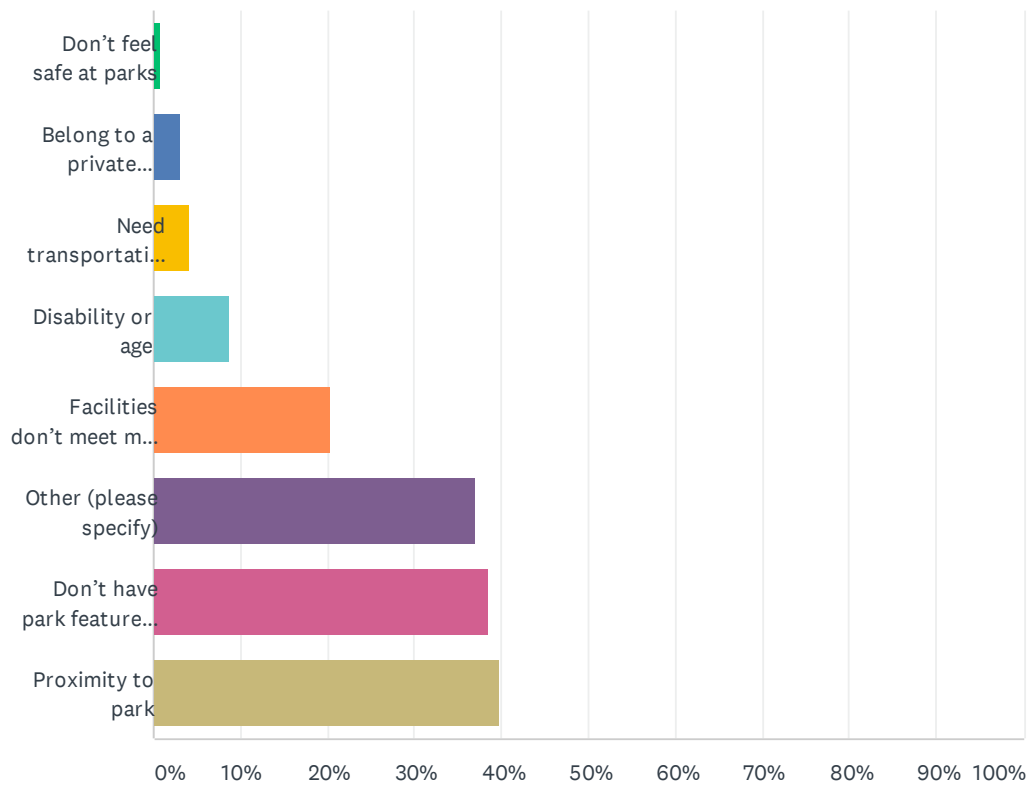

Providence City Parks, Trails, and Recreation Survey

side of the road from Bear Welding towards the north so my kids can safely walk and ride bikes to the Charter school CCID.

78	Would love to see more paved walking and biking trails. Would also like to see an indoor facility for recreation activities in the winter	9/1/2020 4:06 PM
79	My biggest issues with any of the parks the lack of Open restrooms for a very large part of the year.. with little kids it really should be open most of the year, spend money tending to them.	9/1/2020 4:01 PM
80	More hiking trails.	9/1/2020 3:50 PM
81	Other Cities in Cache County have better lacrosse fields, bike parks and pickleball courts	9/1/2020 3:49 PM
82	Rec seems to be very disorganized and poorly communicated	9/1/2020 3:46 PM
83	Tball program is unorganized every year. Received a text few days before first game that there wasn't a coach. Lack of communication and organization consistently each year.	9/1/2020 3:44 PM
84	Need more walking and biking paths that are separate from the road.	9/1/2020 3:39 PM
85	I would love more pickleball courts and the ability to be able to reserve.	9/1/2020 3:38 PM
86	I would like to have more places like Von Baer for passive recreation, i.e., walking in nature.	9/1/2020 2:36 PM
87	There are undevelopable spaces under the power lines that could be used for bike parks, trails, and mountain bike trails/parks	9/1/2020 1:08 PM
88	More trails needed!	8/30/2020 3:26 PM
89	Several years ago, I completed the walking program. I took my completed paper into the City Office only to find out that they had no prizes. Logan City gives out passes to the Rec Center or swim passes if you do their walking program.	8/30/2020 7:23 AM
90	need more dedicated biking and walking paths especially up to the canyon. Need more teen and adult sports and areas for teens to recreate, such as a skate park	8/29/2020 7:40 PM
91	We need fewer structured ball parks and more places where people can walk and sit, e.g. connected through non-busy street networks	8/27/2020 8:38 PM
92	I wish we had longer trails for running/walking/biking that no Motorized vehicles can go on.	8/27/2020 6:37 PM
93	With a city of this size and access to such beautiful open land spaces we severely lack in the parks and trails department. Comparing to others in the valley our parks are very under utilized and lack any kind of trail system. Not trying to be critical but excited this is becoming an issue that will get some attention.	8/27/2020 4:47 PM

Q33 If Members of your household seldom or do not use Providence City park facilities. What are the reasons? (Please check all that apply)

Answered: 216 Skipped: 63

8	We're just more into hiking/trails.	9/18/2020 10:48 AM
9	Not applicable	9/18/2020 10:09 AM
10	Unaware they exist.	9/18/2020 6:00 AM
11	Not sure what is available	9/17/2020 12:17 PM
12	People not following rules, garbage everywhere.	9/17/2020 11:21 AM
13	We use Millville's park with the splash pad all the time. That is the ideal park. Lots of open space, trees for shade, shaded playgrounds, splash pad, lots of shaded picnic tables. Wish Providence had something comparable.	9/16/2020 7:20 PM
14	No time	9/15/2020 10:15 PM
15	Need more tennis courts	9/15/2020 9:37 PM
16	Pickleball courts needed!	9/15/2020 7:38 PM
17	No enough play equipment	9/15/2020 6:12 PM
18	nothing on fox ridge, have to climb a hill to get home from any facilities	9/15/2020 4:22 PM
19	Horrible response to COVID. Packed baseball fields during the pandemic equate to a foolish and horrible idea.	9/15/2020 1:09 PM
20	Don't know about them	9/15/2020 12:37 PM
21	Not aware of options	9/15/2020 12:31 PM
22	We need dog friendly parks, if not a dog park itself!!!!	9/15/2020 12:25 PM
23	Let's be honest, some of these parks aren't much more than a dirt patch. Some are excellent. I feel most residents aren't even aware of all the parks and trails. Could do a better job with just awareness. Better information with pictures and maps that's easy to find	9/15/2020 12:04 PM
24	I don't know where more than half these parks are, so I didn't know they were available to use.	9/15/2020 11:59 AM
25	We need to invest in facilities for every age group, not just children. I pay for a dog license, why isn't there a dog park or even a dog friendly park in Providence?	9/15/2020 11:54 AM
26	The park in our neighborhood has no trees, grass, shade, fences or play equipment.	9/13/2020 5:55 PM
27	No dogs allowed, we enjoy taking our dogs with us	9/13/2020 3:35 PM
28	Not aware of facilities	9/12/2020 9:28 AM
29	Do not have a city park near our house on the south bench.	9/11/2020 7:39 PM
30	Was unaware of most of the parks	9/11/2020 5:04 PM
31	Live in Hyrum	9/11/2020 9:43 AM
32	I do not reside in Providence	9/9/2020 7:50 PM
33	No restrooms	9/9/2020 8:06 AM
34	We like parks that are inviting to kids and grandkids: fun, large equipment with room to play,	9/8/2020 9:36 PM

Providence City Parks, Trails, and Recreation Survey

	grassy areas, some shade, and bathrooms!	
35	Simply didn't know about the other parks	9/8/2020 12:40 PM
36	Not enough pickleball	9/7/2020 7:55 AM
37	don't have school age kids; looking for more walking and biking trails.	9/6/2020 2:05 PM
38	Probably not aware of all the various areas, but now children are all raised and so if we go, it is usually with the married children and their family, but usually too busy to go.	9/6/2020 2:11 AM
39	The park by my grand children is a slopped lawn with no equipment? We should make it a baseball field? We probably have not bought a new scoreboard this year?	9/5/2020 4:03 PM
40	not knowledgeable as to what is available.	9/5/2020 3:10 PM
41	safe passage (green space) for kids to get there	9/5/2020 2:32 PM
42	I am a lone member of my household.	9/5/2020 10:38 AM
43	Didn't even know there were that many parks. Plus has some bad experiences at the baseball field, got in trouble for playing on it.	9/3/2020 9:28 AM
44	No need to use them all	9/3/2020 9:06 AM
45	Need more pickleball courts. We try and play but they are always so crowded!	9/3/2020 12:19 AM
46	Unaware of many of the parks	9/2/2020 9:23 PM
47	We do use parks and trails that we are aware of.	9/2/2020 6:26 PM
48	Unaware of parks and proximity	9/2/2020 6:06 PM
49	The Providence parks lack variety and amount of amenities for the amount of people that frequent them. What amenities are there are usually so crowded and hardly hold family's attention for long	9/2/2020 5:43 PM
50	Did not know there were this many parks int he city.	9/2/2020 4:44 PM
51	Don't know	9/2/2020 2:04 PM
52	old and feeble and don't get out much anymore. When I did in the past I was satisfied with facilities	9/2/2020 12:58 PM
53	Lack of shade	9/2/2020 11:51 AM
54	WE DO	9/2/2020 9:17 AM
55	I had no idea they were eventually parks in Providence. So I would say and lack of spreading the word of the parks and what they have to offer	9/1/2020 10:51 PM
56	Simply don't know about all of them	9/1/2020 9:13 PM
57	Wasn't aware of all the parks	9/1/2020 7:36 PM
58	I frequently use parks when out of town guests (Grand children) visit, but seldom do otherwise exepting the Deer Fence, walking up Providence Canyon and so forth.	9/1/2020 7:09 PM
59	I seldom use the parks because I don't have small children and grandchildren would rather go to our farm to visit the animals. So I don't have a real need to frequent the parks.	9/1/2020 5:38 PM
60	I wanted to reserve Braeggar park for a reunion and was sad to find that is not available. That would be a very helpful feature. We ended up having to outside our city.	9/1/2020 5:07 PM
61	Na	9/1/2020 4:57 PM
62	Hillcrest park doesn't have enought tree nor playground facilities	9/1/2020 4:50 PM
63	I don't think I am aware of all the parks and what they offer plus find they are kept.	9/1/2020 4:38 PM
64	was not aware of all the parks and the locations	9/1/2020 4:37 PM
65	We don't know where all the parks are in Providence.	9/1/2020 4:28 PM

Providence City Parks, Trails, and Recreation Survey

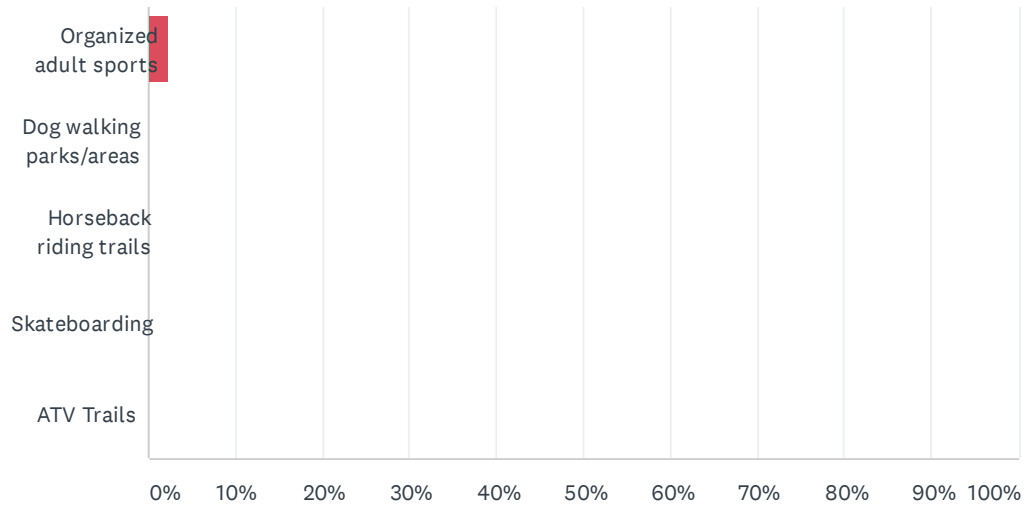

66	Just never been	9/1/2020 4:00 PM
67	More evening lights. More pickleball courts	9/1/2020 3:50 PM
68	Don't know of their location	9/1/2020 3:48 PM
69	We use them	9/1/2020 3:46 PM
70	No problems	9/1/2020 3:31 PM
71	We use the parks every day! We would just like to see more green, natural spaces.	9/1/2020 2:36 PM
72	Would like more paved trails	9/1/2020 2:00 PM
73	N/a	9/1/2020 12:34 PM
74	Not interested	8/31/2020 1:15 PM
75	I prefer to hit a trail	8/30/2020 7:23 AM
76	To big of crowds	8/28/2020 8:55 AM
77	Parks should be bigger with more trees and tables/shelters for gatherings. Not all ball parks.	8/27/2020 8:38 PM
78	We use the ones closer to us.	8/27/2020 6:37 PM
79	Split age ranges. Some of my family enjoys parks and others do not	8/27/2020 4:46 PM
80	We use the parks every day.	8/18/2020 8:25 PM

11	F	9/1/2020 4:52 PM
12	Restrooms	9/1/2020 4:01 PM
13	Open space	8/30/2020 3:26 PM
14	We need a logical system of walking routes, where streets are intentionally kept from high volume or high speed traffic. Streets should be NARROW to keep speeds down and should have space for walking/biking	8/27/2020 8:38 PM

Q35 Would you like to see a dog park constructed in Providence City?

Answered: 267 Skipped: 12

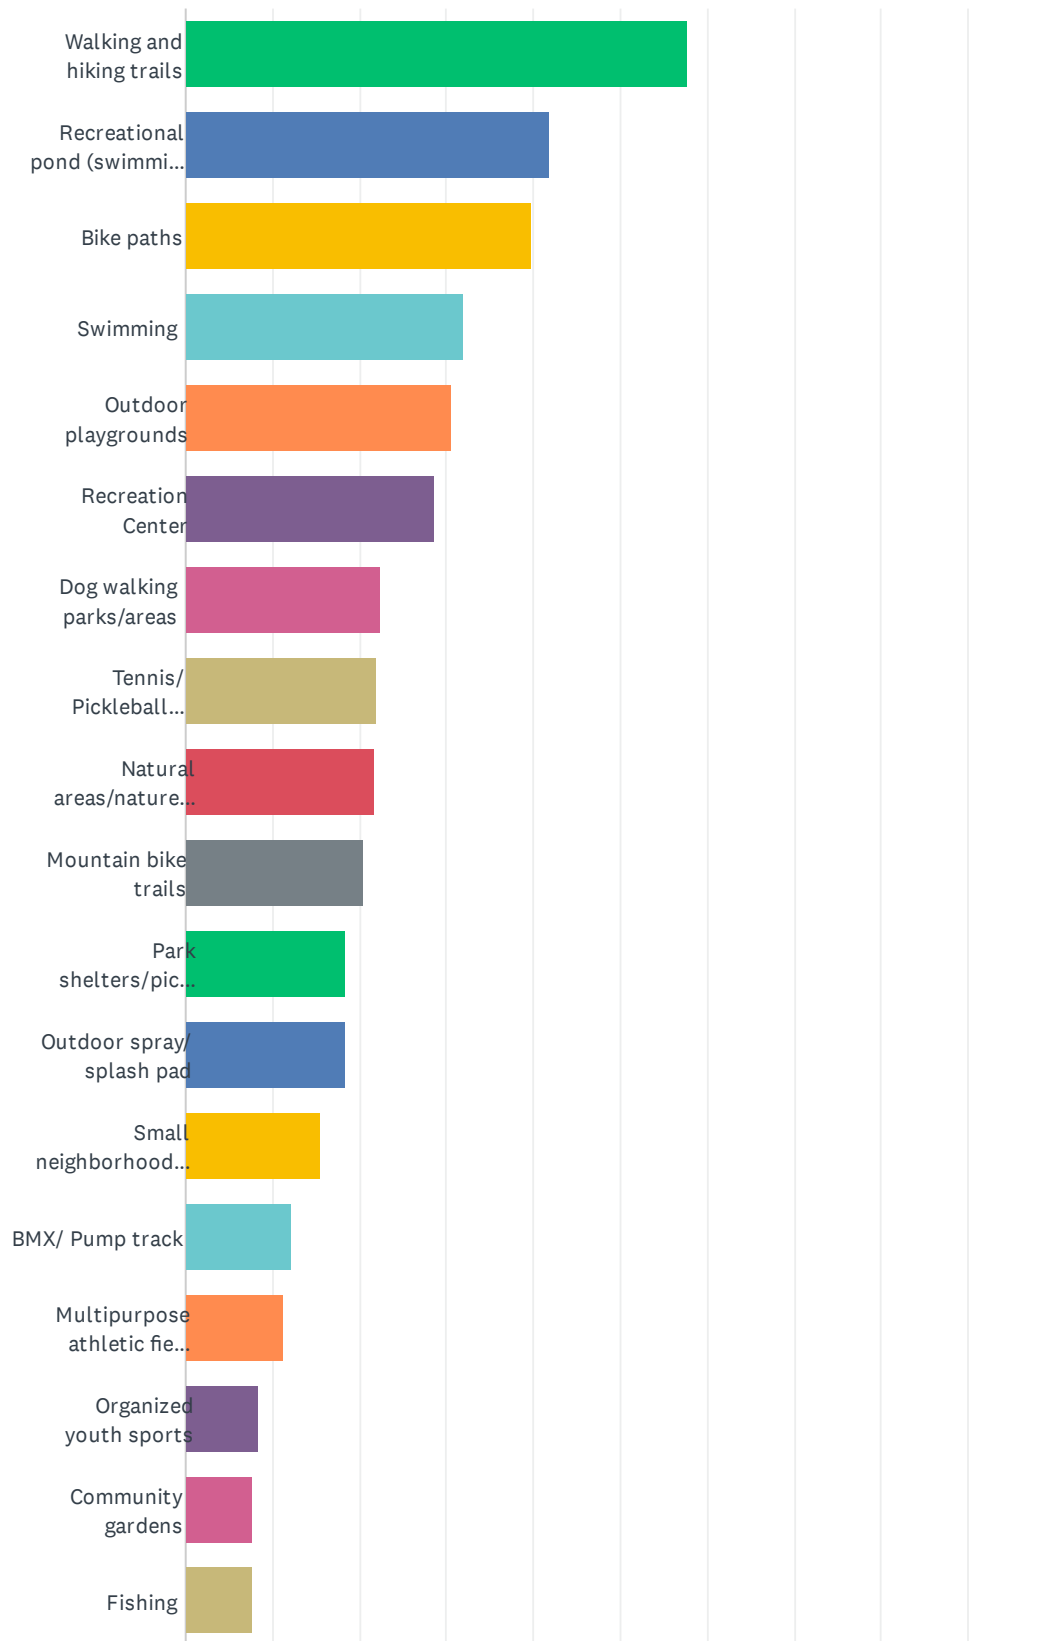

ANSWER CHOICES	RESPONSES	
Yes	28.84%	77
No	63.30%	169
If yes, what amenities would you like to see there?	7.87%	21
TOTAL		267

Providence City Parks, Trails, and Recreation Survey

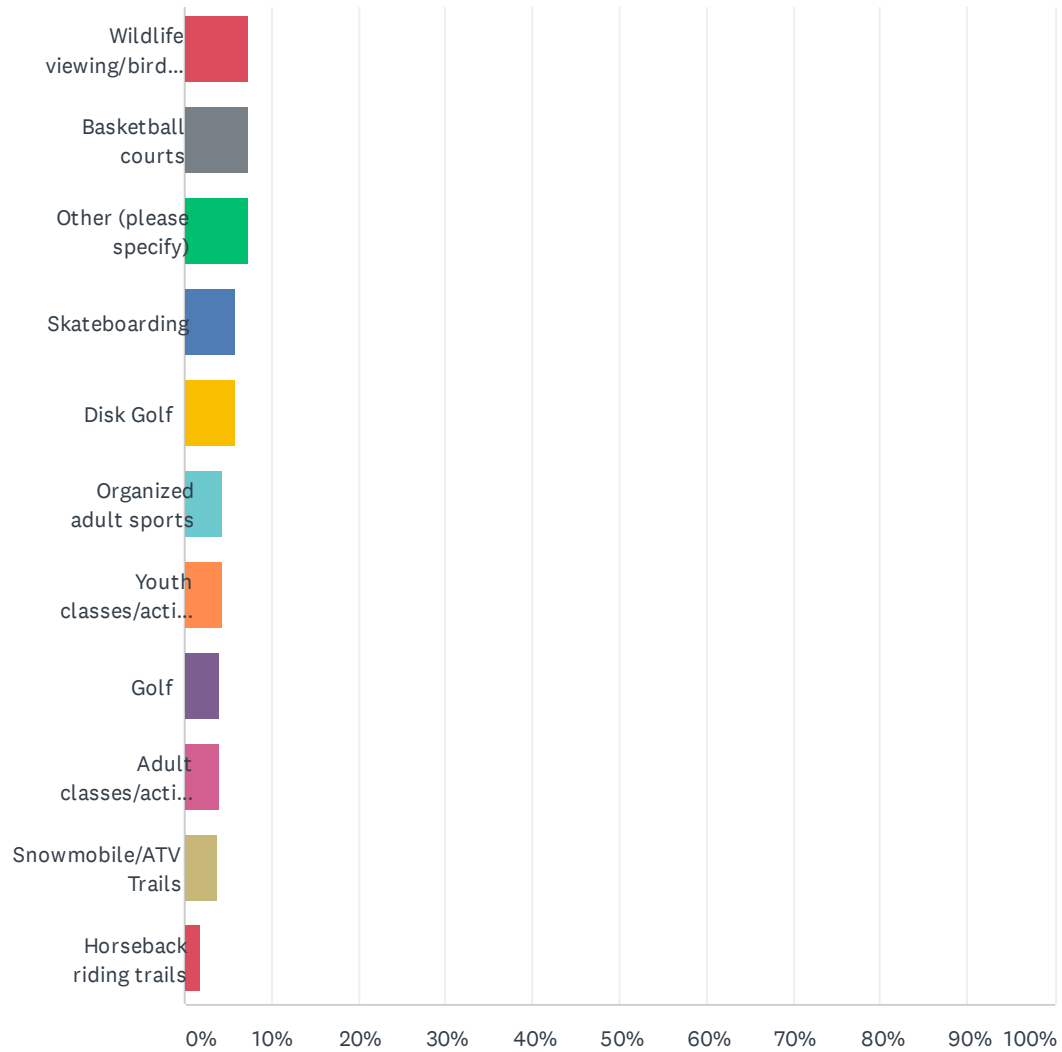

#	IF YES, WHAT AMENITIES WOULD YOU LIKE TO SEE THERE?	DATE
1	Good grass helps. A dirt dog park isn't so fun.	9/20/2020 1:01 PM
2	shade, water, field	9/19/2020 7:24 AM
3	Small dogs separate from medium/large dogs, benches, trees, garbage cans, drinking fountains for dogs	9/18/2020 10:55 AM
4	Double gates, trash bins, benches, water access	9/17/2020 9:07 AM
5	Benches, Pavilions for shade	9/15/2020 12:27 PM
6	Spacious park that is maintained as well as the baseball fields, grass or some sort of ground cover, shade, seating. Lighting (that is consistent with dark skies protections) that can be used when the days are short.	9/15/2020 11:54 AM
7	Open space, water features, amenities that other parks have for families. Prefer for dogs to be allowed everywhere	9/13/2020 3:35 PM
8	climbing equipment washing stations	9/11/2020 9:23 PM
9	water station, pavillion, benches, room to throw balls/Frisbee long distance.	9/11/2020 9:43 AM
10	Yes, so people would take their dogs there to poop instead of leaving a mess on my lawn	9/9/2020 11:32 AM
11	Fence, short grass, water, shade.	9/8/2020 8:17 PM
12	Keep the dogs in their own park and off my lawn.	9/8/2020 10:26 AM
13	Well, I am tired of cleaning up the messes from my lawn, so if the dog park would help with that, I am all for it. It seems that a lot of the litigation on TV (court shows) is that someone's Bull Dog, ripped up another patron's poodle at the dog park. Just saying, I am O K with one, but personal responsibility is paramount.	9/6/2020 2:11 AM
14	Fenced area that does not get muddy in the winter. A shade structure would be nice for in the summer	9/2/2020 8:42 AM
15	If people would use it so they quit going on our lawn	9/2/2020 8:28 AM
16	playground for kids too and one/or the same for dogs.	9/1/2020 6:16 PM
17	Uncertain	9/1/2020 4:15 PM
18	Honestly we don't need more parks we need to make Parks dog friendly with poo pick up stations and reasonable safety guide lines.	9/1/2020 4:01 PM
19	I would like to see Brookside not be used as a dog park.	9/1/2020 3:46 PM
20	If there is a dog park, it needs to be broken up into two sections. One for small dogs, one for large dogs. Otherwise there are still many that won't take their dog for fear of injury. We have a 15 pound dog in our household, but are unable to take him to the Logan dog park because it is dominated by very large, often aggressive dogs.	9/1/2020 3:18 PM
21	Doesn't matter, I don't have or like dogs, but hope that if there were a place to take them, dog owners would have a place to go besides near my property with dogs off leash and harassing my chickens.	9/1/2020 1:08 PM

Providence City Parks, Trails, and Recreation Survey

#	OTHER (PLEASE SPECIFY)	DATE
1	Unsure	9/22/2020 6:28 PM
2	If we had an indoor swimming facility, that would be well visited by other parts of the community especially if it had a slide and play area.	9/19/2020 7:59 PM
3	Current disc golf course is too difficult	9/19/2020 8:53 AM
4	Indoor tennis courts	9/18/2020 10:28 AM
5	all this costs money. so i am opposed to raising our taxes to pay for additional parks and recreation services if possible.	9/15/2020 8:36 PM
6	Shaded splash pads (for adults who are supervising)	9/11/2020 5:04 PM
7	Rock climbing feature	9/9/2020 1:53 PM
8	Please don't put in a golf course, it serves a very small percentage of the population, has a lot of overhead and takes up too much space. Rec, or more like open gym, activities for kids that are too old for rec but not playing club or high school. So like an outdoor volleyball group that meets once a week to play around, not necessarily teams because high schoolers won't always be able to make it with their schedules. Indoor volleyball would be even better.	9/5/2020 2:54 PM
9	I would love to see sidewalks/ bike paths to the schools in the area.	9/3/2020 7:53 PM
10	indoor swimming	9/3/2020 10:54 AM
11	Indoor pickleball for winter	9/3/2020 10:34 AM
12	A pool would be good. I'd love to see more features at the splash pad	9/3/2020 9:41 AM
13	Dogs should be allowed, on leash, at all parks.	9/2/2020 6:26 PM
14	Hockey rink	9/2/2020 6:12 PM
15	Trash receptacle or garbage pail.	9/2/2020 12:29 PM
16	More sidewalks	9/2/2020 10:21 AM
17	A large pavilion without picnic tables that can be used for group events	9/2/2020 10:16 AM
18	Parkour	9/1/2020 5:07 PM
19	Snow sledding hill	9/1/2020 4:28 PM
20	Recreation center with a gym and Sauna	9/1/2020 3:27 PM

1	I am unaware of trails except at Vons park	9/21/2020 3:17 PM
2	I'm not aware the city has any ATV system or interest.	9/20/2020 1:23 AM
3	Jeep	9/17/2020 9:07 AM
4	Would love to know locations of city trails	9/15/2020 12:31 PM
5	I use the Providence Canyon trail on rare occasions when I do not feel I am in danger of being shot.	9/15/2020 11:54 AM
6	Do we actually have a city's trail system? It would be great if we did.	9/13/2020 5:55 PM
7	If safe for young children, I would love to use it	9/12/2020 9:28 AM
8	I don't know of many trails in Providence, other than the canyon. Is there more? If so, is it well maintained and safe?	9/8/2020 9:36 PM
9	Not sure of any ATV trail in Providence other than private property, but use the canyon a lot.	9/6/2020 2:11 AM
10	I don't know of a trail system. I use providence canyon and the deer fence trail though.	9/5/2020 2:54 PM
11	In all honesty, I walk the neighborhoods but make the trails when my son can go with me.	9/5/2020 10:38 AM
12	Not sure of this trail system, I would love it if there was a good one!	9/3/2020 12:19 AM
13	I	9/2/2020 9:23 PM
14	Remember, I am old and feeble!	9/2/2020 12:58 PM
15	Hiking up Prov Canyon and along the deer fence	9/1/2020 4:56 PM
16	Exploring	9/1/2020 4:01 PM
17	Hiking.	9/1/2020 3:50 PM

Q38 Please choose which trail surface type you prefer:

Answered: 263 Skipped: 16

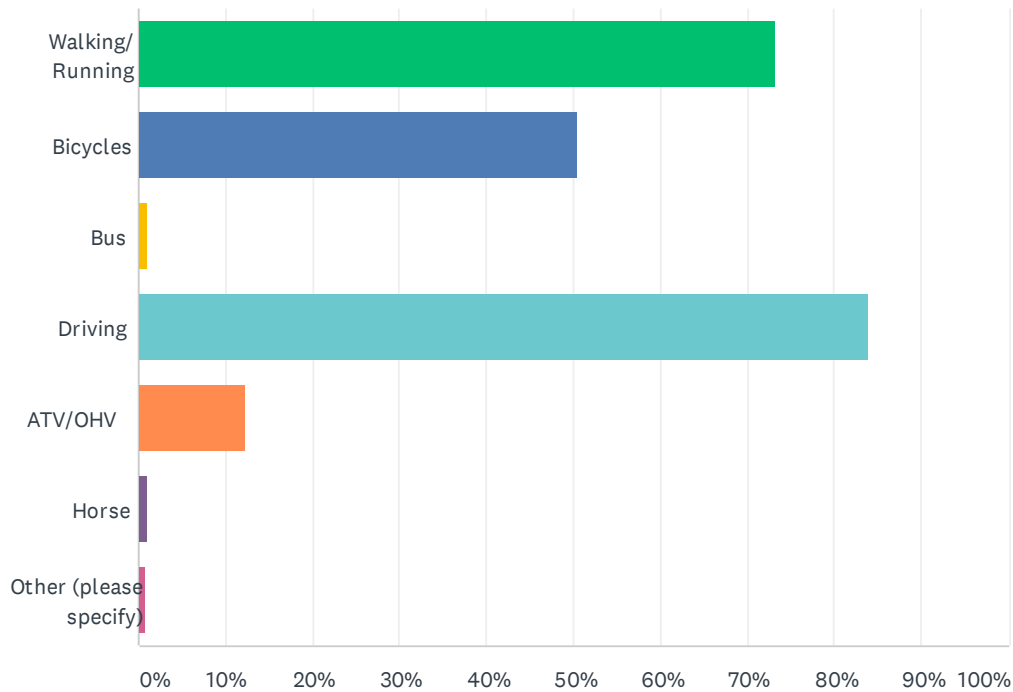

ANSWER CHOICES	RESPONSES	
Gravel/Dirt Surface	19.39%	51
Hard Surface	18.25%	48
Both	62.36%	164
TOTAL		263

#	COMMENTS	DATE
1	Don't mind gravel as long as it's wide for people to pass	9/18/2020 10:55 AM
2	Accessibility is extremely important to me. Hard surfaces allow for wheelchairs, walkers and assistive devices to be used, increasing access to the entire community.	9/15/2020 9:13 PM
3	Dirt and hard surface are best for the type of biking my family likes to do. Gravel, not so much, but we can manage it.	9/11/2020 2:41 PM
4	Hard surface if walking, gravel if other activities.	9/6/2020 2:11 AM
5	Wide, continuous paths for walking and smooth biking with kids would be GREAT!!	9/2/2020 6:26 PM
6	The bike lane is often bumpy. I'm glad it's there but wish it stayed cleaner	9/2/2020 6:12 PM
7	For biking	9/2/2020 4:44 PM
8	More sidewalks please!	9/2/2020 10:21 AM
9	Some thing smooth paved or not	9/1/2020 4:01 PM
10	Hiking dirt and hard surface for other	9/1/2020 3:50 PM
11	I prefer dirt, but I like a hard surface to use when the dirt trails are muddy	8/30/2020 7:23 AM

8	Na	9/13/2020 6:07 PM
9	Build a neighborhood park on 400 South and main.	9/13/2020 5:55 PM
10	Take ownership & control of the lower portion of providence canyon so it is safe & can be used to acces areas & trial of Providence	9/13/2020 5:00 PM
11	Mountain bike trail investment.	9/11/2020 8:40 PM
12	Acquire public access points to Deer Fence trail.	9/8/2020 4:11 PM
13	A recreation center with indoor/outdoor pool would be nice	9/8/2020 12:40 PM
14	#1 - Build connecting trails, add a nice fishing hole for multi generational families to use.	9/6/2020 2:05 PM
15	As Providence grows, more areas should be generated to accommodate expansion. Youth sports is vital to keep children off the electronics and active physically and off streets.	9/6/2020 2:11 AM
16	For build additional- I would like to see a gym for volleyball and basketball	9/5/2020 2:54 PM
17	Golf course - practice center, rec center, public pool, trails	9/5/2020 2:32 PM
18	Would love to ride a horse again...or find a basketball court	9/5/2020 10:38 AM
19	Bike trails	9/2/2020 8:59 PM
20	More and LIGHTED pickle ball courts!	9/2/2020 4:26 PM
21	Family oriented party space	9/2/2020 12:58 PM
22	Paved, usable multi use trails	9/2/2020 11:51 AM
23	1	9/2/2020 9:17 AM
24	The shooting that goes on in providence canyon in awful- there is often a mess from the casings. It is also very loud and scares children and adults	9/2/2020 8:42 AM
25	Expanding, walking, hiking and biking trails in conjunction with building new neighborhoods	9/1/2020 4:56 PM
26	Moo	9/1/2020 4:52 PM
27	There are enough Tournaments in town we need facilities to handle them Softball, Baseball. Bigger!	9/1/2020 4:44 PM
28	Work on a walk and bike trail	9/1/2020 4:38 PM
29	Improve on the parks we already have adding amenities such as restrooms, splash pad, dog friendly walking paths more parks just mean less money for each Park.	9/1/2020 4:01 PM
30	Just communicating better with the public, coaches and players for sports	9/1/2020 3:46 PM
31	Put in sidewalks so people can walk safely along the existing streets.	9/1/2020 3:44 PM
32	More soccer fields and outdoor basketball courts with lights	9/1/2020 1:16 PM
33	Protect trails for hikers, without motorized access	8/30/2020 3:26 PM
34	Put a bathroom (flush toilets) at the mouth of Prov Canyon and add more trails to get to the	8/30/2020 7:23 AM

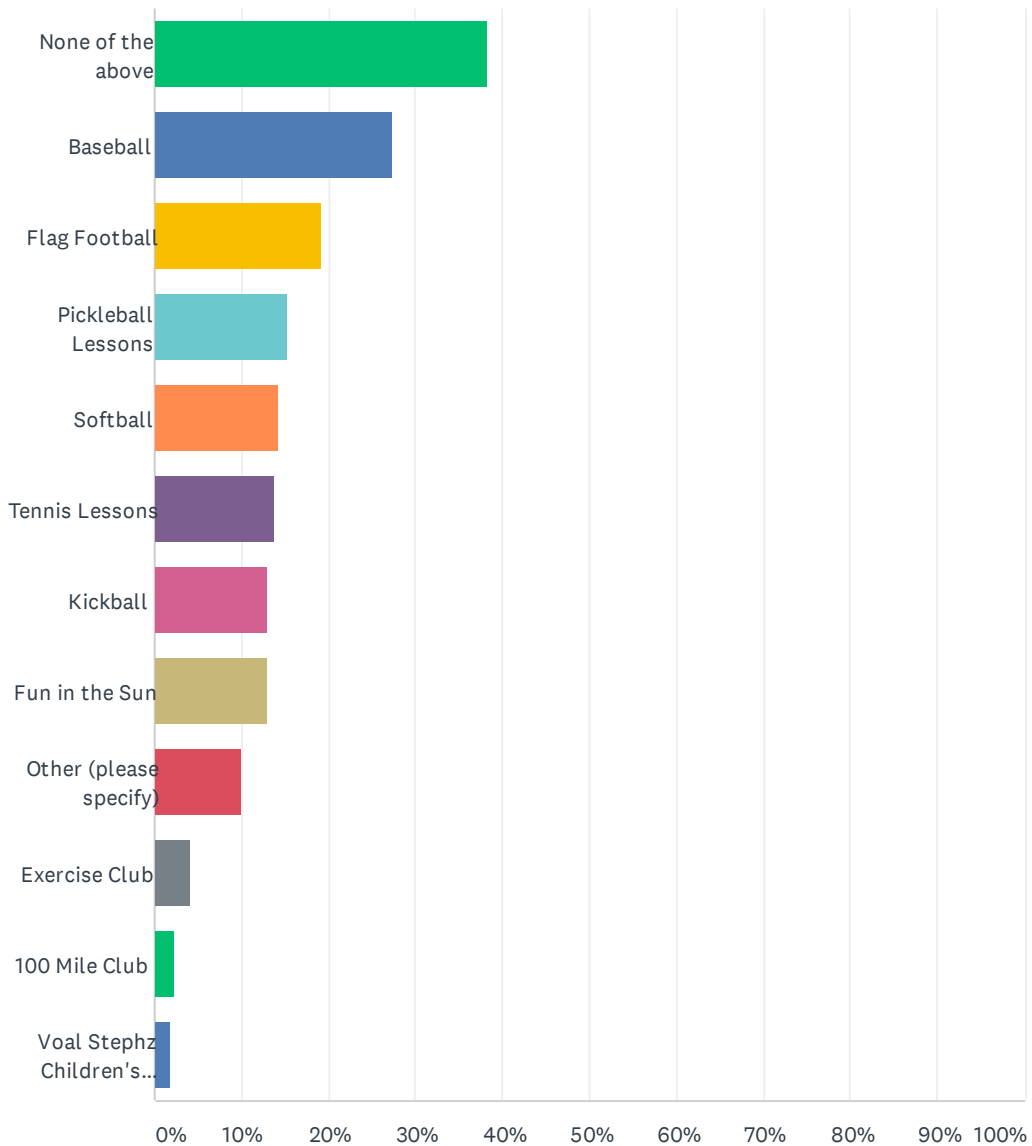

Providence City Parks, Trails, and Recreation Survey

canyon

35	I believe having larger parks with more amenities, playgrounds, pavilions, trails would be a huge addition to our community. The smaller neighborhood parks are nice but not as known or interesting for people to go to if they don't live in that neighborhood	8/27/2020 4:47 PM

Q46 Is there anything further that you would like to tell us? Are there any parks, trails, or recreation components that need to be improved? Are there any neighborhoods that are deficient in open space or parks or trails? Please provide us with any additional comments or suggestions below.

Answered: 168 Skipped: 111

Providence City Parks, Trails, and Recreation Survey

#	RESPONSES	DATE
1	Being in city council meetings before this topic has come up. Families chose new neighborhoods with small yards. Then came back demanding the city create them a park their kids could walk to because their yards are too small. That is not right.	9/22/2020 6:28 PM
2	It is sad to see trees planted and then let die because of lack of care. There are no good bike trails. There is not a very good variety of play structures in the parks. Parks are not well maintained.	9/21/2020 3:17 PM
3	You guys are awesome! Keep up the good work!	9/20/2020 4:17 PM
4	We think you're doing a great job. We go to Alma most, and it's so beautiful to see the park full of adults and kids. Well done!!!	9/20/2020 1:01 PM
5	No additional comments	9/19/2020 11:04 PM
6	Playgrounds that are built for a variety of ages make it more fun for the whole family which, naturally, has children of different ages and developmental stages.	9/19/2020 8:20 PM
7	Just Thank you all for what you do for all of us in providence	9/19/2020 1:18 PM
8	As I mentioned, please not only consider what people want in parks but how those features affect the lives of people living nearby. For the park beside my home, which is Leonhardt park, a positive feature is something quiet such as walking trail, nature area, community garden, or something similar.	9/19/2020 12:07 PM
9	Your current parks could use updated playground equipment with more variety and more restrooms. The sidewalks and roads could be better so that walking to parks is more possible with children	9/19/2020 9:13 AM
10	A Natural water feature would be fantastic. Improve the safety and quality of the current hiking and biking trail system. I'll take this opportunity to mention a larger library is needed, even Though this doesn't fall under parks and rec	9/19/2020 8:53 AM
11	would like to see a gate at the south end of the deer trail at Providence Highlands. I use that trail every day	9/19/2020 7:24 AM
12	Parks are Important to build a sense of community and providence is behind in many ways in this area when compared to our neighboring cities. I'm excited to see us start leading in this area rather than following.	9/18/2020 9:07 PM
13	More natural unstructured areas such as green space, wild grass areas, butterfly and bird watching areas etc. it's nice to have these in the city without going to the canyon	9/18/2020 7:22 PM
14	I think the emphasis on parks having primarily one sport mainly being baseball has been a disservice to the city patrons. There has been too many resources put towards one sport only. They need to allow more soccer fields, tennis courts and something the city has neglected would be bike paths. I would like to see more diversity in what the parks have to offer.	9/18/2020 3:37 PM
15	More tennis/pickle ball courts Indoor tennis court would be used all winter Providence community swimming pool would be used a lot	9/18/2020 10:28 AM
16	Nope	9/18/2020 10:09 AM
17	Trails within the residential areas connecting parks and providing better access to parks. This will also make all parks more accessible for those with disability. More playgrounds.	9/18/2020 9:53 AM
18	Build a pool.	9/18/2020 6:00 AM
19	I live on Edgewood Dr. In this area the road is very narrow, the sidewalk does not have a curb, and there are no trails through the neighborhood. There are also off road vehicles that drive far above the speed limit through this area, creating a sense of danger while walking on the sidewalk. I think a trail or improved sidewalk system through this area could be beneficial.	9/17/2020 4:46 PM
20	1. Logan does a good job of publicizing their parks and trails. Providence could do better. 2. Could you come up with something more fun than a sauerkraut festival. No one really likes sauerkraut. It's like having a brussel sprout festival. 3. We need a shooting range - a handgun range would be great!	9/17/2020 12:17 PM
21	Have sports teams and schools clean up their space when they are done to reduce trash and	9/17/2020 11:21 AM

Providence City Parks, Trails, and Recreation Survey

	litter that is always on the ground.	
22	Forbid shooting in providence canyon, build shooting range with proper safety measures.	9/17/2020 9:07 AM
23	Hillcrest park turned in to the playground splash pad park it was planned for. Not just open field of grass hills	9/16/2020 8:31 PM
24	Keep the shitting cows off the deer fence trail. :) Also, I shoot guns and it's nice to be able to go up the canyon to shoot. But it's a razor thin line between where people shoot and where people ride their bikes. I don't feel comfortable shooting up there and I certainly wouldn't feel safe mountain biking up/down the canyon at points. This is a serious safety risk and should be addressed.	9/16/2020 7:20 PM
25	Hillcrest park needs more facilities than an empty field	9/16/2020 5:45 PM
26	I like what Providence offers.	9/16/2020 4:38 PM
27	I would love to see a group of cities...Providence, river heights and Millville group together the have an indoor Rec Center and pool facility on this end of town.	9/15/2020 10:09 PM
28	Providence North Bench needs parks &/or trails. The only park we have is Von's & it's often being used	9/15/2020 9:53 PM
29	Bathrooms in a few more of the parks would be beneficial.. a park in the north portion of providence would be good. Use some of the funds we have to improve the parks that seem to be all but forgotten rather than spending so much money on the baseball and softball fields. I would like to see more pickleball courts	9/15/2020 9:51 PM
30	Please fix the sidewalk in 100 north in the north side. It's terrible for kids to walk to school on. So many cracks.	9/15/2020 9:37 PM
31	No. Providence needs a lot more green space	9/15/2020 9:21 PM
32	No	9/15/2020 9:19 PM
33	Please consider accessibility when building future playground equipment in parks. This doesn't have to be specially designed equipment, even just involving someone who knows about the needs of individuals with disabilities would be helpful. Consider options other than wood chips, an adapted swing, ramps, etc.	9/15/2020 9:13 PM
34	please don't raise our taxes to fund parks and recreation.	9/15/2020 8:36 PM
35	The pond at Hampshire Park-is it serving a purpose? If not it's wasted space. More pickleball courts & programs	9/15/2020 7:38 PM
36	Would love to see a pickle ball court at Hampshire Park	9/15/2020 7:32 PM
37	No	9/15/2020 6:12 PM
38	I would love to see more pickle ball, pool, pump track, Mountian biking	9/15/2020 5:16 PM
39	Jo	9/15/2020 4:52 PM
40	It is extremely hard to find a pickelball court to play at in our city. There is often a line for games.	9/15/2020 4:26 PM
41	Foxridge doesn't have any open parks/spaces	9/15/2020 4:22 PM
42	More pickle ball courts	9/15/2020 2:58 PM
43	I saw that Zollinger Park's playground was recently removed. I'm really hoping that means a new playground is going to built in it's place. That would be so fantastic!!	9/15/2020 2:04 PM
44	A Rec Center would be amazing! It would be great to have classes, activities, gym space, etc. for Providence City residents and it can bring in money if made available dokie other residents for reasonably higher costs.	9/15/2020 12:37 PM
45	We moved to Providence in the past year and our main concern is the lack of any big nice parks. For a city this size with this many neighborhoods it is odd that there are not more large parks (or really any with decent sized multi use areas). All of the smaller cities surrounding us do a much better job of having big parks that really are jewels for their cities.	9/15/2020 12:28 PM

Providence City Parks, Trails, and Recreation Survey

46	The road on the east side of providence elementary is dangerous for children bc it's so uneven. Consider redoing that road.	9/15/2020 12:13 PM
47	Improve what we already have. Most people aren't even aware of all our parks and some are in real need of improvement. Maintain and fix what we have before acquiring more.	9/15/2020 12:04 PM
48	Create a consistent system of sidewalks so that everyone has access to close free recreation.	9/15/2020 11:54 AM
49	We heard the city is thinking of putting a pickle ball court in cattle corral park. I am strongly against it. We have a nice quiet neighborhood right now.	9/14/2020 2:34 PM
50	Attention to the corner at 400 S. Main Street, and return the elementary school playground to the children	9/14/2020 1:49 PM
51	Cache valley doesn't have any indoor swimming in the winter time. We have family in Cedar City and think their indoor outdoor pool facility is really nice. I'm not sure our city can afford it, however.	9/14/2020 8:38 AM
52	Jay's Well Park is a disgrace. It doesn't look a lot better than it did before whatever was is growing there was planted there. At least it gets mowed. It is an insult to our neighborhood.	9/13/2020 8:10 PM
53	Clean breaggar park tennis courts	9/13/2020 6:07 PM
54	Please build a neighborhood park on 400 South and Main.	9/13/2020 5:55 PM
55	The deer fence trail property is private property but many incorrectly believe it is federal land. This needs to be purchased along with multiple points of public access before it is too late. Need open spaces on the North bench. Need to take ownership/control of the Canyon before becoming National Forest. Eliminate shooting except in designated areas	9/13/2020 5:00 PM
56	As stated before the parks here are not dog friendly. We enjoy our dogs and like them to be with us. Look at the parks in castle Rock Colorado, their parks and trails are perfect	9/13/2020 3:35 PM
57	I have expressed my opinon about the well park, such an eyesore, it would look better as dirt, not unwatered weedgrass. We love the new park by us, the park by my parents and would love to see more of that throuout the city. We love all the neighbors we have gained and will continue to gain but we are sad to lose the open space that we desired when we moved here. Please help protect them.	9/13/2020 1:34 PM
58	No	9/12/2020 1:16 PM
59	I have looked all over the valley for biking trails that are away from roads and therefore safe for young children, but so far I am not aware of any. I would LOVE to see such biking facilities made available so that I may take my four very young children on bike outings without worrying about them being right next to traffic with the potential for getting hurt.	9/12/2020 9:28 AM
60	Limit Pickleball play times (DO NOT install lights). I live right next to the courts and they are played on (often with loud music) from 6am until the sun goes down.	9/11/2020 9:23 PM
61	Your doing a great job! Thanks.	9/11/2020 8:40 PM
62	An indoor swimming facility would be amazing. Cache Valley is in complete lack of this and Providence would be a great central location to put one.	9/11/2020 7:39 PM
63	A rec center with an indoor swimming pool and indoor track would be amazing! As well as an outdoor swimming pool. More shade at the splash pad (for adults) would be great!	9/11/2020 5:04 PM
64	We love a few of the parks a lot. We are still relatively new to Providence, so we're still finding some of these other parks that are mentioned in the survey. One thing that would be really, really helpful is a map of trails. We would also love an area to kayak or canoe on, if a water area is something that's in the plans. That would be amazing.	9/11/2020 2:41 PM
65	Too much new development is robbing us of our open space. There's not enough information out about parks (I didn't know about 80% of the parks mentioned) and trails and some of them aren't being maintained at all.	9/11/2020 10:48 AM
66	Zollinger Park playground could be improved. Some of the new areas of the city, including Providence Hollow and Providence Gateway, should have a park near them.	9/10/2020 4:14 PM
67	Is the one in my neighborhood called Brookside. Around Andrew Lane and Springcreek? A playground would be nice. I'm annoyed about my neighbors who took it upon themselves to	9/9/2020 8:31 PM

Providence City Parks, Trails, and Recreation Survey

destroy city property and turn it into their private baseball field. They destroyed the grass to make it bases and the pitchers mound. They put up and take down a fence when they play. I'm also tired of all the people who do not have fences around it. They treat the park like their own backyard. Dogs off leashes all the time, dog poop everywhere, someone built a gazebo next to the sidewalk so you walk your dog and people are a few inches away from the sidewalk having a family party.

68	If it comes down to it, fix the roads first, then when that is under control lets look into parks.	9/9/2020 1:53 PM
69	I would love to see an indoor facility like the one in North Logan (RSL building) to be used for a variety of purposes.	9/9/2020 9:43 AM
70	Improve the website, advertise programs better and on time. Take signs down when they're not relevant, make things more obvious for newcomers	9/9/2020 9:41 AM
71	It would be great if Providence had at least one really great park and more bike trails that don't go up mountains.	9/8/2020 9:36 PM
72	Do not build more pickle ball courts. They are disruptive and they wake me up almost every morning at 4:30 and they keep me up till 10 or later. They are loud and disruptive to my daily life.	9/8/2020 5:36 PM
73	We have Providence Canyon that needs to be cleaned up, improved camp spaces, eliminate the shooting range, maintain current bike/hiking trail, expand the trail to go above the quarry, create a entry/easy level bike/hiking path in the Canyon, build a recreation center with indoor tennis, indoor/outdoor pool, weight room, basketball courts	9/8/2020 12:40 PM
74	We would absolutely *love* to have Hillcrest Park improved with a playground structure. All of these new houses are being constructed in the area and the one thing the neighborhood really lacks is a well-loved park. I've noticed more and more children in the area as these families move in and a playground structure in that park would be shown a lot of love by these neighborhood kids. It could probably also use some trees as part of the park that could provide some shade in the coming years. I think in general the southern and south-eastern part of Providence could use more neighborhood parks. We were very surprised when we were looking at moving to the neighborhood that there weren't more nearby parks. There seem to be lots more in the other parts of Providence, so we're really hoping that we'll see some more in our part of town. In general we'd be happy to pay a bit more in taxes to really spruce up the offerings of parks.	9/8/2020 9:48 AM
75	Thank you for gathering our feedback!	9/7/2020 9:34 PM
76	Find a way to stop the erosion at Von Baer disc golf. Create new disc golf courses. Create a different golf course. Create an Outdoor CrossFit park.	9/7/2020 7:08 PM
77	More pickleball, trails, and sidewalks	9/7/2020 7:55 AM
78	The south bench access from 100 east to canyon road is DANGEROUS. WE NEED A CITY PLAN TO CONNECT WALKING AND BIKING BETWEEN THE LOWERS AREAS AND BENCH AREAS OF PROVIDENCE. A nature path/hiking/biking/fishing area would be very very nice.	9/6/2020 2:05 PM
79	Nope	9/6/2020 8:07 AM
80	I know you have a hard job to do. There is never enough funds to go around. I would like a transparent look at the recreational budget in our city. Why is it that we can have the best baseball fields in the valley and the worse splash pad? Growing up in this town, we would laugh at Millville and now it has superior facilities to Providence. Why? I would be happy to be contacted.	9/5/2020 4:03 PM
81	Some parks could use additional shade trees, benches, and tables. I would love for Meadow Ridge to have a bathroom!	9/5/2020 3:11 PM
82	coordinate with Logan and other surrounding cities	9/5/2020 2:32 PM
83	I would love to have the river going down in Von's park during the summer. It seems like it is dry most of the time.	9/5/2020 2:15 PM
84	I would love to see an actual walking trail maybe around a big soccer field with playground, like what Nibley has. Another BiG splash pad is needed badly. There needs to be way better communication with the sports program. The parks could definitely be better taken care of. We	9/5/2020 2:02 PM

Providence City Parks, Trails, and Recreation Survey

definitely need more playgrounds. I really appreciate the surveys and the interest in the council trying to improve things. It just needs to happen. Providence city is changing. More younger families are moving in and it needs to adjust for those families.

85	No comment...though I would love a basketball and horse recreation, I usually like a more quiet open space without all the sports	9/5/2020 10:38 AM
86	I'm new to the area, but the park & rec items we utilized the most were large multi-faceted parks. Also, a swimming and fitness center. Plus, we had several trail options, which we used. And the method of dispersing the information was through booklets with schedules mailed out quarterly. Loved all of that.	9/3/2020 10:35 AM
87	Thank you for having such wonderful baseball/softball diamonds!	9/3/2020 9:50 AM
88	Would love some water fun added to the splash pad. Maybe trees, and wading pool with slide, etc.	9/3/2020 9:28 AM
89	No, good job	9/3/2020 7:33 AM
90	The Von Baer trail is narrow at a part with a really steep dropoff. If that could be widened it would be more family friendly.	9/2/2020 10:03 PM
91	We live on the far west on Meadow Lane with a spring and fields behind us. We see many animals from foxes to deer to hawks going to the spring. Please don't let it be filled in and piped away. People live places like Providence because it's nice and there's space and less traffic for our kids to battle. I know building will happen but I also hope we can preserve and improve the things we value in where we live.	9/2/2020 9:15 PM
92	Don't let cows on the providence mountain bike trail	9/2/2020 8:59 PM
93	I lease a townhome next to Leonhardt park. My previous tenants complained about pickle ball noise when they moved out. I hear our HOA sent a letter to the city, and it does effect us.	9/2/2020 8:34 PM
94	I think Zollinger Park playground could use attention and more play structures. I think space to ride bikes on road shoulders is necessary. Well organized and thorough communication of all available spaces and programs would be helpful. A pool would be FANTASTIC!	9/2/2020 6:26 PM
95	I would like to see a regional park with open field space that can be used and or rented for other sports.	9/2/2020 6:14 PM
96	Clean the bike lanes, put a pedestrian light by the migrant Headstart, build sidewalks along busy streets so children are safe. 100 N, 100 W have sections of no sidewalk.	9/2/2020 6:12 PM
97	No	9/2/2020 6:06 PM
98	Upgrade restrooms at Zollinger Park. Better weed control at Brookside Park. Lighted pickleball courts	9/2/2020 5:45 PM
99	East Providence (Near Canyon and Grandview Dr.) NEED sidewalks and could benefit from better maintained community play areas. We would LOVE a splash pad up here as well. I know, for a fact, that a Providence City pool/aquatic center would be so frequented, utilized, and appreciated	9/2/2020 5:43 PM
100	I hike Von Baer all the time!! I love it so much. There are a few areas that have a lot of erosion that I'm always nervous crossing. The Cliffside should be reinforced for safety.	9/2/2020 5:31 PM
101	None. Thanks for preparing the survey to allow our input.	9/2/2020 4:44 PM
102	Consider putting a pickleball court in Meadow Ridge park. More trees in existing parks would be nice. How about some horseshoe pits?	9/2/2020 4:26 PM
103	Na	9/2/2020 2:04 PM
104	None. Keep on plugging. Thank you for your interest in keeping Providence a fine place to live.	9/2/2020 12:58 PM
105	In the city boundary I feel we have enough parks for all of the various activities that the city and surrounding area need. I feel the current parks are under utilized.	9/2/2020 12:29 PM
106	Please make city and neighborhood sidewalks a priority. Hillcrest park needs more than just grass. A rec center would be amazing! We would absolutely love an indoor pool.	9/2/2020 10:21 AM
107	We go to other cities to use pavilion facilities for large private events where participants bring	9/2/2020 10:16 AM

Providence City Parks, Trails, and Recreation Survey

their own tables and chairs. Providence has nice pavilions, but none without picnic tables that have attached benches and are not conducive to use as sales tables.

108	I would like to see the city sheds relocated west of town and have Von Baer Park improved and expanded.	9/2/2020 9:59 AM
109	NO	9/2/2020 9:17 AM
110	I find it hard to walk or ride bikes to parks, or anywhere, with my children due to so many people parking over sidewalks and drivers completely Ignoring pedestrians. The amount of times I have nearly been hit while on foot is astonishing. Providence is not a safe place for pedestrians.	9/2/2020 8:43 AM
111	See above about providence canyon and the target practice/shooting. There is often trash at these sites. It is loud and frightening to some	9/2/2020 8:42 AM
112	Develop land into recreation space on 300 East across from Providence South Stake Center	9/2/2020 8:28 AM
113	Providence is lagging behind other cities in the valley in available nice parks and trails. Glad to hear that these Vital community resources are more readily available to the residents of Providence. We all need own space and our kids need more than baseball fields. Better playgrounds spread throughout the community that make them more accessible to all. A recreation center would be beyond amazing.	9/2/2020 7:50 AM
114	Love to see lighting on pickleball courts. Also wish sprinklers would not water the tennis courts and that the trees could be trimmed around the tennis court lights at Zollinger and the Volleyball court at Braegger	9/2/2020 12:59 AM
115	I would love to see a trail that isn't very steep (runnable) that parallel's providence canyon trail but at a higher elevation, maybe 500ft higher or so that connects to the trail that goes above the waterfall.	9/1/2020 10:52 PM
116	We need a large regional recreation facility/park that does not involve baseball. Indoor facility/recreation center with a swimming pool would be nice. Turf fields for soccer/football/lacrosse or any other large field sport.	9/1/2020 9:42 PM
117	Hillcrest park only has grass, add a playground and splash pad	9/1/2020 9:24 PM
118	I would like to see the Providence Canyon Road better maintained for car travel And a better maintained walking trail there	9/1/2020 9:21 PM
119	More paved bike trails connecting different parts of the city	9/1/2020 9:18 PM
120	I am highly concerned about the rapid growth of town homes crammed extremely close together. This is going to cause problems in the future. We need to stop doing this in the Macy's area.	9/1/2020 9:13 PM
121	I'd love to see the trail at Vons park continue to Providence canyon. A trail connection to Logan River trail system. Trail along Black smith fork river. Bike path or bike lanes or sidewalks to the high school so kids could get there without driving.	9/1/2020 9:00 PM
122	It would really help if the roads were improved. The few roads that have been fixed are wonderful, but there are several roads that I frequent that are full of pot holes and bumps. They have been this way for a while. Also when you do add to the tops of roads, if you leave a lip it becomes dangerous for walkers, runners and bikers. I know many drivers get frustated with bikers, but it is hard to ride on the side of the road when there is debris there.	9/1/2020 8:55 PM
123	Keep dogs OUT!! Or give them their own park to crap in	9/1/2020 8:44 PM
124	i previously mentioned we need an 'outhouse' at Bragger park, and any park where young children meet.	9/1/2020 7:09 PM
125	N/a	9/1/2020 6:59 PM
126	Please continue adding new attractive parks and amenities.	9/1/2020 6:16 PM
127	All new developments should include green space and trails	9/1/2020 6:09 PM
128	Thanks for all the work	9/1/2020 5:49 PM
129	Pickleball is getting very popular and I'd like to see more courts somewhere. Splash pads	9/1/2020 5:34 PM

Providence City Parks, Trails, and Recreation Survey

other places have so many more features now days. Ours is outdated.

130	Jay's well park needs improvement, watering, trees, small playground. Trail around zollinger park or other large park.	9/1/2020 5:18 PM
131	I would like to see the parks and programs we have continue to be maintained. I would like to be able to reserve pavilion areas in all our parks. I would NOT like to see expensive city sponsored organized sports. We have too many other needs at this time.	9/1/2020 5:07 PM
132	Na	9/1/2020 4:57 PM
133	There is much more to community than baseball. Alma Leonhardt park for example as potential with the courts and playground, but the grass open area is poorly kept and needs attention and trees! Shade is essential to nice parks. No surprise, Zollinger and Von's are favorites. Brookside park is just about offensive to citizens to be classified as a park.	9/1/2020 4:56 PM
134	Way to many small parks that don't get used. Put the money where the use is. Bigger complex to host tournaments and other venues. Turf Fields for less maintenance and longer seasons.	9/1/2020 4:44 PM
135	Every new development is lacking open space and Outdoor recreation development. With everyone building and moving to providence make the developers provide open space areas. We as citizens should not be paying for this. It should be a zoning. Requirement and enforced and maintained by the city.	9/1/2020 4:38 PM
136	It is hard to go up Providence canyon and walk the trail when there are guns shooting along the trail. I like guns and use them but it makes me nervous knowing if the people shooting are obeying safety rules shooting around the trails.	9/1/2020 4:28 PM
137	Start using social media. Reach out and make Providence a community not just a city that the mayor and city council thinks it should be.	9/1/2020 4:15 PM
138	Add additional pickle ball courts as the ones available are always full. Add lighting for summer months.	9/1/2020 4:11 PM
139	Thank you for taking the initiative to address this important and needed area - it is worth devoting time and resources.	9/1/2020 4:07 PM
140	Na	9/1/2020 4:07 PM
141	I am glad you are starting to think about this and wish it would have happened 15 years ago. We live in Brookside and one reason we bought here was because we were told a trail would be put in all along spring creek. Needless to say those were hollow words and now it's too late. Trails and parks are such an asset to the community I feel it should be top priority. It increases the value of living in a certain place. Trails throughout the city that connect parks together and connect communities to the parks would be huge for us. I feel we are lacking in large open spaces that aren't specified for something else - like baseball or soccer. A park to go and throw a frisbee and have a picnic. Actually a nice park with a frisbee golf would be awesome. We find the one at Vons Park not really user friendly. We love the pickleball courts but find it hard to actually use one because they are so popular. We just want more - more of everything that is not sport specific that a wide variety of people can use.	9/1/2020 4:04 PM
142	We don't believe Providence needs to develop a lot of extras. We like Providence because it feels rural and quaint. We don't want to see Providence become a big city. We can drive into Logan or drive to Salt Lake very easily for larger venues and recreational events.	9/1/2020 4:02 PM
143	Restrooms, open most of year.. especially Winter months because we can't play in the yard as often, dog walking areas because my dog also can't play in his yard during Winter.	9/1/2020 4:01 PM
144	N/A	9/1/2020 4:00 PM
145	More Pickleball courts. More picnic indoor and outdoor rental facilities. More courts with lights for evening.	9/1/2020 3:50 PM

147	Love to see better lacrosse fields and an ice rink on the south end of the valley.	9/1/2020 3:49 PM
148	Need more trees and shade at Alma Leonhardt Park. Major weed problem of thistles at Zollingers and Alma Leonhardt Parks. They make it really painful to sit and enjoy the grass or	9/1/2020 3:44 PM

Providence City Parks, Trails, and Recreation Survey

	for kids to be barefoot.	
149	I dont understand why we put in a park, planted grass, then just let it die. Seems poorly thought out.	9/1/2020 3:44 PM
150	Sidewalk on 200 East. So dangerous for my kids walking to school	9/1/2020 3:41 PM
151	Open space is always needed. Bike paths need to be separate from roads.	9/1/2020 3:39 PM
152	I would love to see the volleyball court at meadow view park be turned into a pickleball court. Right now it is not well maintained and seems like a cat litter box that doesn't get used for volleyball.	9/1/2020 3:38 PM
153	A better playground at zollinger park	9/1/2020 3:35 PM
154	Replace the street of 100 East between Center Street and 100 north	9/1/2020 3:31 PM
155	We really like the parks we have in Providence (and surrounding towns). Von Baer is awesome. Some of our favorites outside of Providence are Merlin Olsen, Denzil Steward, and Millville City. We play at Leonhardt Park every day. It is getting more more crowded and would like to see the city land next to it turned into green space or natural area. The pickle ball courts are very loud and disturbing to residents in the townhomes, Providence Place apartments, and duplex houses nearby. Stopping the gun range in the canyon would be great, too.	9/1/2020 2:36 PM
156	Honestly I very rarely see a handful of Providence parks actually being used as they honestly don't have any draw to them and seem to be a waste of the tax payers money to be kept up	9/1/2020 1:16 PM
157	No new pickleball courts in Leonhardt Park, no lights in existing courts, and please add sound fencing to existing courts.	9/1/2020 1:12 PM
158	No new pickleball courts in Leonhardt Park and no lights. Also. please add sound fencing to existing courts.	9/1/2020 1:00 PM
159	No additional pickle ball courts at leonhardt park. Build sound barriers on existing courts. Make the open space beside the pickle ball courts at nature path.	9/1/2020 12:34 PM
160	I think the city has more then enough parks and trails. No one in town uses what we have because I would rather stay in my air conditioning.	8/31/2020 1:15 PM
161	Really need a walking and biking trail up s 100 e and canyon road to the canyon	8/29/2020 7:40 PM
162	Providence city has the best parks in the Cache Valley	8/28/2020 8:55 AM
163	N/A	8/27/2020 7:21 PM
164	I think there should be paved trails throughout the city, with signage that no motorized vehicles are allowed.	8/27/2020 6:37 PM
165	I think a trail system that could be used for walking, running, biking would be a huge asset to the city. It would be nice along a waterway if possible or connecting a few of the larger parks. Also letting the public know where the parks are and amenities at these parks. Playgrounds would be nice to have and parking and accessibility to these spaces. I think I'm newer developed areas the city should look at putting in trail systems.	8/27/2020 4:47 PM
166	The north bench could use some park space	8/27/2020 4:46 PM
167	I worry that existing public trails will be developed and removed through secret deals and quiet "public" meetings, ie Bonneville Shoreline trail. I also don't feel safe or relaxed in Providence canyon with all the shooting.	8/27/2020 4:32 PM
168	We use Leonhardt park daily. The pickle ball courts are enjoyable but also a noise nuisance to the Creekside townhomes, new townhomes, and Providence Place apartments. We would love to see sound mitigating fencing installed around the courts as is done elsewhere in the nation. There is vacant land adjacent to Leonhardt park that we would love to see used as additional green/nature space.	8/18/2020 8:25 PM

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

Trail from Prov Canyon to South Syncline would be awesome. Also, let's don't forget about access points to the deer fence trail as the area gets more developed.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

This survey is a waste of city funds and time. Only special interest groups replied to the survey. If the city council, mayor and staff cant make unbiased decisions to lead the city into the future, they need to be replaced.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

Great considerations for future park improvement, but I feel that the trails plan is still a bit lacking for the public interest claimed for improved trails and pathways. One thing I enjoyed as a previous resident of Smithfield City was their attempt to connect parks throughout the city with a single route of travel along many pre-existing sidewalks and some improved pathways to assist residents in reaching and exploring multiple parks. Signs suggesting the route were also posted.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

Other than Von's Park (which has no playgrounds), the north and east sections of Providence are not in any park's radius. There should be a good community park planned for that region (and there is much undeveloped land to choose from).

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

More park and open space is always great for the community. A large (maybe 8 courts) pickleball complex in one of the parks would be a great addition. Courts are always full and the sport is growing very quickly.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

I would like to see better plans for parks in the eastern and northeastern part of the city. Right now the main coverage of that area is from Von's park which is nice for the trails. But in particular there aren't any playgrounds that are close to that area, especially the northeastern part of the city.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

I would definitely recommend considering the relocation of the Bonneville trail out of the new Little Baldy Subdivision. Relocating the trail to the east would give a better view of the valley, a better hiking/biking experience, and give a better living experience for the new residents of Little Baldy.

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

Thanks for doing this work. It is important.

- 1) The key findings are too vague. Item 3 especially seems to cover everything imaginable.
- 2) I'm glad to see green space prioritized. Continued development is reducing what's left, and green space is the most serves the largest population (kids, young, adults, and older adults). Likewise, I am glad to see trails emphasized as it also serves a large segment of the population.
- 3) I see many comments wanting a pool, pump track, skating park, etc. These seem very specialized and costly - serving a very small segment of the population. With options available in nearby cities, I hope Providence does not pursue these.
- 4) With that in mind, I would like to see a solid plan coming out answering: How many swimmers/pumpers/boarders do we have? How big a facility is needed to meet that demand? What is the capital cost? What is the operational cost? What makes a good location, e.g., in residential, in commercial, etc? What problems should we anticipate? Etc. The current plan is extremely light on such details. In fact, the current plan suggests we "explore" such amenities. This committee should be the one exploring it!
- 5) I see there is demand for pickle ball and that pickle ball is a noise nuisance. We should never add amenities that negatively affect people. The plan should identify solutions for the current problem and solutions to avoid future problems. Is it location? Do they have to be indoor? Etc.
- 6) The shooting in Providence Canyon will end in tragedy. It's only a matter of time. This should be highest priority!
- 7) I see a comment about a dog park, but no specifics about what makes a good dog park, what locations make good parks (surely not neighborhood parks), what risks does it bring, how expensive is it, etc.
- 8) The parks inventory you did is great.
- 9) There seem to be no economical or liability considerations making the plan almost useless. Maybe this comes later?
- 10) In general, it is an interesting read, but seems to have very few actionable details. As the city council turns over in the next few cycles, I imagine details will be lost and this won't serve as a master plan. We will return to a haphazard development style. An enumerated list of actions, costs, liabilities, desirable locations, etc. is what we need!
- 11) Thinking more about it ... it looks like we are trying to be everything to everybody. A pool for example: we should just come out and say, "We looked at this, but Providence does not have the demand to warrant spending X dollars in capital and Y dollars in annual opex. Sorry. We hope you enjoy the Logan pool."

Thanks!

Q1

What comments do you have on the City's new draft Parks, Trails, and Recreation Master Plan?

We need to cut taxes, not find ways to spend more money. I think that it would be much better to use our resources on maintaining the parks and trails we have than to make more.

Just remember where you are getting your money and resources. Spend wisely. Try to cut taxes.

07 | APPENDIX B: SOUND ATTENUATION

To: Providence City Council
Ryan Snow (City Manager)
Skarlet Bankhead (City Administrator)
Kathleen Alder (Planning Commission)
MHTN Architects

From: Matt Harris

Date: December 15, 2020

Subject: Item No. 2 Budget Adjustments – Sound Mitigation for Pickleball Courts

The Providence City Parks, Trails, and Recreation Steering Committee led by MHTN Architects has identified sound mitigation around the pickleball courts in Leonhardt Park as high priority.

Due to the loud, impulsive sound of a plastic ball hitting a wooden paddle at high speed, professionals recommend that pickleball courts be placed no closer than several hundred feet from residential areas and such that direction of play does not point to a residential area. The Providence courts are 30 feet from homes and directed at them. The resulting noise is a nuisance to the homeowners and violates the city code as described in Chapter 4-9.

Throughout the country, courts without proper mitigation have resulted in lawsuits, settlements, injunctions, restriction of play, and court closures. More than a dozen such cases were documented in a letter to the City from Creekside Townhomes HOA in August.

With the pickleball season about five months away, it is important mitigation efforts start soon. One possible path forward is to develop a professional plan and install acoustical fencing along the northern half of the courts. Steps and cost estimates for 2021 are below.

1. Develop a noise abatement plan with S&W Acoustics.
 - a. \$2,000
2. Increase existing fence height from 6 feet to 12 feet and ensure wind capacity.
 - a. 188 ft of fencing
 - b. Unknown cost (but estimated at \$3,000)
3. Purchase 12-foot tall acoustical fencing from Acoustiblok.
 - a. $\$516 / 6 \text{ ft} * 188 \text{ ft} = \$16,168$
 - b. 15% shipping and tax = \$2,425
 - c. Total = \$18,593
4. City workers hang fencing.
 - a. 2-3 person crew working for 2 days
 - b. Unknown cost (but estimated at \$2,000)

The total estimated cost is \$25,593. This fencing is endorsed by the US Pickleball Association and has been used to reduce noise from nuisance levels to barely audible levels. S&W has seen this plan and think it is reasonable, however, they admit it is not perfect. It may be worthwhile consulting with specialists such as S&W Acoustics. Contact information for both companies is below. Additional data are provided in the appendices.

S&W Acoustics: Lance Willis, 520-623-6003, lance.willis@swanc.net

Acoustiblok: Charles O'Meara, 813-980-1400 x3202, comeara@acoutiblok.com

LW

Matt,

This is a small site for four pickleball courts. If they had put the courts farther back from you toward the middle of the site it might be more workable, but there isn't much buffer distance even with a wall system.

Acoustifence and other mass loaded vinyl materials can be effective for pickleball abatement, but be sure the fencing you are attaching it to can take the wind load. MLV is very reflective so if they also install it on the fence opposite of you the reflections back and forth will greatly degrade its acoustical performance. If the people to the south are complaining too you'll likely need a free standing wall that you can attach sound absorbing panels to.

Six feet in height with respect to the playing surface is generally not enough for an effective sound wall. The wall has to block the line of sight to the players on the courts to be effective. Given that your home is two story, a sound wall may need to be 10 to 12 feet high to shield the upper floor with the courts as close as they are.

We have acoustical data for pickleball and can create a noise abatement plan for the courts that will improve the situation, but probably not meet our normal design goals due to the close proximity of the courts. A site visit won't be necessary. We can build an acoustical model of the site based on the site plan. This shouldn't exceed \$2,000 for these pickleball courts.

On 12/14/20 11:02 AM, Matthew Harris wrote:

Hi Lance,

Thanks for responding. Here is a link to Google Maps:

<https://www.google.com/maps/place/Alma+Leonhardt+Park/@41.7127507,-111.8267473,149m/data=!3m1!1e3!4m5!3m4!1s0x87547e4f264211e7:0xf2e5e5cde38ec697!8m2!3d41.7124324!4d-111.826117>

You'll see a set of four pickle ball courts and townhomes to the north. For scale, the northern edge of the courts measures about 68 feet. The distance between the north edge of the courts and the backyard fences is about 30 feet. The grass area between the homes and courts is sloping upward so that the courts are about 2 feet higher than the home levels. The backyard fences are 6 ft vinyl. The pickle ball fences are 6 ft chain link. Currently the sound easily penetrates into all homes in the row.

After searching online, I see there is a company Acoustiblok that provides acoustical fencing. Maybe raising the chain fence to 12 feet and hanging this along the northern half in a U-shape would help? All in, I estimate this to be about \$18,000.

Thanks again for taking a look. If you think a site visit is necessary, I can let the city know your rate and see if it makes it into the 2021 budget.

Matt

Why Are Your Pickleball Courts Receiving Complaints from Neighbors?

Lance Willis, S&W Acoustics and Noise Control, 2018

Executive Summary

- S&W Acoustics and Noise Control provides planning, mitigation, and abatement services.
- We recommend that pickleball courts not be located within 500 feet of a residential area.
- We recommend abatement treatments for courts located within residential areas.

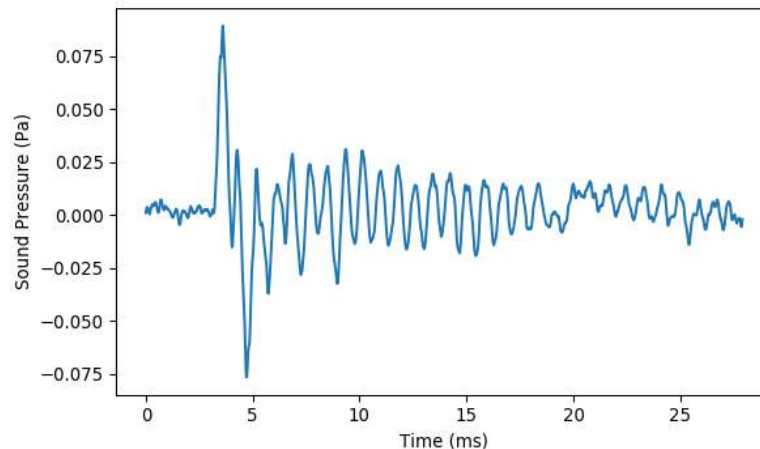

Introduction

Pickleball is a game played with a paddle and ball on a converted tennis court or dedicated asphalt pad. It has become very popular in retirement resort communities and other recreation centers. Unfortunately, some developers of pickleball courts have not adequately addressed the sound produced by the impact of the hard paddle and ball which creates a sharp pop. This has led to controversy between facility owners and neighbors when new pickleball courts are planned.

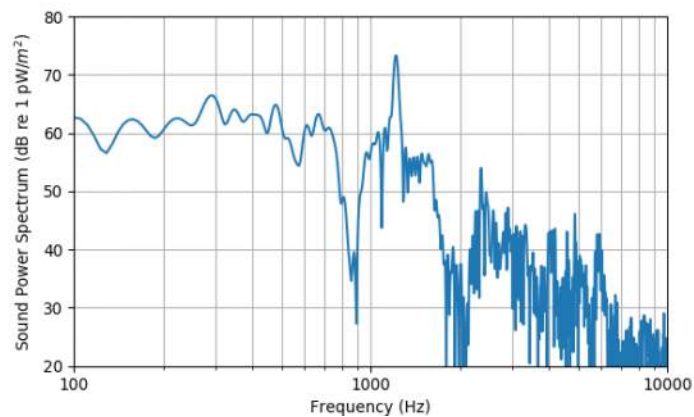

Here in Arizona and elsewhere we have planned and mitigated many of these sites. We have had the opportunity to work with both pickleball clubs and home-owners associations. In this post we will outline the process we have developed to evaluate the noise impact of pickleball courts and to enable pickleball to coexist with the surrounding community.

Characteristics of Pickleball Sound

The sound produced by the impact between a pickleball and paddle is characterized by a sudden onset and brief duration, typically on the order of two milliseconds for the direct path sound. Figure 1 shows a time trace of a pickleball paddle impact measured near Phoenix, Arizona. The main part of the direct sound impulse can be seen to be less than two milliseconds followed a rapid decay and some later reverberant arrivals.

The spectral content of the paddle impact is narrowband with a center frequency typically between 1,000 and 2,000 Hertz (see Figure 2). Although it does not meet most guidelines for tonal prominence such as Annex C of ANSI S12.9 Part 4 or ANSI S1.13, it does impart a vague sensation of pitch similar to a musical wood block percussion instrument. The radiation pattern of the paddle is more or less a dipole, i.e. the sound from the front and back of the paddle is of opposite polarity and cancels itself in the plane of the paddle. Therefore, orienting the courts so that the direction of play faces away from noise sensitive areas can provide some attenuation.

Measuring Pickleball Sound

Due to the short duration of the impact, averaging sound pressure level metrics such as equivalent level (L_{eq}) and even maximum fast exponential time weighted level (L_{max}) fail to accurately represent the perceived loudness of the impact. The fast exponential time weighting filter is a first order lowpass filter with a 125 millisecond time constant applied to the square of the acoustic pressure waveform. If a tone burst is applied to the squaring circuit and filter, after two milliseconds the filter output will only rise to a level that is 18 dB lower than the root-mean-square or equivalent level of the input signal. Because the short impulse is being significantly attenuated by the averaging in the sound level meter, in practice it is in general not possible to distinguish pickleball paddle impacts from the background noise when measuring L_{eq} or L_{max} using an integrating sound level meter even though the paddle impacts may be identified by a listener as the primary sound source.

The paddle impact sound pressure level is better represented by the sound exposure level (SEL). This involves windowing the measured sound pressure in time to include only the paddle impact and reflections from nearby surfaces. The equivalent sound pressure level of the windowed impact is then normalized to the length of the window giving a representation of the energy in the impact alone. Appropriate adjustments for impulsive sounds can then be applied to the impacts as described next. Most acoustical standards for sound pressure levels with regard to compatible land use provide adjustment factors for different types of sound, e.g. impulsive, tonal, time of day, etc. Each of these categories of sound produces different levels of community impact and annoyance due to their temporal or spectral characteristics in comparison to a broadband sound that does not vary in level or frequency content with time. The purpose of the adjustment factors is to normalize these types of sound to a neutral broadband sound pressure level so that they can be reasonably compared to a defined sound pressure level limit or the background noise level.

ANSI S12.9 Part 4 gives criteria for assigning adjustment factors to a variety of impulsive sounds. Sounds produced by many impact processes are classified as ‘highly impulsive’ and assigned a 12 dB adjustment. Although not specifically enumerated in definition 3.4.1 of the standard, experience has shown that pickleball paddle impacts should be adjusted as highly impulsive sounds in order to set appropriate performance goals for abatement treatments. Inadequate abatement treatment may lead to ongoing complaints, strained relations with neighbors, legal action, the need for continued involvement on the part of authorities, additional retrofitting, and possibly demolition costs to improve the abatement later.

Site Planning Considerations for Pickleball

Based on our experience working with pickleball facilities, courts located within 350 feet of residential structures often require abatement. Courts located within 150 feet require careful abatement design to avoid complaints.

Abatement treatments usually consist of freestanding walls strategically placed to shield noise sensitive areas from the pickleball courts. To be effective, the walls must block the line of sight to the paddles during play. On level terrain this means a minimum wall height of eight feet above the playing surface. The cost of the walls can be reduced by lowering the courts into the ground and using the excess soil to build a berm around the courts. Placing the wall on top of the berm will lower the required height of the wall itself, reducing construction costs. The wall may be masonry or a solid fence system having sufficient mass for effective sound insulation.

For pickleball courts located in the middle of a residential area with houses on more than two sides, screen walls may be required on opposite sides of the courts. When these walls are parallel to each other, reflections between them can degrade the performance of the walls significantly. In this case, sound absorbing panels may need to be installed on one or both walls to stop multiple reflections from amplifying the sound going over the walls. This can almost double the cost of the walls and may make the site financially unfeasible.

Court orientation also plays a role. More sound propagates in the direction of play than to the sides of the pickleball court. By positioning the courts so that the line of the net runs through the most noise sensitive area, a noticeable reduction in sound pressure level can be achieved at this location.

When to Hire an Acoustical Consultant

We recommend that pickleball courts to be located within 500 to 600 feet of residential properties or other noise sensitive areas be reviewed by an acoustical engineer during the site selection phase in order to avoid choosing a site that is expensive to mitigate, results in unexpected limitations on court use, or leads to ongoing disputes with neighbors. For sites that have a water feature or golf course as part of the intervening ground between the courts and homes or for sites located in a valley, it may be necessary to consider abatement at buffer distances greater than 500 to 600 feet due to additional refraction effects created in these situations.

The abatement plan for the site should be prepared by an acoustical engineer with experience in assessing the community impact of short duration impulsive sounds such as those produced by pickleball paddle impacts. As can be seen from procedure outlined above, properly measuring sound from pickleball courts is not a simple matter of setting up a sound level meter and logging an equivalent sound pressure level (L_{eq}). The short duration impulses produced by the paddle impacts require a detailed process of applying a metric that can accurately represent the community noise impact of the pickleball courts.

If you are in the process of planning pickleball for your site, consulting an acoustician can reveal unforeseen issues with the selected courts site or the site plan before investing tens or hundreds of thousands of dollars in design and construction. Preparing a formal abatement plan can also ease concerns of neighbors about the community noise impact of the courts.

If you would like us to help plan or mitigate your pickleball courts, [contacts us](#) today for more information.

Matt,

I hope we can help you with your new Pickleball courts before the torches and pitchforks come out from those of you that don't want to hear people playing a little too much. As mentioned, I am sending you out my comprehensive Tennis/Pickleball inquiry package with much of the information that you want to know, including two noise studies that showcase how well our material performs (**noise is measured on an exponential/logarithmic scale as opposed to a linear one, so every 10dB in noise reduction is perceived as half as loud, and our material performed even better than that. But since you teach aerospace engineering I really didn't need to leave that in** 😊). All weather Acoustifence Pickleball noise curtains have been installed on public and private courts across North America, from the heat of the sunbelt to the Canadian cold. I mentioned that I recently sold some curtains to a city court in Cedar Hills, and they like the fact that they would hold up well in during four seasons. I realize that they are close to 100 miles from you, but if you wanted to see the curtains in place they have them up.

Besides the information in the email body, I also attached some flyers about our product and why our material is uniquely suited to deal with Pickleball noise. As you read through the email, there is a detailed description of the curtains followed by pricing on the different colors and sizes, so you can get a fairly accurate idea as to the cost of material for your project (take the length of your fence and divide it by 6, and that will give you an approximate idea as to how many panels your project will require. Then multiply the number of curtains by the cost of the curtain). Finally, at the end of this email are three Pickleball references that installed our curtains and you are welcome to contact them.

Attachments

- Acoustifence benefits and specifications
- Acoustifence curtains in black installed at a Pickleball court in a 55+ community in central Florida
- Installation suggestions
- Stunning aerial drone shot of Toscana Country Club's new Pickleball courts with black Acoustifence curtains
- eFlyer showing the City of Carlsbad's Poinsettia Park new Pickleball courts with Pickleball Green Acoustifence curtains.

Installation

As for installation, another nice feature of our material is that it does not require skilled labor to put up. The municipalities that I deal with either have maintenance people, grounds keepers, handymen or fence contractors put our material up. I have been told

that a 2-3-man crew can put up three 10-foot curtains in one hour, which translates to over one hundred linear feet of curtains installed in a single workday. If you would like to speak to one of the cities that has installed our material, I would be happy to provide you with their contact information. I also have installation suggestions that I can send to the crew when they are ready to get started.

What is Acoustifence

Acoustifence is a unique 1/8th inch, 6' x 30' (3mm x 1.83m x 9.14m) heavy mineral filled visco-elastic acoustical material. It is unique and unlike any other vinyl or rubber barrier material that is currently on the market. It is made in the U. S. A. (from all USA materials) and, unlike fences or shrubs, this material does extraordinarily well in not only blocking direct sound, but also has a tendency to reduce sound from reflecting off it. This occurs as the flexible heavy mass Acoustiblok material actually vibrates from sound, transforming some of it into inaudible trace amounts of heat (sheet lead works in the same manner). Considering that the ideal sound reducing construction is heavy, limp and air tight, the 1.1 lb. per sq. ft. flexible Acoustifence can be an excellent first step in reducing your noise level.

Acoustifence® Benefits and Specifications

- STC (Sound Transmission Class) with a value of 28/ OITC 22
- The material was lab tested and performance certified by an independent lab, Riverbank Acoustic Laboratories (see attachment)
- Barium Free
- UV Tolerant
- Paintable (acrylic latex vinyl based)
- Hydrophobic (impervious to water)
- Totally non-mold (rated 10 of 10)
- No fungal or algal growth and no visible disfigurement, per ASTM D3273 and ASTM D3274 (rating = 10)
- Tensile strength min. 510 PSI
- Besides having a High UV resistance, Acoustifence material has a High Heat tolerance: 200 degrees F (93 ° C) for 7 day
- Safe for outdoor use in cold climates too. It since it doesn't freeze until -40 ° F (-40 ° C) and is not affected by freeze and thaw cycles
- Less than 1% shrink with no deformation
- Made from over 90% recycled or organic material
- 100% recyclable
- Vermin proof
- Easily washed
- STC 28 independent lab certified
- **Made in U.S.A. from all U.S. material**

Acoustiblok Curtains

Designed for use on tennis/ Pickleball courts as well as many other outdoor sport courts, Acoustifence vertical curtains are 6' wide and can be made as tall as your fence requires. Each curtain is made of our Industrial, UV resistant Acoustifence material. The curtains have a 2" reinforcement band on 3 edges— on the top edge (to support the weight), on both of the sides (to help hold the material in place against the fence during light wind

gusts). You can also get the Industrial Reinforced version (**IR**) with reinforcement along the bottom edge, so all 4 edges are reinforced for areas that have more wind (which is what we recommend for municipal courts).

Curtains below are priced individually and complete with rows of grommets installed 1.0" in from the edges, along with a matching quantity of 14" stainless steel wire ties (each tie is load rated to 250 pounds). For installation you overlap the curtains by 2" and run the steel wire ties through the overlapped grommets and attach the curtains to the fence. This will allow you to securely attach each curtain panel together to create a gap-free run of Acoustifence and maintain the noise abatement integrity for the entire length of the barrier. The curtains shown below are standard heights that we get requests for. But since we custom make all curtains to order, we can make them any specific height that you require.

Acoustifence Curtain Pricing

- Curtain panels 6' wide – Black (all prices shown are for material only. Shipping is FOB Tampa)

- 8' high - \$316 (IR - Industrial Reinforced curtains \$344)
- 9' high - \$355 (IR - Industrial Reinforced curtains \$387)
- 10' high - \$395 (IR - Industrial Reinforced curtains \$430)
- 12' high - \$516 (IR only - additional height curtain requires additional reinforcement)

Curtain panels 6' wide – Pickleball Green (all prices shown are for material only. Shipping is FOB Tampa)

- 8' high - \$332 (IR - Industrial Reinforced curtains \$360)
- 9' high - \$373 (IR - Industrial Reinforced curtains \$405)
- 10' high - \$415 (IR - Industrial Reinforced curtains \$450)
- 12' high - \$540 (IR only - additional height curtain requires additional reinforcement)

When it comes to noise mitigation, the performance of all of the material is identical. The difference is in how well it would hold up in your environment. All our Acoustifence is made from recycled material, is 100% recyclable and is entirely **MADE IN THE USA**.

Acoustifence Reduces Pickleball Court Noise by More Than 50 Percent USA Pickleball Association Test Shows

Posted by [Thomas Wiseman](#) on Mon, Apr 8, 2013 @ 01:38 PM

YUMA, Ariz., April 3, 2013 - [Acoustifence](#) soundproofing material placed around a pickleball court reduced noise by 10-12 decibels in a sound meter test conducted by [USA Pickleball Association](#) president Bill Booth on April 17, 2012 at the [Country Roads RV Village](#) pickleball courts in Yuma, Ariz. This represents more than a 50 percent reduction in sound as perceived by the human ear the report concludes.

Even as one of the fastest-growing sports in the United States continues to gain new participants and fans every day, pickleball is disturbing some neighbors and communities who don't want the courts around because paddle noise has become a nuisance issue for some people living close to the courts.

In addition to being one of the fastest-growing sports in the United States today, pickleball has spread overseas into Canada, Singapore, India, Pakistan and other places. According to the USA Pickleball Association, the sport boasts an estimated 100,000 adult players in the United States now, more than triple the number in 2003. There are about 2,500 public courts, versus just 150 in 2003.

For decades, the game of pickleball was little known outside the Pacific Northwest United States. Since its inception in 1965 as a backyard pastime, it is now an organized sport represented by national and international governing bodies. While people ages 6 to 70-plus play pickleball and even compete in local, regional and national tournaments, the main driver of the recent growth is the 55-plus demographic who have taken a liking to the sport. They view it as a way to exercise, burn calories, socialize, and get outdoors. More and more pickleball courts are being built in community parks and especially into 55-plus housing developments. Some communities are converting sporadically used tennis courts into pickleball courts or painting additional lines on tennis courts so pickleball can also be played. Pickleball is played on a smaller court size than tennis but has a similar court design.

More courts, participants, tournaments, and attention to the game has brought on more public complaints and even noise or nuisance related lawsuits attempting to stop play on existing courts or stop construction of new courts.

Racquet and paddle sports like tennis, badminton, and table tennis (ping pong) each produce a unique sound when the racquet or paddle hits the ball. In pickleball, there is a "ping, ping" sound made when the paddle hits the ball because the sport uses medium-sized, solid faced wooden, composite or graphite paddles and a hard plastic perforated ball (resembles a Wiffle ball) that is larger, stiffer and less resistant than a tennis ball. The noise generated by the game is louder, sharper and at a higher pitch than tennis which generates a deeper "thwack" sound that registers far lower on a sound meter.

Pickleball paddle noise is in a sound classification called impact noise – noise that occurs when an object collides with another object. It is a high frequency noise that is at a frequency that our ears are most attuned to. Through Acoustiblok's analysis and modeling efforts of various pickleball noise related projects, the company says there's one limiting band of approximately 1.25 KHz (1250 Hz) that spikes when the paddle hits the ball. Acoustifence blocks much of the noise and reduces it to below a nuisance level for nearby neighbors, becoming barely perceptible among other outdoor background noises such as automobile, airplane, human, and machine noise.

You can hear the pickleball paddle noise for yourself by watching the following YouTube video of a tournament match at: <http://www.youtube.com/watch?v=pdVMcIDQJIA> [[http://www.youtube.com/watch?v=pdVMcIDQJIA_title_USA Pickleball Association nationals competition](http://www.youtube.com/watch?v=pdVMcIDQJIA_title_USA_Pickleball_Association_nationals_competition)]

Unlike often tried natural sound barriers such as fences or shrubs, the Acoustifence material does extraordinarily well in not only blocking direct sound, but also has a tendency to reduce sound from reflecting off it. Acoustifence is a revolutionary heavy mineral

blocking direct sound, but also has a tendency to reduce sound from reflecting off it. Acoustifence is a revolutionary heavy mineral filled viscoelastic polymer sound deadening material which is only 3mm (1/8 inch) thick. It's made in the United States and compared to other soundproofing alternatives, is an economical way to reduce outdoor noise.

The ultraviolet (UV) tolerant Acoustifence is hung via grommets onto the top line of existing chain link, panel, security or support pole fencing systems. It comes in 6 X 30 foot-sheets and can be easily cut and shaped into custom sizes with a craft knife. On solid structure fence surfaces, Acoustifence can be installed by nailing, stapling or gluing. Acoustifence is one of the most effective first steps in reducing outdoor noise. The amount of noise Acoustifence reduces however is much related to other reflective structures in the area. More details on Acoustifence can be seen at: http://www.acoustiblok.com/acoustical_fence.php

Country Roads RV Resort is a 55-plus gated community which boasts 150 acres of lavish, mature landscaping and 1294 privately owned home sites. The Acoustifence testing was conducted by USA Pickleball Association president Bill Booth. Tests were made using a Sper Scientific Digital Datalogging Sound Meter (model 840013), a S-Type Composite Extreme Paddle, and New Dura Fast 40 outdoor balls. Tests were made with the tester attempting to hit the ball with maximum force for a worse-case scenario. A series of readings were taken both through the Acoustifence sound curtain and with no sound curtain. Readings were recorded with the meter at 50 feet from the point of impact. In the first case, the reading was even taken through the sound curtain next to a nearby home at a point 42 feet from the sound curtain. The paddle was 8 feet inside the court for a total of 50 feet. The second set of readings was recorded inside the court at a distance of 50 feet from the point of impact.

With no sound curtain, readings ranged from 64.2 – 71.8 decibels for an average of 68 decibels. Through the Acoustifence sound curtain, the meter readings were between 54.7 – 59.2 decibels for an average reading of 56.7 decibels. **The report concluded that an 11.3 decibel reduction in sound was achieved. This represents more than a 50 percent reduction in sound as perceived by the human ear by nearby homeowners.** That reduction in sound takes the pickleball noise from being annoying to someone to being just barely perceptible, the report conclusion stated. The report also recommended that the Acoustifence product be installed on the inside of the pickleball court if the fence posts are outside the court. The report went on to say that homeowners near the Country Roads RV Village pickleball courts who had the most complaints and lived closest to the courts reported a significant reduction in sound level from having the Acoustifence material up. He said that his wife often does not realize that they are playing on the court. At times, ambient noise significantly exceeded paddle noise.

Lahnie Johnson is president and founder of Acoustiblok, Inc., a NASA spinoff listed company in Tampa, Fla., that invented and manufactures the Acoustifence product.

"Acoustifence serves as a barrier and blocks high frequency sounds very well. The material actually flexes with certain frequencies. In the process of sound waves physically moving it, the product transforms sound wave energy into inaudible internal friction energy. It's Underwriters Laboratories listed and has attained an STC (Sound Transmission Class) of 28 decibels in independent laboratory tests," said Johnson.

"Like all our [products](#), Acoustifence is made in the USA with all USA materials. Besides the primary benefit of reduction in perceived levels, there are many reasons why Acoustifence is being used not only in the United States, but across the globe for many applications," he said.

"There are many reasons why Acoustifence is a good solution for pickleball noise. For homeowner associations and developers, Acoustifence easily attaches to existing fencing found around most existing pickleball courts and complexes and can be put up in a matter of hours with a few minor hand tools. It is easily configurable to add height and length so it can be used on fences of any size. The material is paintable to meet the needs of the environment," said an Acoustiblok sales associate who has worked with various pickleball related customers

"There are vinyl photographic coverings for the fence called Acoustiblok landscapes. Hundreds of different unbelievably realistic landscapes are available, from vines and flowers to even antique brick wall, or stone fence photographs. So real one of our customers drove right by their home forgetting they had it installed," he added.

"Acoustifence is also one of the best priced first response soundproofing solutions in the industry".

Melissa Wood is community association manager at Country Roads RV Village. In a related World Fence News article about pickleball and Acoustifence, she said, "I can attest that Acoustifence material is not difficult to install, can be easily blended into the aesthetics, particularly if you have existing wind screens." She added that Country Roads RV Village is located near Phoenix and other communities have seen the installation and have inquired about it.

Besides pickleball, Acoustifence is commonly used to quiet generator and motor noise at industrial sites, highway and construction related noise on bridges, mass transit rail line noise, shooting/gun range noise, and even dog kennel noise. It is also being used at college sports complexes and athletic parks and on private backyard residential fences to create a quieter and more peaceful environment.

"People are discovering that there are a lot of great uses for this modern day soundproofing product," Johnson said.

Johnson went on to say, "We're not just a soundproofing products company, we're a noise solutions company. Sometimes, prior to the sale of Acoustiblok's products, we perform computer-based sound propagation modeling when customers are unsure if Acoustiblok's materials will work in their specific application.

"We use advanced software called Cadna-A, a top acoustical software made by DataKustic used in the prediction of environmental outdoor noise. It calculates sounds through mediums and different barriers and terrains. We have used it for pickleball-related customers who all have a different set of circumstances associated with their noise. We also use DataKustic's Cadna-R software for prediction and presentation of inside noise in industrial facilities, rooms and workplaces."

"We use this acoustical modeling to say to the potential customer 'here's your noise level now without Acoustiblok's material and

"We use this additional modeling to say to the potential customer: here's your noise level now without Acoustiblok material and here's the noise level with our material based on the noise information we have available to us right now."

For more information about Acoustiblok Inc., or Acoustifence visit the Acoustiblok website (www.acoustiblok.com), send an Email to comeara@acoustiblok.com, or call 813-980-1400 ext. 3202 and ask for our Pickleball specialist, Charles O'Meara.

Finally, prepare to be amazed. This is a link to an excerpt from the **National Geographic Channel television show, Showdown of the Unbeatables**. We won the challenge by blocking the sound of the world's loudest train horn, a whopping 143 dB. But rather than watch a 30 minute show here is video clip of the box that we built with a loud guitar playing inside. The box is made with our namesake Acoustiblok barrier material, the basis for our Acoustifence (one layer of Acoustiblok in a wall assembly is more effective at blocking noise than 10 inches of poured concrete). <http://vimeo.com/93522717>

As questions come up, I am an email or phone call away. And if you would like to see samples, just let me know.

Product Description

Basic Use

AcoustiFence was originally developed by Acoustiblok, Inc. for noise isolation on offshore oil rigs, but has since proven successful in many other demanding outdoor settings, such as construction sites, commercial/industrial facilities, and residential communities.

AcoustiFence Noise Reducing Fences

AcoustiFence is a unique, heavy-mineral filled, barium free, viscoelastic acoustical material that is made in the U.S.A. Unlike fences or shrubs, this material does extraordinarily well in blocking direct sound, and a unique characteristic of the material sets it apart from other sound barriers when dealing with very low frequencies.

Sound Absorption Test Results

Benefits:

- Effectively reduces exterior noise
- Over 300 UL Classifications
- Easy to install
- Resistant to UV, dirt and water
- Resistant to corrosion, mold and mildew

Product Name

AcoustiFence® Noise Reducing Fences

AcoustiFence Noise Reducing Fences continued...

In frequencies of 50Hz and below, the heavy limp AcoustiFence material actually begins to vibrate from low frequency sound waves. In essence it is transforming these low frequency sound waves into mechanical movement and internal friction energy. Laboratory tests indicate that this transformation process inhibits these lower frequencies from penetrating AcoustiFence, reducing their level by over 60 percent relative to the human ear. In addition, AcoustiFence becomes an absorbent material in these frequencies with test results show an NRC (noise reduction coefficient) as high as 0.78 (with 1.00 being the max). As such it is clear that AcoustiFence not only reduces sound as a barrier, but also acts as an acoustical absorbent material in very low frequencies, as opposed to reflecting those frequencies back like most other barriers. It is worth noting that lead sheets (which are toxic) work in the same manner.

Green AcoustiFence has the same sound deadening properties and features as our original black AcoustiFence. In addition, this new version features advanced reinforced edging and stainless steel cable ties. Made and sourced in the USA, It comes in 6x30 foot sections and is one of the most effective first steps in reducing noise for industrial, commercial and residential projects.

Green AcoustiFence

One of Acoustiblok's most popular products, designed as an advanced sound barrier that easily attaches to most types of fencing, is now available in a new green shade that easily blends into the environment. This makes it ideal for landscaping projects, residential home use and any outdoor applications where blending into the natural foliage is a concern.

Product Name

AcoustiFence® Noise Reducing Fences

Sound Transmission Class (STC)

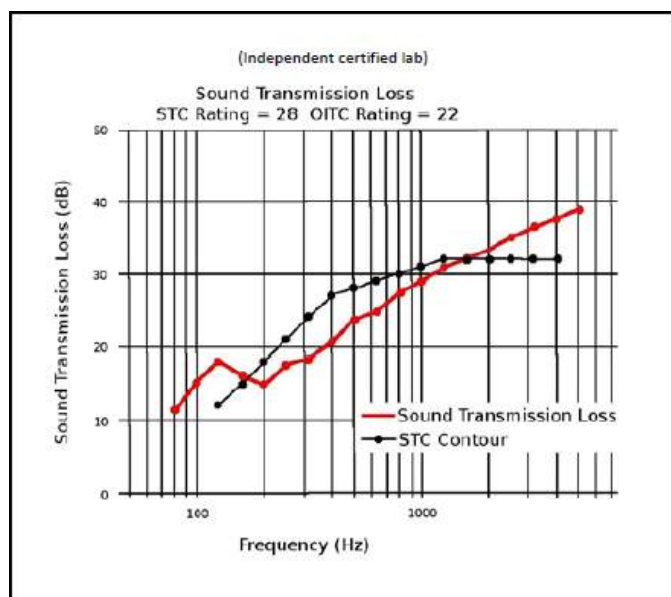

Sound Transmission Class (STC) is a single number that represents the sound blocking capacity of a partition such as a wall or ceiling.

STC numbers are often called out in architectural specifications, to assure that partitions will reduce noise levels adequately. For performance similar to laboratory test numbers, it is necessary to adhere closely to the construction materials and techniques used in the tested partition.

STC is calculated by comparing the actual sound loss measured when 18 test frequencies pass through a partition, with fixed values for each STC level. The highest STC curve that the measured sound loss numbers fit under, determines the STC rating of the partition.

STC calculations emphasize sound frequencies that match the human voice. A high STC partition will block the sound of human speech and block noise that interferes with human speech. To estimate high and low frequency performance, consult the Sound Transmission Loss graph included in STC test reports. Impact Insulation Class (IIC) measure transmitted impact noise and are specified for floor-ceiling assemblies only.

Acoustical test reports for numerous wall and floor/ceiling designs are available from Acoustiblok on request. All our test data is taken directly from independent 3rd party laboratories under NVLAP certification.

Sound Transmission Loss Test Results

Product Name

AcoustiFence® Noise Reducing Fences

Physical Properties

- Barium free
- Minimum STC 28 per ASTM E90-02 & ASTM E413-87
- Minimum sound attenuation 24 dBA @ 100Hz & 16dBA @ 40Hz
- Size - 6 ft.(1.83m) x 30 ft.(9.14m) x 0.125 in. (.3mm) – 180 ft² (16.83m²)
- Color - black or green
- High UV resistance
- Heat tolerance: 200°F (93°C) for 7 days, less than 1% shrinkage with no deformation.
- Freezes at -40°F (-40°C). Do not unroll or flex frozen material. Properties not affected by freeze/thaw cycles.
- No fungal or algal growth and no visible disfigurement, per ASTM D3273 and ASTM D3274 (rating=10)
- Tensile Strength - min. 365 PSI
- Weight per section: 185 lbs. (84Kg)

Material Specifications – Part # “Acoustifence 6x30 Industrial”

Acoustical Rating	STC 28 / OITC 22
Size	6 ft. (1.83m) x 30 ft. (9.14m) x 0.125 in. (.3mm) 180 ft ² (16.72m ²)
Weight	185 lbs. (84Kg)
Fastening	Black brass grommets every 6 in. (152mm) along top edge with four grommets spaced along the bottom edge. Commonly installed horizontally.
Color	Black
(This is an industrial product and minor surface blemishes are a possibility.)

ACOUSTIFENCE INSTALLATION SUGGESTIONS

ACOUSTIFENCE INDUSTRIAL AND INDUSTRIAL CURTAIN

READ ALL INSTRUCTIONS BEFORE INSTALLATION

INCLUDED MATERIALS:

AcoustiFence Industrial Fence by linear foot, stainless steel ties, installations instructions.

REQUIRED SAFETY EQUIPMENT:

Gloves and safety glasses

REQUIRED INSTALLATION EQUIPMENT:

For Reinforced Fence with Grommets on Chain Link Fence: stainless steel ties (supplied), 2 extension ladders (long enough to extend past the top of fence structure), pliers, metal cutting snips, shovel, utility knife.

For NON-Reinforced Without Grommets For a Wood or Other Solid Fence Structure: 2 extension ladders (long enough to extend past the top of fence structure), power drill with proper bits, fasteners, washers, shovel, wood strips for perimeter of fence, utility knife.

NUMBER OF PEOPLE:

2-3

TIME REQUIRED:

20-30 minutes per 30 ft of installation

CLEANING MATERIAL:

Rinse with a mild dish soap and water solution then completely rinse with water to gently clean fence after installation and periodical to keep fence clean.

Use "Goof off" products to easily remove sap, paint, oil, grease and other environmental blemishes.

CONTENTS

Recommendations	Page 2
Preparation	Page 3
Section 1: Chain link	Page 4
Section 2: Wood or other solid structure	Page 5
Legal Disclosure	Page 6

RECOMMENDATIONS

- **Prevailing winds** – Attach the Acoustifence material so that it lies against the chain link fence or other structure, facing the main direction of the wind for added security. In high wind environments, it is highly recommended that you employ extra reinforcement. I.e. adding a second chain link fence to create a sandwich type fit.
 - **Use only stainless steel ties if using grommets to secure (outdoor)** - Plastic and other ties may become brittle and break prematurely. When using stainless steel ties, band ALL ties loosely during installation unless otherwise instructed. After all ties are loosely applied, snug each tie with the same tension.
 - **Hot surfaces** - In some geographical areas of intense sun light, the black version of AcoustiFence may reach very high temperatures and should be painted with a white or other lightly tinted exterior acrylic latex paint to prevent serious burns from touching and to keep the material from sun fade. Do not use elastomeric paint.
 - **Nails or screws** – Using nails or screws alone to support the non-reinforced AcoustiFence will cause tears in the material. Always use washers to extend surface pressure around the head of the hardware, or sandwich the material between two surfaces to help to resolve this (recommended).
 - **Use of ladders** - If using extension ladders, follow all manufacturers warning and safety procedures. Do not place any part of the ladder
 - **Trimming ties** – Don't trim the ties until the entire curtain and all of the ties are secure. The ties may need to be snugged a little and you will need the tail of the tie to do so.
 - **Stapling** – Acoustifence can be stapled to a solid structure such as a wood fence or a wood frame. Limit air pressure to between 60 - 80 psi if using a pneumatic stapler. Using full psi will discharge the staple completely through the material. Always test the pressure of the stapler and staple in a non-conspicuous area before hanging the fence. Do not let the staple crown pierce the material.
 - **Structural requirements** - Consult a structural engineer for structural requirements as needed.
 - **Customized fence sections** – If application required a custom size fence, either horizontal or curtain style, grommet locations may differ from this installation suggestion guide. A drawing representation is available upon request.
-

PREPARATION

- **Relax material** – Unroll the material and allow it to relax before installation. DO NOT drag the AcoustiFence material as this will scratch or mar the surface. Place the material in direct sunlight or, if the weather is below 60°F, place it indoors at room temperature for several hours. Cold temperatures will reduce flexibility during installation. Do not allow material to crease or fold.
- **Clean area around fence structure** - Clean area where fence will be installed. Remove any foreign objects that might otherwise make it difficult to attach fence, i.e. old nails or screws, tree limbs, rocks, etc.
- **Base (footer) of fence** - After complete installation, the footer edge of the fence will need to be covered to seal all air gaps and to create an acoustical seal. Depending on the actual length of fence and in-field installation, the Acoustifence might have to be buried or a material built up to close all gaps.

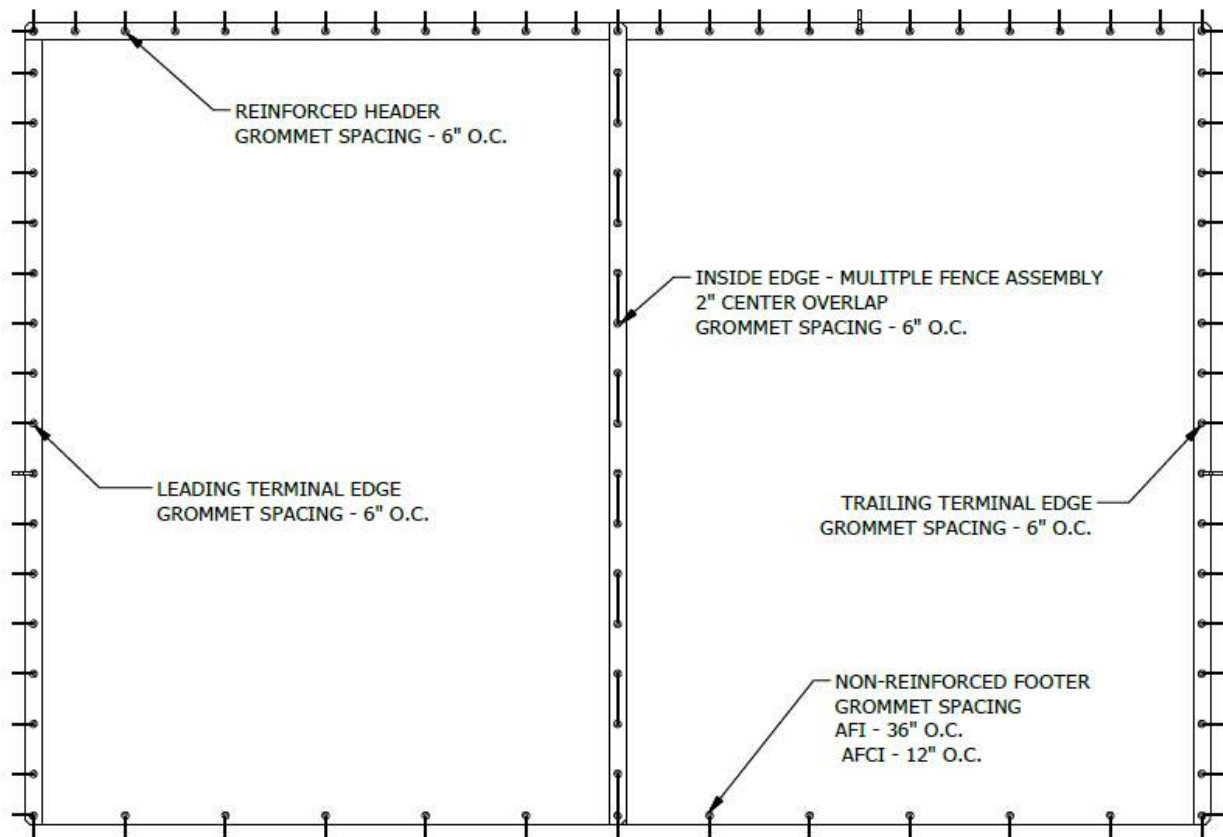

Figure 1-Stainless Steel Tie Orientation

Secure the Header

Secure the header ties around the rail ONLY. Do not include the chain link fence. This will allow the installer to pull the fence taught (horizontally) as required for the entire installation. Each grommet gets one fastener. Corner grommets get two ties. DO NOT release all the material weight on corner grommets alone.

1. Secure First Terminal Edge

Loosely fasten all the leading terminal edge grommets (first fence only) to the chain link fence or post as shown in Figure 1. When all ties have been applied, tighten fasteners using the staggered method. Each grommet gets one tie secured in a horizontal direction. If a single curtain application, both side edges are considered a terminal edge.

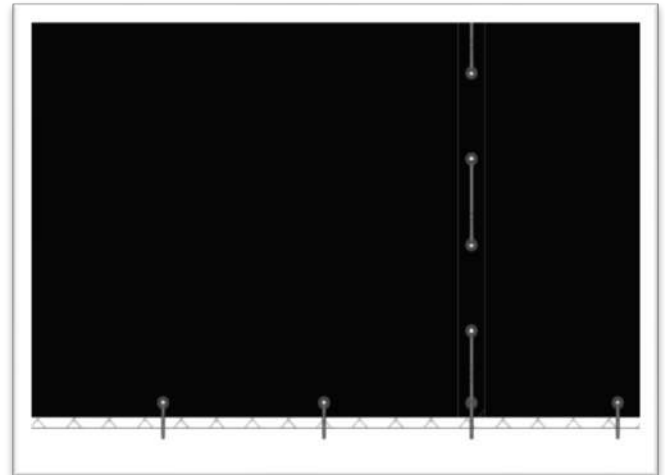

2. Secure Base

Secure bottom grommets to the base of the fence structure. Secure each footer as the curtain is hung. If curtain is longer than fence structure, lie on ground and follow Step 5 for securing instructions.

3. Install Additional Curtains

Secure the header of the second curtain using the ending grommet of the first curtain creating the 2" overlap. Keep all curtains taught as the end of one curtain is secured with the beginning of the new curtain to reduce wrinkles while installing. Repeat as necessary for each additional curtain.

4. Ending Terminal Edge

Fasten the SS Ties as shown in Figure 1 for the trailing terminal edge orientation.

5. Bury and Trim

When the fence is completely installed, follow the recommended base (footer) of fence recommendations. This step will vary depending on the ground surface of fence and surrounding area. Once all ties have been properly snug according to location, trim and dispose of SS tie ends according to local and regional waste laws.

There are many ways to hang Acoustiblok Industrial Curtains on a solid structure. Please visit our website at acoustiblok.com for installation suggestions from other satisfied customers.

1. Secure the Header

Prepare wall – Make sure wall is free from objects that may pierce material. While attaching the header to the structure, maintain support on remainder of fence. If using a fastener application (screw/washer or staple) do not leave more than 2ft² without a fastener. If using framework (as shown above) be sure to secure all fence edges with the framework.

2. Secure the Edges

Permanently attach both edges to structure. Be sure all air gaps are sealed to block sound and noise through fence.

3. Secure the Footer

Permanently attach bottom edge to structure.

8 FT DOUBLE FRAMED FULL PRIVACY - PICKET FENCE

Legal Disclosure:

IN NO CASE SHALL ACOUSTIBLOK INC. BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGE TO PRE-EXISTING FENCE STRUCTURE SYSTEMS AND/OR PROPERTY DAMAGE RESULTING FROM THE ATTACHMENT OF PRODUCT PURCHASED HEREUNDER. ENSURING THE ADEQUACY OF THE STRENGTH AND STABILITY OF THE STRUCTURE SYSTEM IS ENTIRELY THE RESPONSIBILITY OF THE INSTALLER. THE PURCHASER SHALL ASSUME ALL SUCH RISKS. THE EFFECTIVENESS OF ALL ACOUSTIBLOK® PRODUCTS, INCLUDING ACOUSTIFENCE®, MAY BE INFLUENCED BY A NUMBER OF FACTORS INCLUDING BUT NOT LIMITED TO; THE CONNECTIONS USED, THE METHOD OF BINDING/TYING, SEALING SEAMS, THE WEATHER CONDITIONS AND THE MANNER OF USE OR APPLICATION. ALL OF WHICH ARE BEYOND THE CONTROL OF ACOUSTIBLOK, INC.

THE INSTALLATION GUIDE FOR THIS PRODUCT SHOULD BE FOLLOWED CAREFULLY. IT IS IMPOSSIBLE TO ELIMINATE ALL OUTDOOR NOISE WITH USE OF THIS, OR ANY PRODUCT. THE FIRST STEP IN REDUCING ANY OUTDOOR NOISE IS ADDING A SOUND BARRIER BETWEEN YOU AND THE NOISE, SUCH AS ACOUSTIFENCE, THAT IS AS HIGH AND WIDE AS POSSIBLE. THE DISTANCE AND ELEVATION OF THE BARRIER THAT IS PLACED BETWEEN THE NOISE SOURCE AND LISTENER IS KEY TO OBTAINING THE GREATEST REDUCTION RESULT. OTHER OBJECTS, SUCH AS TREES, BUILDINGS AND MOVING VEHICLES, CREATE SOUND REFLECTIONS THAT CAN ALSO CHANGE THE RESULTS. WITH ALL SOUND PROOFING PRODUCTS, IT IS MORE DIFFICULT TO ACHIEVE A NOISE REDUCTION RESULT OUTDOORS THAN IT IS INDOORS. THE RESULTING STC SCORES FROM AN OUTDOOR INSTALLATION WILL BE LESS THAN A LABORATORY STC TEST RESULT, DUE TO THE MANY VARIABLES FOUND IN AN OUTDOOR ATMOSPHERE.

Information herein is, to the best of our knowledge and belief, accurate. However, since conditions of handling and use are beyond our control, we make no guarantee of results and assume no liability for damages incurred by the use of this material/product. All material/products may present unknown health hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist. Final determination of suitability of this material/product is the sole responsibility of the user. No representations or warranties, either expressed or implied, of merchantability, fitness for a particular purpose or any nature are made hereunder with respect to the information contained herein or the material/product to which the information refers. It is the responsibility of the user to comply with all applicable federal, state and local laws and regulations.

(Patented) Acoustifence® – Poinsettia Community Park Pickleball Courts Commercial

Because of pickleball's skyrocketing popularity among people of all ages, Poinsettia Community Park added six lighted pickleball courts to their neighborhood recreational park in Carlsbad, California. But with the new courts also came noise issues; pickleball is a very noisy game. To be proactive, the City of Carlsbad contacted Acoustiblok, a leader in the pickleball industry in resolving challenging court noise issues about the problem. After consulting with an Acoustiblok pickleball specialist, the city decided on the company's green shade of Acoustifence outdoor acoustical barrier to better blend into their park setting. The Acoustifence installation went up quickly and easily on the chain-link fencing (the fence heights varied in different locations requiring custom cut Acoustifence sizes which Acoustiblok was happy to accommodate). The results were impressive, and the city was delighted with the noise level reduction the Acoustifence installation provided the park goers. Just 1/8-inch thin, patented Acoustifence was recently tested at Miami/Dade hurricane lab to withstand up to a 200-mph wind load.

1. Overview

1.1 Summary

Acoustical measurements were carried out near the Racquet Club at Iron Oaks at Sun Lakes Robson Resort Community on the morning of Friday, August 17, 2012. Three courts proposed for conversion from tennis to pickleball were tested at five locations including one interior measurement for compliance with Maricopa County Code P-23.

The impact on neighboring residences has been assessed using ANSI S12.9 Parts 4 and 5. The proposed east tennis court location is recommended for conversion to pickleball. A sound wall will be required. Operation during nighttime hours is not recommended.

The practice court is also an acceptable location with additional abatement. The proposed west tennis location is not recommended based on current data.

Measured sound pressure levels were below the Maricopa County noise criteria at 24022 Berrybrook; however, the nearest residence to the east tennis court location was not tested on the interior, but is expected to require mitigation at the courts boundary to comply with the Maricopa County Code based on measurements outside the home.

2. Acoustical Measurements Description and Results

2.1 Test Description

2.1.1 Purpose

A series of acoustical measurements was carried out at the property lines of the homes nearest to the sites of the proposed pickleball courts to determine the sound levels produced by the pickleball play. A measurement was also performed inside one home as specified by Maricopa County Code P-23 to test for compliance.

2.1.2 Measurements and Equipment

A-weighted acoustical data was logged with a Bruel and Kjaer Type 2236 integrating sound level meter using fast time constant setting. Simultaneous, calibrated digital recordings were also made to document existing sound sources. These recordings were used for more detailed analysis of the impulsive sound of the pickleball and paddle impact. The microphone height was 60 inches unless otherwise noted. A three inch diameter wind screen was placed over the microphone.

Because the impact sound of the paddles can not be represented accurately with an averaged sound pressure level (LAeq) measurement, the A-weighted sound exposure level (SEL) is used instead. This quantity includes only the impulsive sound and is a function of both the average acoustic pressure of the impulse and its duration.

For each measurement of the paddle impacts, 16 players played with four balls on the proposed tennis courts areas except on the west tennis court while measuring at 9747 Sunvista. In this test there were 10 players and four balls in play. On the practice court there were eight players and two balls in play. The players maintained constant play during measurements labeled 'during play' or 'play'.

Meteorological observations were made at the proposed court site during the time of the acoustical measurements using a Kestrel 4500 weather station. Temperature, humidity, wind, and pressure data were logged every 20 seconds. This data is displayed in the appendix.

2.1.3 Measurement Locations

Figure 2.1 shows the locations of the five measurement points which included four points near residences and one inside the residence at 24022 Berrybrook (point 2). The microphone was placed at the nearest residential property lines where applicable. The surfaces of the proposed

courts sites were painted asphalt.

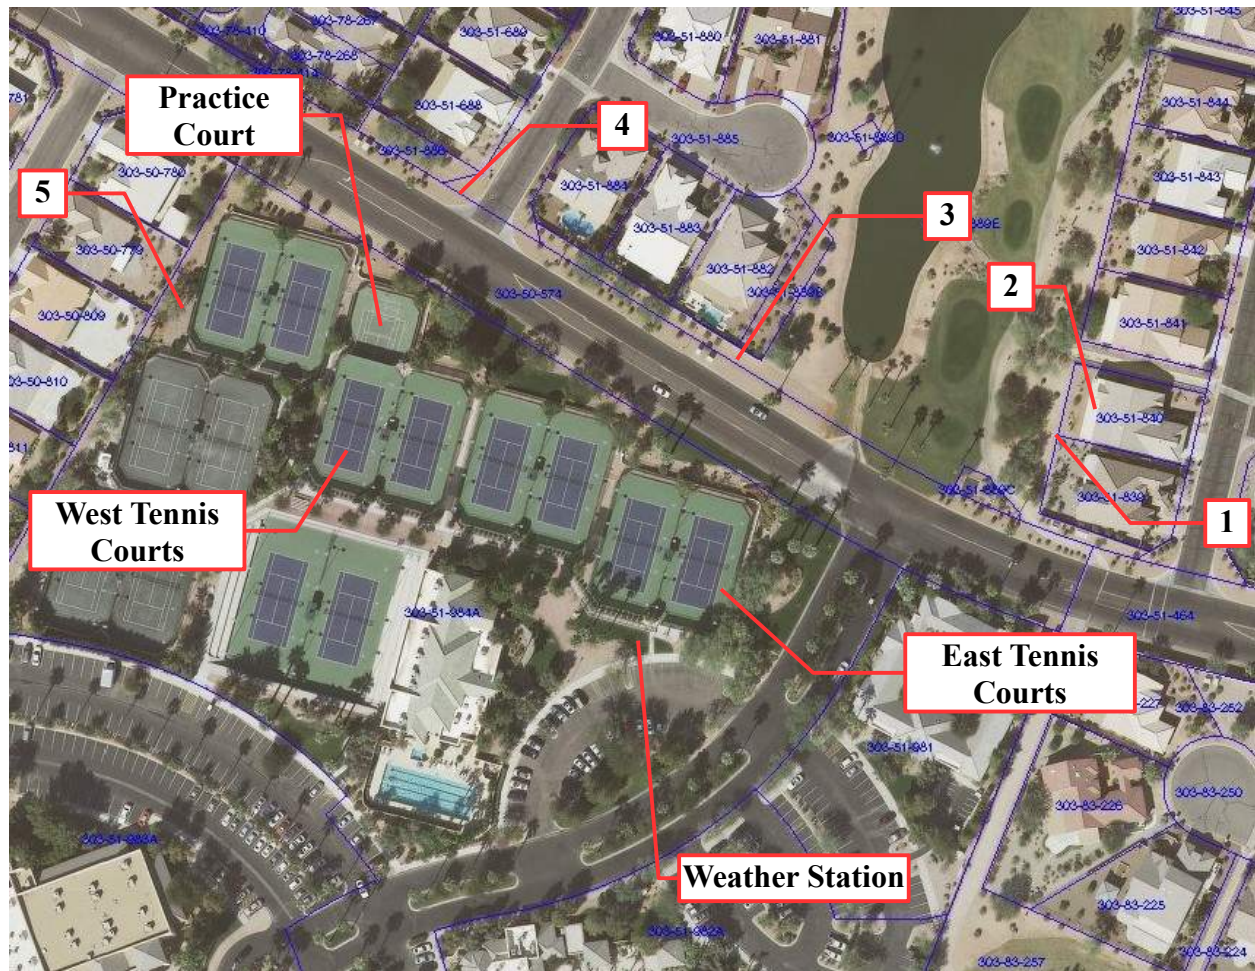

Figure 2.1. Proposed Court Sites and Measurement Locations

2.1.4 Environmental Conditions

The measurements were carried out on the morning of Friday, August 17, 2012. Meteorological conditions in the area were overcast with light winds from the northwest.

The weather station was set up near the southern end of east tennis courts site on the lawn outside the fence.

2.2 Proposed East Tennis Court Location

2.2.1 Point 1, 24022 Berrybrook

At the southwest corner of 24022 Berrybrook, 70 feet from Robson Blvd. 330 feet from center of proposed east tennis court location. Ground was moist soil.

Figure 2.2 shows that the sound pressure level was in the 45 to 50 dBA range during play. Background noise levels, seen in Figure 2.3, were similar with a fairly constant stream of traffic on Robson Blvd.

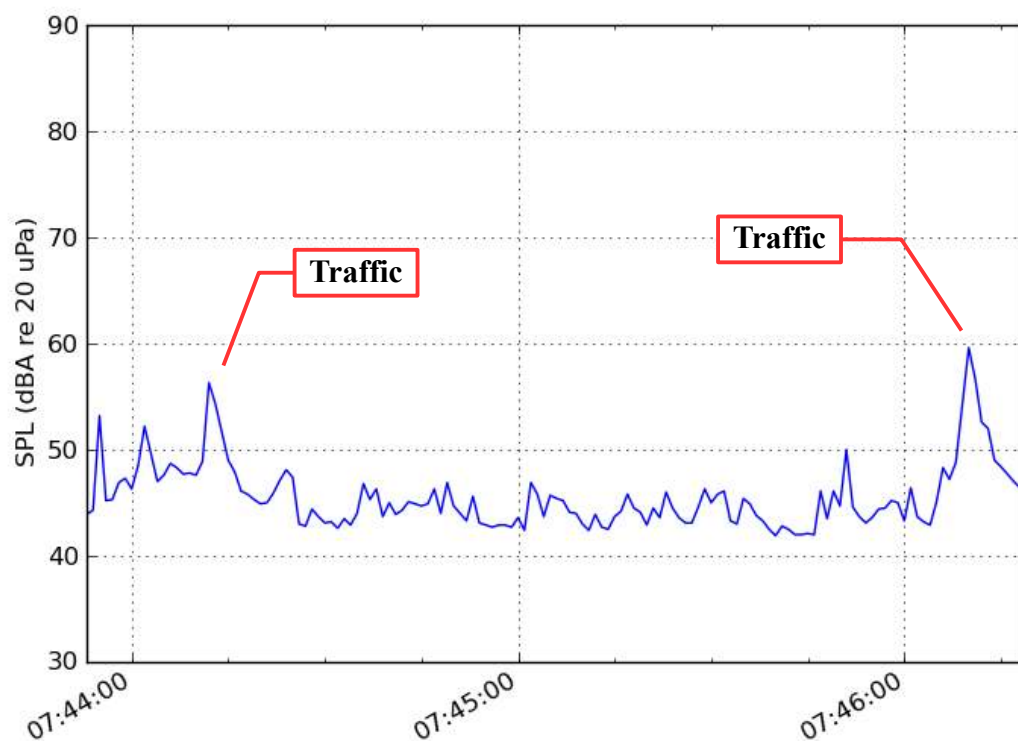

Figure 2.2. Sound Pressure Level at 24022 Berrybrook (Players on East Tennis Court)

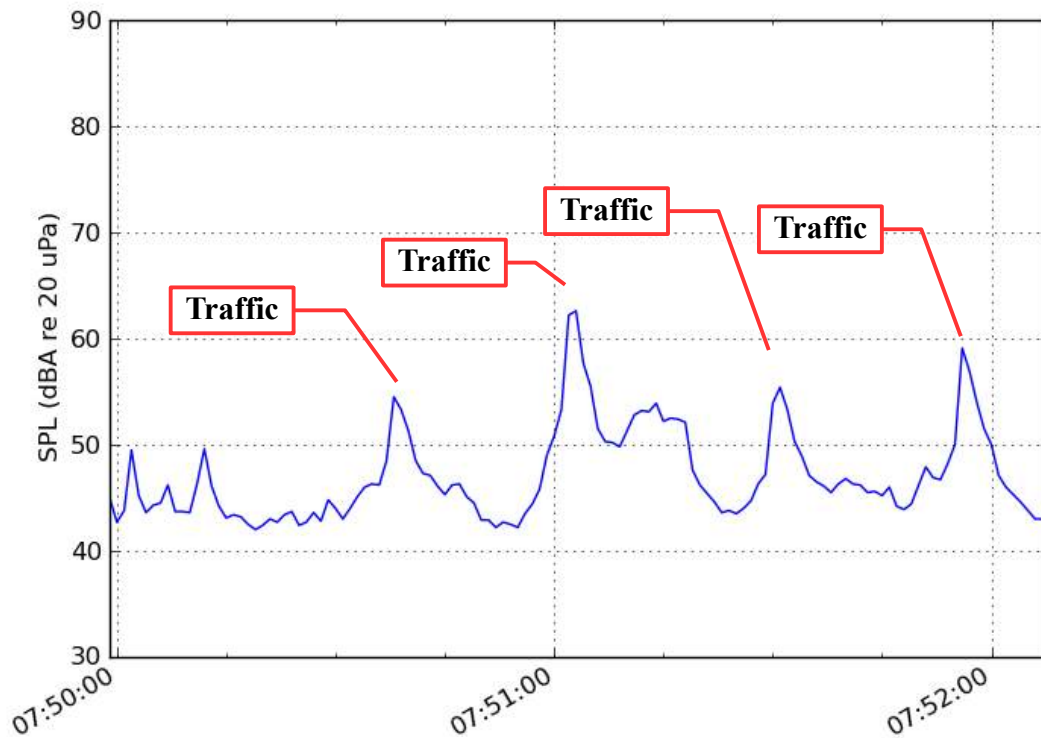

Figure 2.3. Background Noise Level at 24022 Berrybrook

The sound pressure level data at this location is shown in Table 2.1. The pickleball paddles did not contribute to average sound pressure at this location.

Location	Start Time	End Time	LAeq	C.I. 95%	LAmin	LAmx	L10	L50	L90
Play	07:43:53	07:46:19	47.3	3.8	41.9	59.6	48.9	44.9	42.8
Background	07:49:59	07:52:08	50.2	4.3	42.0	62.6	53.3	46.1	42.9

Table 2.1. Sound Pressure Level Data at 24022 Berrybrook (Players on East Tennis Court)

Table 2.2 summarizes the ASEL data for the paddle impacts. For the ASEL results, vehicle traffic was removed from the data to prevent detection failure due to masking by the road noise. The resulting measurement time is noted in the table.

The number of hits detected and the rate are listed next. The total ASEL includes all impacts detected in the data set. This is then normalized to the number of hits. Finally, the LAeq for just the paddles is shown as calculated from the total ASEL and measurement time.

Measurement Time (sec)	Hits per Minute	Hits per Minute	Total ASEL	ASEL per Hit	Paddle LAeq
127.523	63	29.6	58.5	40.5	37.5

Table 2.2. Sound Exposure Level Data at 24022 Berrybrook (Players on East Tennis Court)

2.2.2 Point 2, 24022 Berrybrook (Interior)

At approximately the center of the family room / dining room space. 360 feet from center of proposed east tennis court location.

This measurement was carried out to evaluate compliance with the Maricopa County Noise Ordinance P-23. This code states that a noise is a disturbance if it “can be heard from within closed residential structures located within 500 feet of the boundary of the property from which such noise emanates.”

Figure 2.4 and Figure 2.5 show the sound pressure level with and without pickleball play. Figure 2.6 shows the sound pressure level during play with the back door open; however, this measurement does not comply with the test specification in Maricopa ordinance P-23. Background noise heard inside the house included traffic on Robson Blvd and a refrigerator.

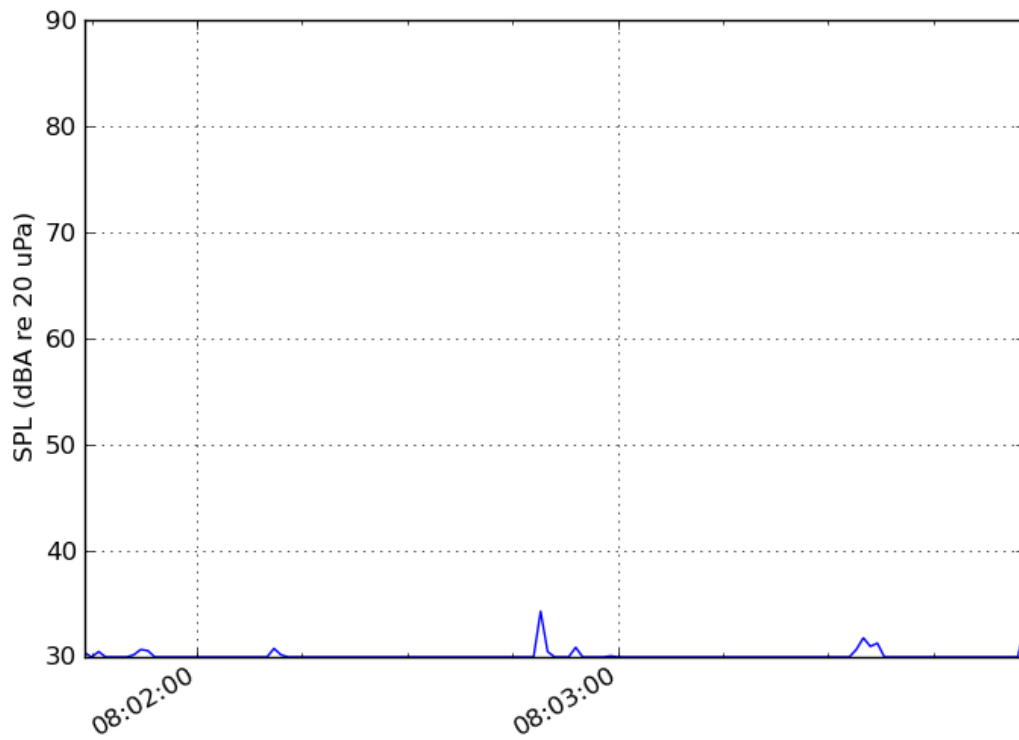

Figure 2.4. Sound Pressure Level Inside 24022 Berrybrook (Players on East Tennis Court)

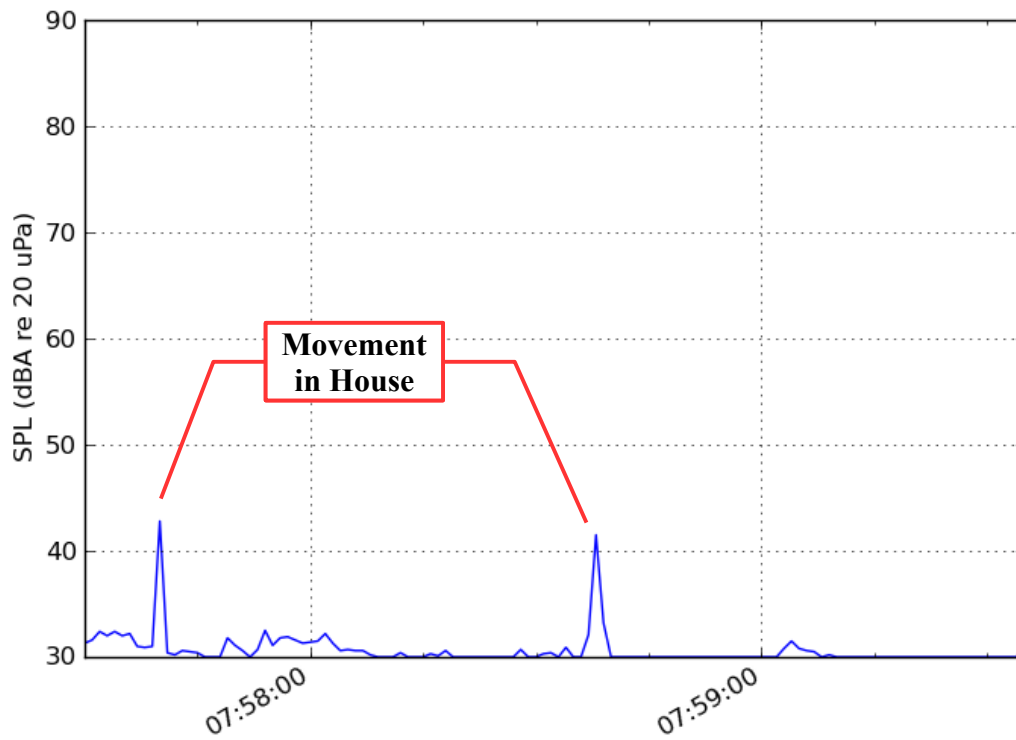

Figure 2.5. Background Noise Level Inside 24022 Berrybrook

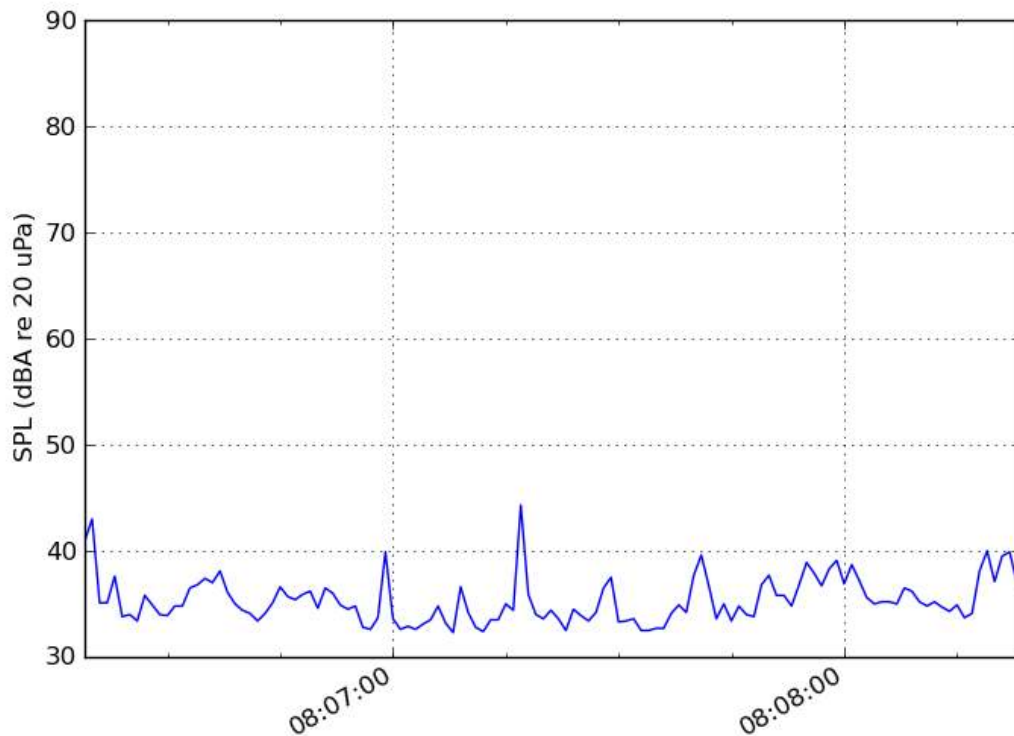

Figure 2.6. Sound Pressure Level Inside 24022 Berrybrook (Players on East Tennis Court, Back Door Open)

The sound pressure level data at this location is shown in Table 2.3. The interior of the house was extremely quiet and for part of the measurement time the level was below the range of the meter.

Location	Start Time	End Time	LAeq	C.I. 95%	LAmin	LAmx	L10	L50	L90

Play (open door)	08:06:19 AM	08:08:24 AM	36.1	2.9	32.3	44.3	38.5	34.9	33.0

Table 2.3. Sound Pressure Level Data Inside 24022 Berrybrook (Players on East Tennis Court)

Maricopa County Noise Ordinance P-23 Testing

During the 2:14 minute exposure inside the house with all doors and windows closed, two faint hits were just audible at the center of the family room / dining room area. The sound from the east tennis court could only be heard by standing perfectly still and listening carefully for the

paddle impacts.

2.2.3 Point 3, 9747 Sunburst

At the southeast corner of 9747 Sunburst, 16 feet from privacy wall. 190 feet from center of proposed east tennis court location. Ground was course gravel.

Figure 2.7 shows that the sound pressure level was in the 50 to 60 dBA range during play with the primary sounds being pickleball paddles and traffic on Robson Blvd. Background noise levels, seen in Figure 2.8, were similar.

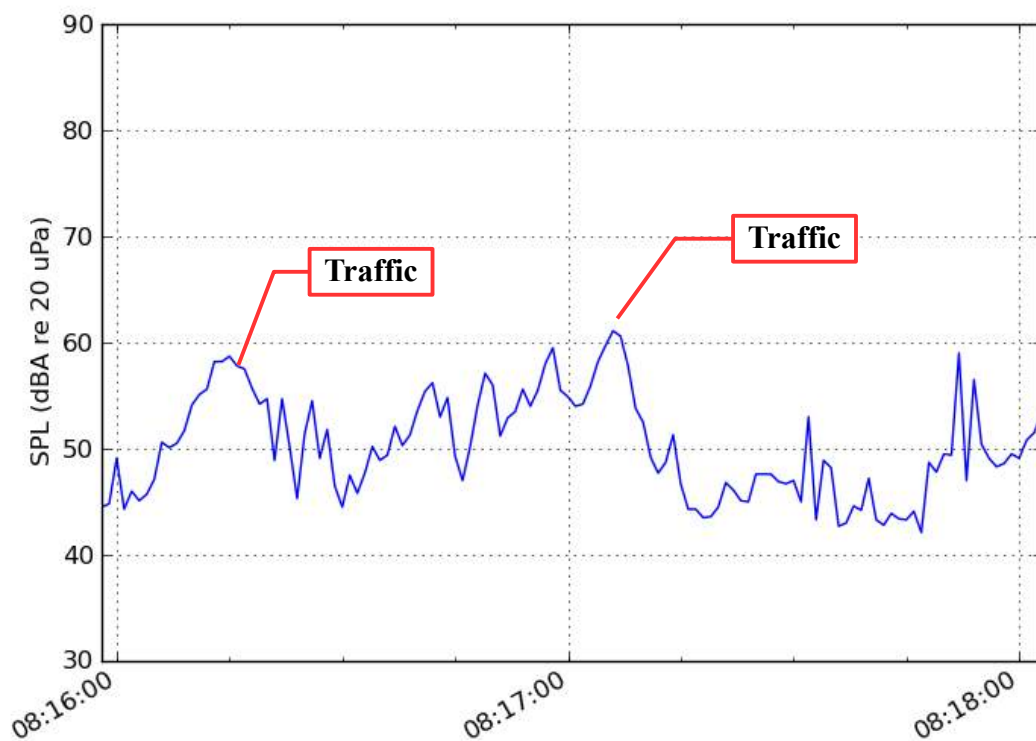

Figure 2.7. Sound Pressure Level at 9747 Sunburst (Players on East Tennis Court)

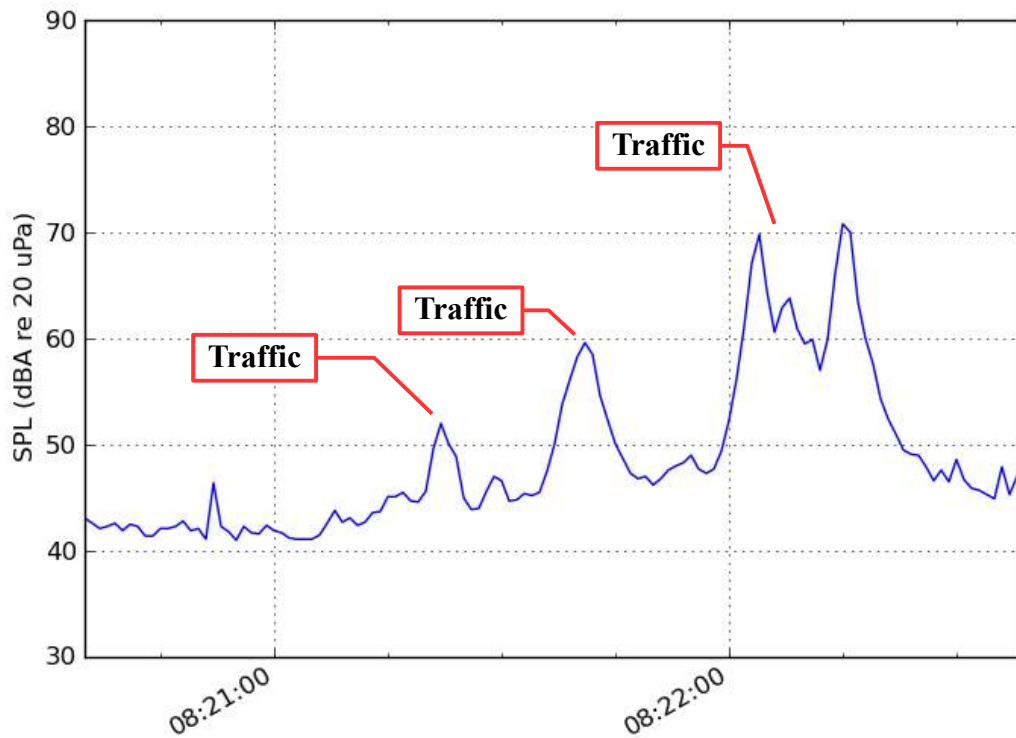

Figure 2.8. Background Noise Level at 9747 Sunburst

The sound pressure level data at this location is shown in Table 2.4. The pickleball paddles did not contribute to average sound pressure.

Table 2.9. Sound Exposure Level Data at 23926 Glenburn (Players on West Tennis Court)

2.3.2 Point 5, 23907 Sunvista

20 feet from the rear privacy wall at 23907 Sunvista. 180 feet from center of proposed west tennis court location. Ground was moist soil.

Figure 2.12 shows that the sound pressure level was in the 50 to 60 dBA range during play with the primary sounds being pickleball paddles, tennis racquets on the nearest court, and traffic on Robson Blvd. Background noise levels, seen in Figure 2.13, were slightly lower. The higher reading during play was partly due to a slow moving groundskeeping vehicle; however, the LAeq of the pickleball paddles in Table 2.11 show that they were also a significant contributor.

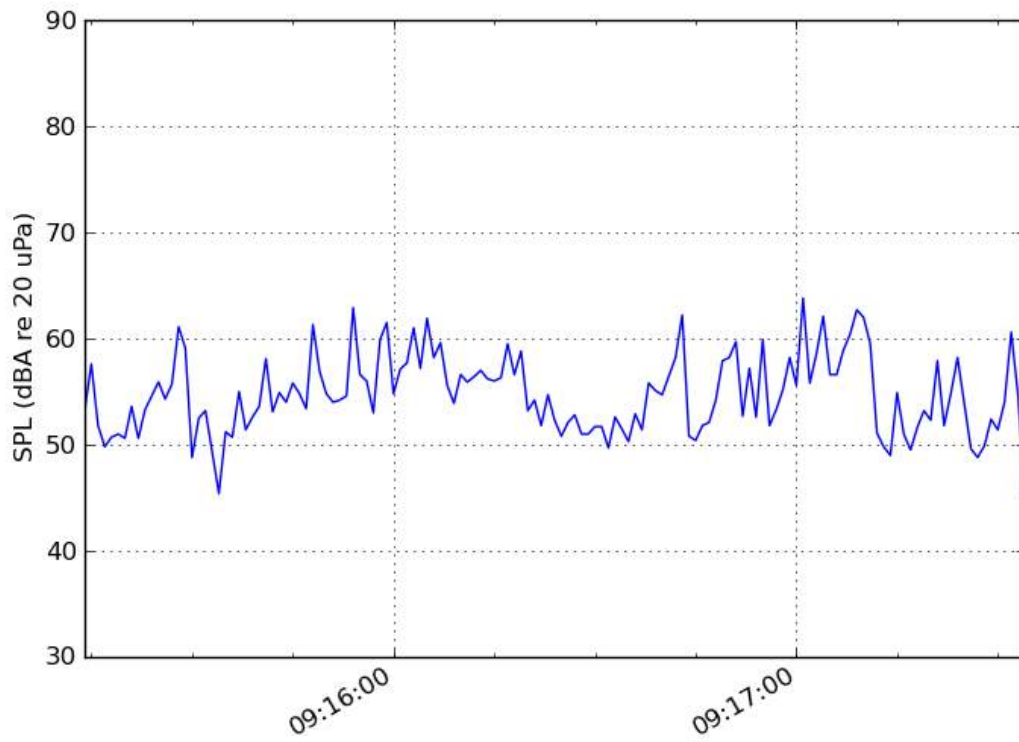

Figure 2.12. Sound Pressure Level at 23907 Sunvista During Play (Players on West Tennis Court)

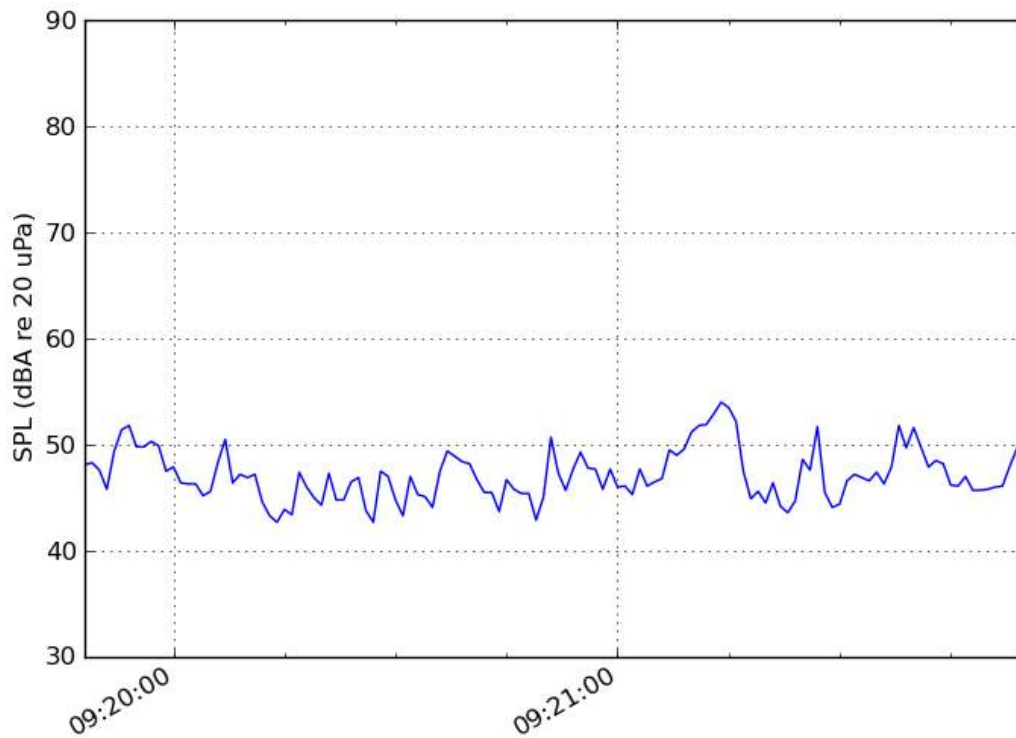

Figure 2.13. Background Noise Level at 23907 Sunvista

Table 2.18. Paddle Sound Exposure Level Data for All Source and Measurement Locations

Comparing the levels in Table 2.18 indicates 9747 Sunburst with pickleball on the proposed east tennis court, 23926 Glenburn with pickleball on the practice court, and 23907 Sunvista with pickleball on the proposed west tennis court have the highest paddle LAeq levels.

With the exception of the practice court testing, each measurement was conducted with four balls in play. The number of hits per minute on the proposed east tennis court location was about 30. On the west tennis court, however, the number of hits per minute increased to about 45. With two balls in play the hits per minutes would be expected to be about 15, but again it is 50 % to 100 % greater. The courts were not generally visible from the measurement positions so it is not certain what would account for the discrepancy.

The mean hits per minute per ball is 10.1 with a standard deviation of 2.9. The sound exposure level scales as $10\log_{10}(N)$ where N is the number of impact events. The uncertainty in the hits rate will introduce an additional 1.3 dB uncertainty in the LAeq of the paddles.

2.6 Spectral Response of Pickleball and Paddle Impact Noise

The sound power spectrum of the pickleball and paddle impact has two basic shapes depending on how the ball is hit. Figure 2.16 and Figure 2.17 show the power spectra of a 'sharp' hit and a 'dull' hit. The curves are not calibrated for absolute level, but can be compared relatively.

The sharp hit spectrum shows a characteristic tonal signature. The frequency of the peak was seen to vary between roughly 1,000 and 2,000 Hz. The energy in the dull hit is more spread out, but still peaks between 1,000 and 2,000 Hz. The most audible frequencies are therefore also in this range. The lower frequency components contribute less to the perception of loudness as the ear is less sensitive to these frequencies.

A sound wall design will require effective attenuation at 1,000 Hz and above.

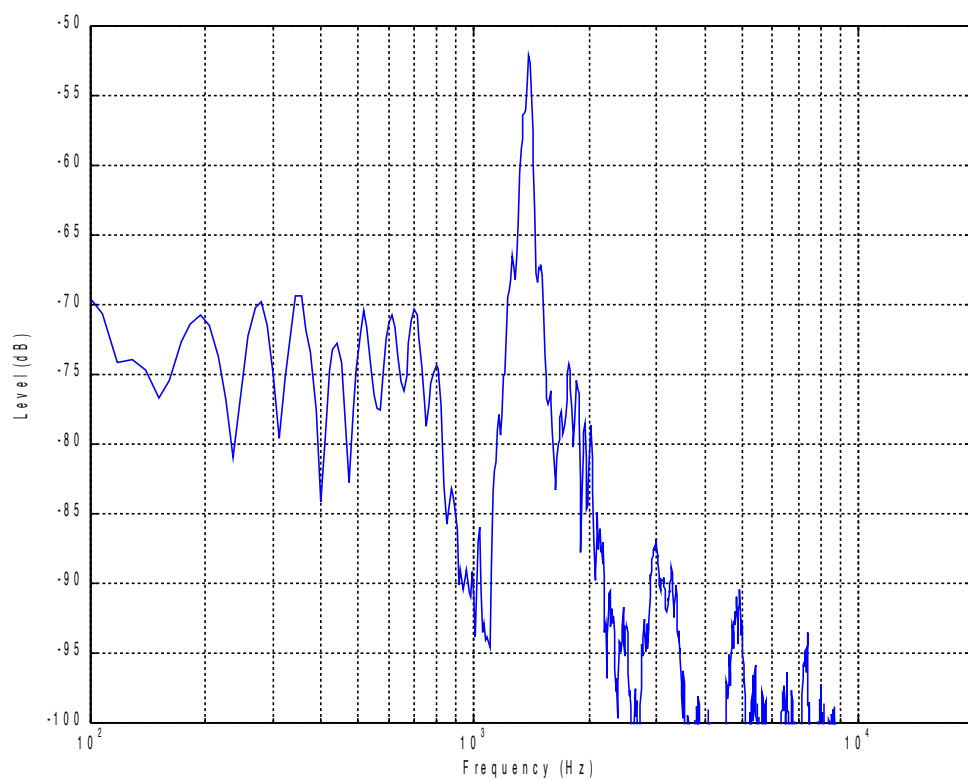

Figure 2.16. Spectral Response of a Sharp Hit

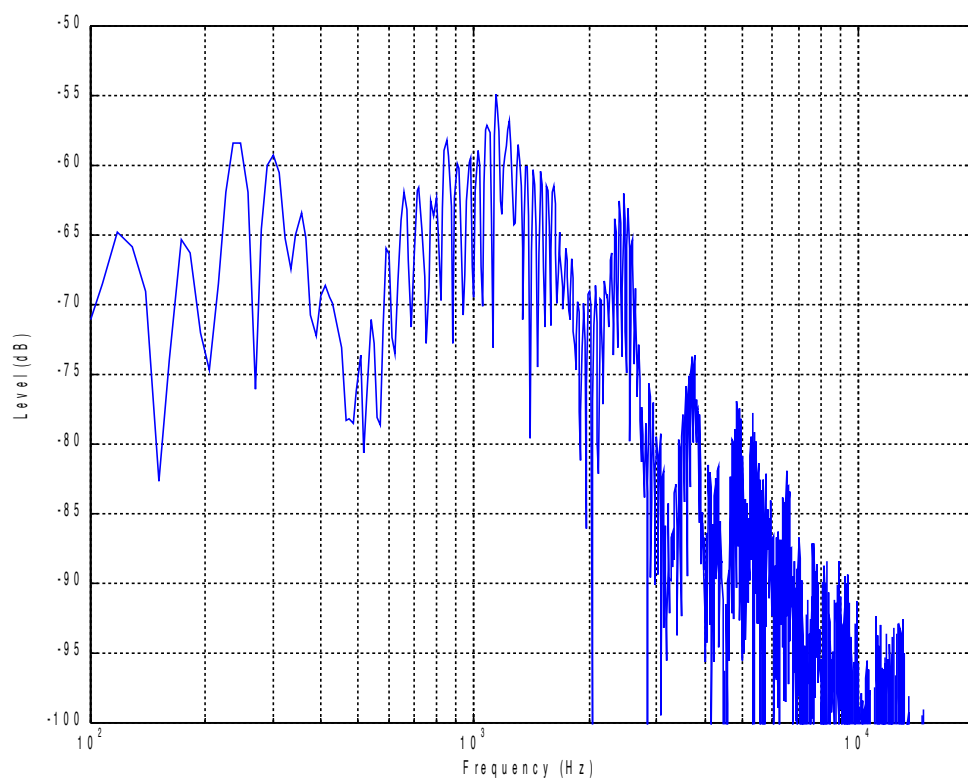

Figure 2.17. Spectral Response of a Dull Hit

3. Land Use Compatibility Analysis

3.1 Methodology

Land use compatibility has been analyzed using the methodology in ANSI S12.9 Parts 4 and 5. This procedure isolates the impact sound of the pickleball paddles and applies adjustments to account for the increased community impact of the highly impulsive nature of the sound and the fact that residents are generally home during the times when the activity occurs.

Because the impact sound of the paddles can not be represented accurately with an averaged sound pressure level (LAeq) measurement, the A-weighted sound exposure level (ASEL) is used instead. This quantity includes only the impulsive sound and is a function of both the average acoustic pressure of the impulse and its duration.

Part 4 of the standard calls for a 12 dB adjustment to the SEL for highly impulsive sounds such as impacts. In addition, Part 4 includes a 5 dB adjustment for weekend activities that occur when residents are generally home. Due to the characteristic lifestyle of a retirement community, this adjustment has been included as well for a total adjustment of 17 dB.

Part 5 of the standard recommends a maximum 55 dB DNL, or in this case LAeq since the courts will operate during daytime hours, at adjacent residential property lines during the hours of operation of the pickleball courts.

3.2 Analysis

The ANSI S12.9 analysis is summarized in Table 3.1 using the data set abbreviations listed in Table 2.16. The distance is from the center of the given proposed court location to the measurement position.

Data Set	Distance (ft)	Paddle LAeq	Total Adjustments (dB)	Adjusted Paddle LAeq	Back- ground LAeq	Recommended Attenuation (dB)
Pt 1, ETC	330	37.5	17	54.5	50.2	6.0
Pt 3, ETC	190	47.7	17	64.7	57.3	11.0
Pt 4, ETC	390	35.1	17	52.1	59.9	0.0
Pt 4, WTC	225	39.8	17	56.8	59.9	1.8
Pt 4, PC	130	46.2	17	63.2	59.9	8.2
Pt 5, PC	175	39.5	17	56.5	47.9	6.5
Pt 5, WTC	180	53.3	17	70.3	47.9	20.3

Table 3.1. Paddle LAeq Adjustments and Recommended Attenuation

The analysis begins with the paddle LAeq as calculated from the sound exposure levels given in the previous chapter (see Table 2.18). This level represents the contribution only from the paddle impacts. An adjustment of 17 dB is added to the paddle LAeq as described in the previous section.

Recommendations for abatement are based on ANSI S12.9 Part 5, Figure A1. For residential land use a maximum daytime LAeq of 55 dBA is recommended for the adjusted paddle LAeq. There is, however, a heightened perception of quiet in retirement communities. For background noise levels between 50 and 55 dBA, the actual background noise level is used as the limiting value for the adjusted paddle LAeq. However, for background noise levels below 50 dBA, 50 dBA is used. This is an implementation of ANSI S12.9 Part 4, Annex F.3.4.2.

3.3 Discussion

The attenuation recommendations for the proposed east tennis court location can be achieved by a wall of sufficient height and span.

The recommended attenuation for the practice court is also achievable with a sound wall system. In this case, however, reflections from the existing 9.5 foot wall will need to be addressed by covering the wall with an absorptive acoustical treatment.

The paddle LAeq at Point 5 for the proposed west tennis court location was abnormally high. Insufficient information is available to pinpoint the cause. Based on the available data, however, conversion of this court to pickleball is not recommended. Achieving 20.3 dB attenuation from a sound wall is generally not practical. In addition, relocating the concrete walkway will likely be required to achieve adequate coverage by a wall as well as ingress to the existing tennis courts.

4. Conclusions and Recommendations

4.1 Compliance with Maricopa County Code P-23

The sound pressure levels produced by the pickleball paddles inside 24022 Berrybrook were below the level at which a person engaged in normal household activities would notice. It is therefore concluded that the proposed east tennis court location in its current configuration is in compliance with Maricopa County code P-23 at this residence.

No interior testing was performed at the closest residence, 9747 Sunburst. Exterior testing indicated that the sound levels from the east tennis courts are approximately 10 dBA higher at this location than at 24022 Berrybrook. Court mitigation is expected to be needed to comply with Maricopa County code at this location.

4.2 Recommendations for Abatement

4.2.1 Proposed East Tennis Court Location

The east tennis court (see Figure 2.1) is the best location to convert to pickleball. Measurements at 24022 Berrybrook, 9747 Sunburst, and 23926 Glenburn show that the new pickleball courts will need to be partially enclosed by a sound wall that can achieve an insertion loss of 11 dB at 1,000 Hz and above.

4.2.2 Proposed West Tennis Court Location

The proposed west tennis court location is not recommended for conversion to pickleball.

4.2.3 Practice Court

A sound wall that wraps around the east and west sides of the practice court will be needed to convert the court to pickleball. In addition, reflections from the existing 9.5 foot wall will require absorptive treatment to prevent degradation of the sound wall performance. The sound wall will need to produce at least 8.5 dB of insertion loss at 1,000 Hz.

4.2.4 Hours of Operation

Pickleball activities during nighttime hours are not recommended. Nighttime hours are not defined in Maricopa County Code P-23, but are generally defined as being from 10:00 PM to 7:00 AM. Using existing schedule restrictions for groundskeeping activities may be a more practical solution to allow some seasonal flexibility.

Appendix

A1. Glossary of Acoustical Terms and Abbreviations

A1.1 Abbreviations

AI: articulation index

ASEL: A-weighted sound exposure level

ASTC: apparent sound transmission class

dB: decibel

DNL: day - night level

FSTC: field sound transmission class

Hz: Hertz

IIC: impact insulation class

kHz: kilohertz

L_{eq}, LA_{eq}, LC_{eq}: equivalent sound pressure level

NC: noise criteria

NIC: noise isolation class

NIPTS: noise induced permanent threshold shift

NR: noise reduction

Pa: Pascal

POE: probable occupant evaluation (see room criteria)

PTS: permanent threshold shift

PWL: sound power level

QAI: quality assessment index (see room criteria)

RC: room criteria

RT₆₀: reverberation time

SEL: sound exposure level

SII: speech interference index

SIL: speech interference level

SLM: sound level meter

SPI: speech privacy index

SPL: sound pressure level

STI: speech transmission index

TTS: temporary threshold shift

A1.2 Terms

A-weighting: see frequency weighting

absorption coefficient: see sound absorption coefficient

acoustical coupler: a cavity of predetermined shape and volume used for the calibration of earphones or microphones in conjunction with a calibrated microphone adapted to measure the sound pressure developed within the cavity

anechoic room: a room whose boundaries absorb practically all of the sound incident thereon, thereby providing essentially freefield conditions

articulation index (AI): a number (ranging from 0 to 1) which is a measure of the intelligibility of speech- the higher the number the greater the intelligibility. This metric has been replaced by the Speech Intelligibility Index (SII) defined in ANSI S3.5.

average sound level: see equivalent continuous sound level

background noise: the total noise from all sound sources other than a particular sound that is of interest

band: a subsection of the frequency spectrum

C-weighting: see frequency weighting

coupler: see acoustical coupler

day-night level (DNL): the 24 hour equivalent (average) A-weighted sound pressure level. A 10 dBA penalty is incurred between the hours of 10:00 PM and 7:00 AM. The DNL system has been adopted by the U.S. Department of Housing and Urban Development, the Department of Defense, and the Federal Aviation Administration.

decibel (dB): a unit of level which denotes the ratio between two quantities that are proportional to power; the number of decibels is 10 times the common logarithm (base 10) of this ratio.

diffuse field: a sound field which has statistically uniform energy density and in which the directions of propagation of the sound waves are randomly distributed. In a practical sense, the sound pressure levels at all points in the room are nearly the same except near the room

boundaries and a sound wave reaching a given point in the room is equally likely to arrive from all directions.

direct sound: sound which reaches a given location in a direct line from the source without any reflections.

equivalent continuous sound level (L_{eq}): the level of steady sound which, in a stated time period and at a stated location, has the same sound energy as the time varying sound. If frequency weighting is applied, the equivalent continuous sound level may be designated LA_{eq} to indicate A-weighting or LC_{eq} to indicate C-weighting, etc. See also frequency weighting.

field sound transmission class (FSTC): a single number rating similar to sound transmission class (STC), except that the transmission loss values used to derive this class are measured in the field. FSTC ratings are typically lower than STC ratings which are measured under laboratory conditions.

flanking path: A wall or floor/ceiling construction that permits sound to be transmitted along its surface; or any opening, which permits the direct transmission of sound through the air.

freefield: a sound field in which the boundaries have negligible effect over the frequency range of interest.

frequency: the number of times that a waveform repeats itself in a given period of time, usually one second, i.e. the number of cycles per second). Unit: Hz.

frequency weighting: a prescribed frequency dependent attenuation or amplification applied to measured sound data usually intended to better approximate the sensation of loudness in a human listener. For example, A, B, and C weighting approximate the frequency dependent shape of the equal loudness contours for soft, moderate, and loud sounds.

Hertz (Hz): unit of frequency, cycles per second.

impact insulation class (IIC): a single number metric used to compare the effectiveness of floor-ceiling assemblies in providing reduction of impact-generated sounds such as footsteps. This rating is derived from values of normalized impact sound pressure levels in accordance with ASTM E492.

insertion loss: the reduction in sound level at the location of the receiver when a noise reduction measure such as a barrier, attenuator, muffler, etc. is inserted into the transmission path between the source and receiver. Unit: dB.

level: the logarithm of the ratio of a given quantity to the reference quantity of the same kind. Levels represent physical quantities such as sound pressure on a logarithmic scale and are therefore expressed in decibels. Unit: dB.

loudness: that attribute of auditory sensation in terms of which sounds may be ordered on a scale extending from soft to loud. Unit: sone.

masking: the process by which the threshold of hearing for one sound is raised by the presence of another sound.

noise criteria (NC): a single number criteria for the HVAC or mechanical noise level in a room derived from measured octave band data. The octave bands are weighted to de-emphasize low frequencies because the human ear is least sensitive to these frequencies. This metric is not valid for outdoor measurements.

noise induced permanent threshold shift (NIPTS): the permanent hearing loss resulting from noise exposure.

noise isolation class (NIC): a single number rating derived from measured values of noise reduction between two enclosed spaces that are connected by one or more paths. This rating is not adjusted or normalized to a standard reverberation time.

noise reduction (NR): the difference in sound pressure level between any two points along the path of sound propagation, e.g. the difference in level between the interior and exterior of a building where the sound level inside is due only to exterior noise.

octave: the frequency interval between two tones whose frequency ratio is 2.

omnidirectional microphone: a microphone whose response is independent of the direction of the incident sound wave.

Pascal (Pa): a unit of pressure. 1 Pascal = 1 Newton per square meter (1 N / m²).

permanent threshold shift (PTS): a permanent increase in the threshold of hearing at a given frequency.

point source: a source that radiates sound as if from a single point.

receiver: a person (or persons) or equipment which is affected by sound.

refraction: (1) the phenomenon by which the direction of propagation of a sound wave is changed as a result of a spatial variation in the speed of sound. (2) The angular change in direction of a sound wave as it passes obliquely from one medium to another having different sound speed.

reverberation time (RT₆₀): of an enclosure, for a sound of a given frequency or frequency band, the time that is required for the sound pressure level in the enclosure to decrease by 60 dB after the source has stopped. Unit: second.

room criteria (RC, RC Mark II): an octave band metric for evaluating HVAC noise inside a room. RC is a two dimensional metric consisting of a curve number that is the arithmetic average of the 500, 1000, and 2000 Hz octave band sound pressure levels and a qualitative descriptor identifying the character of the sound spectrum. The descriptor can be (N) for neutral, (LF) for low frequency dominance (rumble), (MF) for midfrequency dominance (roar), and (HF) for high frequency dominance (hiss). In addition, acoustically induced vibration can be designated by (LFV_B) for moderate, but perceptible vibration and (LFV_A) for clearly perceptible vibration. As an example, the maximum RC prerequisite for LEED is designated as RC 37(N) indicating curve number 37 with a neutral spectrum.

Further, two intermediary metrics are used in calculating the room criteria. The quality

assessment index (QAI) is a measure of the deviation from the given RC curve. The probable occupant evaluation (POE) is based on the magnitude of the QAI and can be 'Acceptable,' 'Marginal,' or 'Objectionable.'

Sabin: a unit of measure of sound absorption; a measure of sound absorption of a surface. It is the equivalent of 1 square foot of a perfectly absorbing surface; a metric Sabin is the equivalent of 1 square meter of a perfectly absorbing surface.

sone: the unit of loudness. One sone is the loudness of a pure tone presented frontally at a frequency of 1000 Hz and a sound pressure level of 40 dB referenced to 20 micropascals.

sound absorption coefficient (α): ideally, the fraction of diffusely incident sound power that is absorbed (or otherwise not reflected) by a material or surface.

sound exposure level (SEL): over a stated time period or event, 10 times the logarithm base 10 of the ratio of the time integral of the sound pressure squared to the product of the reference sound pressure, 20 μ Pa, squared and the reference time, one second. This quantity is used to characterize single events of short duration where the averaged level (L_{eq}) is inadequate.

sound level meter (SLM): an instrument that is used to measure sound level, with a standard frequency weighting and standard exponentially weighted time averaging.

sound power level (PWL): the total acoustical power emitted from a sound source expressed in decibels relative to 10^{-12} Watts.

sound pressure level (SPL): the acoustical pressure amplitude expressed in decibels relative to 20 micropascals.

sound transmission class (STC): a single number rating used to compare sound insulation properties of walls, floors, ceilings, windows, or doors. See also field sound transmission class.

speech intelligibility index (SII): metric defined under ANSI S3.5 to quantify the intelligibility of speech under adverse listening conditions such as noise masking, spectral filtering, and reverberation. The SII is defined for a scale of 0 to 1 where values greater than 0.75 indicate good communication and values below 0.45 indicate generally poor communication conditions.

speech intelligibility test: a procedure that measures the portion of test items (such as syllables, monosyllabic words, or sentences) that are heard correctly.

speech interference level (SIL): an index for assessing the interference effects of noise on the intelligibility of speech, derived from measurements of the background noise level of contiguous octave bands; i.e. the arithmetic average of the octave band sound levels for the bands centered at 500, 1000, 2000, and 4000 Hz (four band method) or the corresponding average for the octave bands centered at 500, 1000, and 2000 Hz (three band method). If other octave bands are used they must be specified. Unit: dB.

speech privacy index (SPI): The SPI is essentially the opposite of the speech intelligibility index and is defined as $1 - \text{SII}$ and usually represented as a percentage. An SPI above 80% is considered normal privacy while an SPI above 95% would meet the requirements of confidential privacy.

speech transmission index (STI): an index for rating the intelligibility of speech that takes both noise and reverberation into account.

temporary threshold shift (TTS): a temporary increase in the threshold of hearing at a given frequency.

threshold of hearing: for a given listener, the minimum sound pressure level of a specified sound that is capable of evoking an auditory sensation. The sound reaching the ears from other sources is assumed negligible.

transducer: a device designed to receive an input signal of a given kind and to furnish an output signal of a different kind in such a manner that the desired characteristics of the input signal appear in the output signal. For example, a microphone takes an acoustic pressure as an input and produces an electrical voltage as an output that is direct proportion to the instantaneous acoustic pressure amplitude. Other common examples in noise measurement would be a loudspeaker, accelerometer, or laser Doppler vibrometer (LDV).

transmission loss: the reduction in sound level from one side of a partition to the other.

wavelength: the distance a sound wave travels in the time it takes to complete one cycle.

weighting: see frequency weighting

A2. General Acoustics

Sound Pressure Level (SPL)

Sound is small, rapidly varying perturbations of atmospheric pressure with respect to the slowly changing ambient pressure. The ambient pressure is measured with a barometer while the small acoustic perturbations are measured with a microphone.

The unit of sound pressure is the Pascal (Pa). However, due to the wide range of acoustic amplitudes that can be heard by the human ear, sound pressure is normally expressed on a logarithmic scale having units of decibels (dB). Sound pressure expressed this way is known as the sound pressure level (SPL) and has the following relation to sound pressure.

$$SPL = 20 \log_{10} \left(\frac{p}{p_{ref}} \right) \quad (A2.1)$$

Here p is the sound pressure in Pascals. p_{ref} is a reference pressure, the threshold of hearing at 1000 Hertz (Hz), 20×10^{-6} Pa.

A-Weighting

The above formulation of SPL is a purely physical quantity. Due to the nonlinear and frequency dependent characteristics of the human ear it does not always correlate well with the perception of loudness. To improve the correlation for noise assessment purposes, a frequency weighting is often applied called A-weighting. The A-weighting function is based on listening tests in which human subjects adjusted tones throughout a range of frequencies to have equal loudness compared to a tone having an SPL of 40 dB at 1000 Hz. Figure A2.1 shows equal loudness contours as measured by Fletcher and Munson.

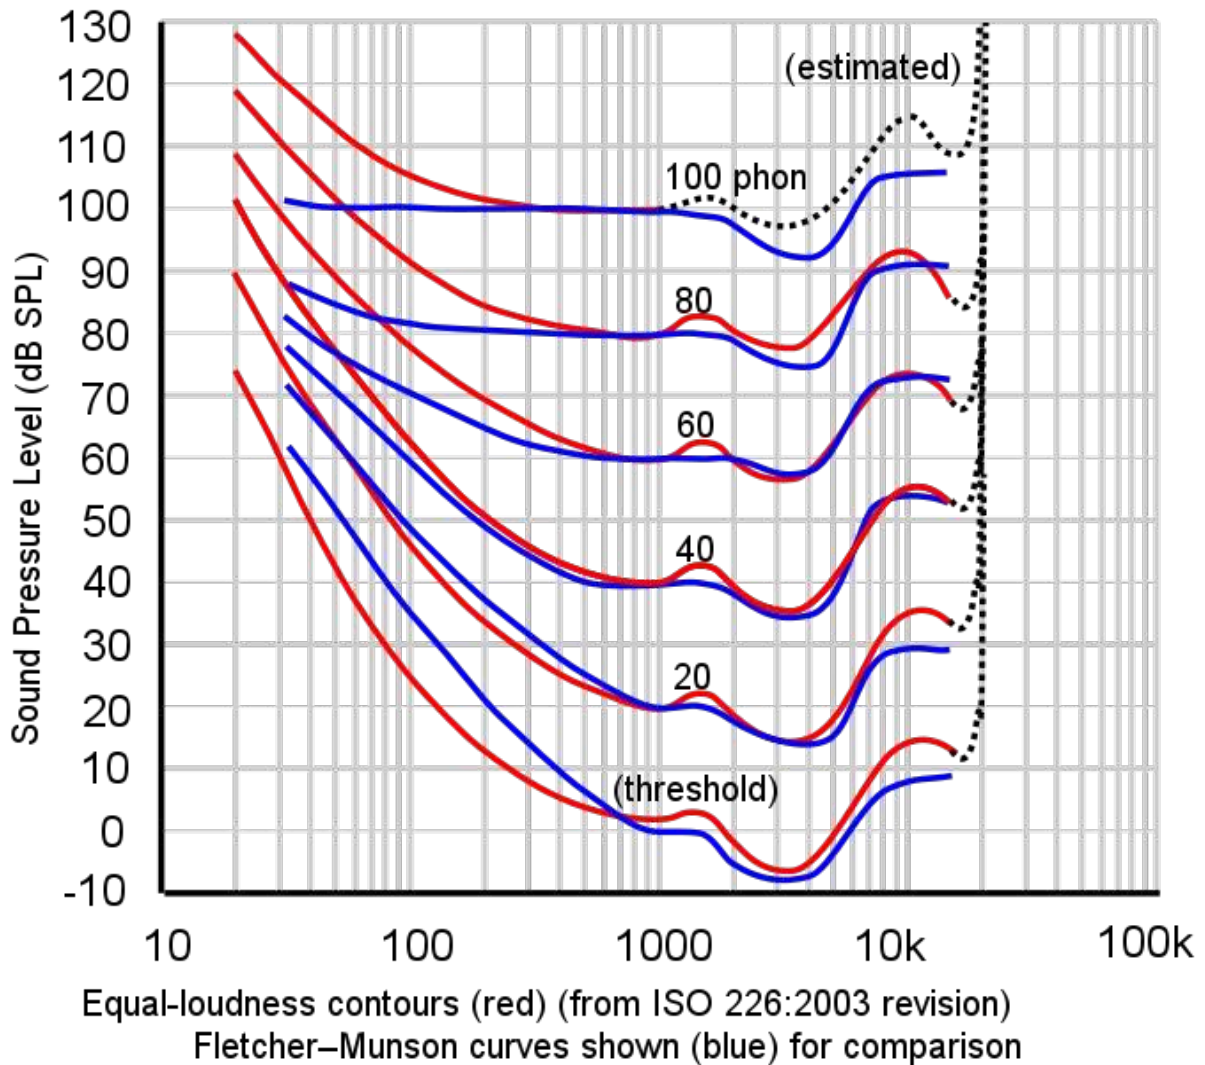

Figure A2.1. Equal Loudness Contours

Source: <https://en.wikipedia.org/wiki/File:Lindos4.svg>

Thus applying A-weighting to measured sound pressures more closely represents the frequency response of the human ear. Sound pressure levels that have been A-weighted are denoted by the symbol, dBA. Error: Reference source not found shows the A frequency weighting and several other common weightings.

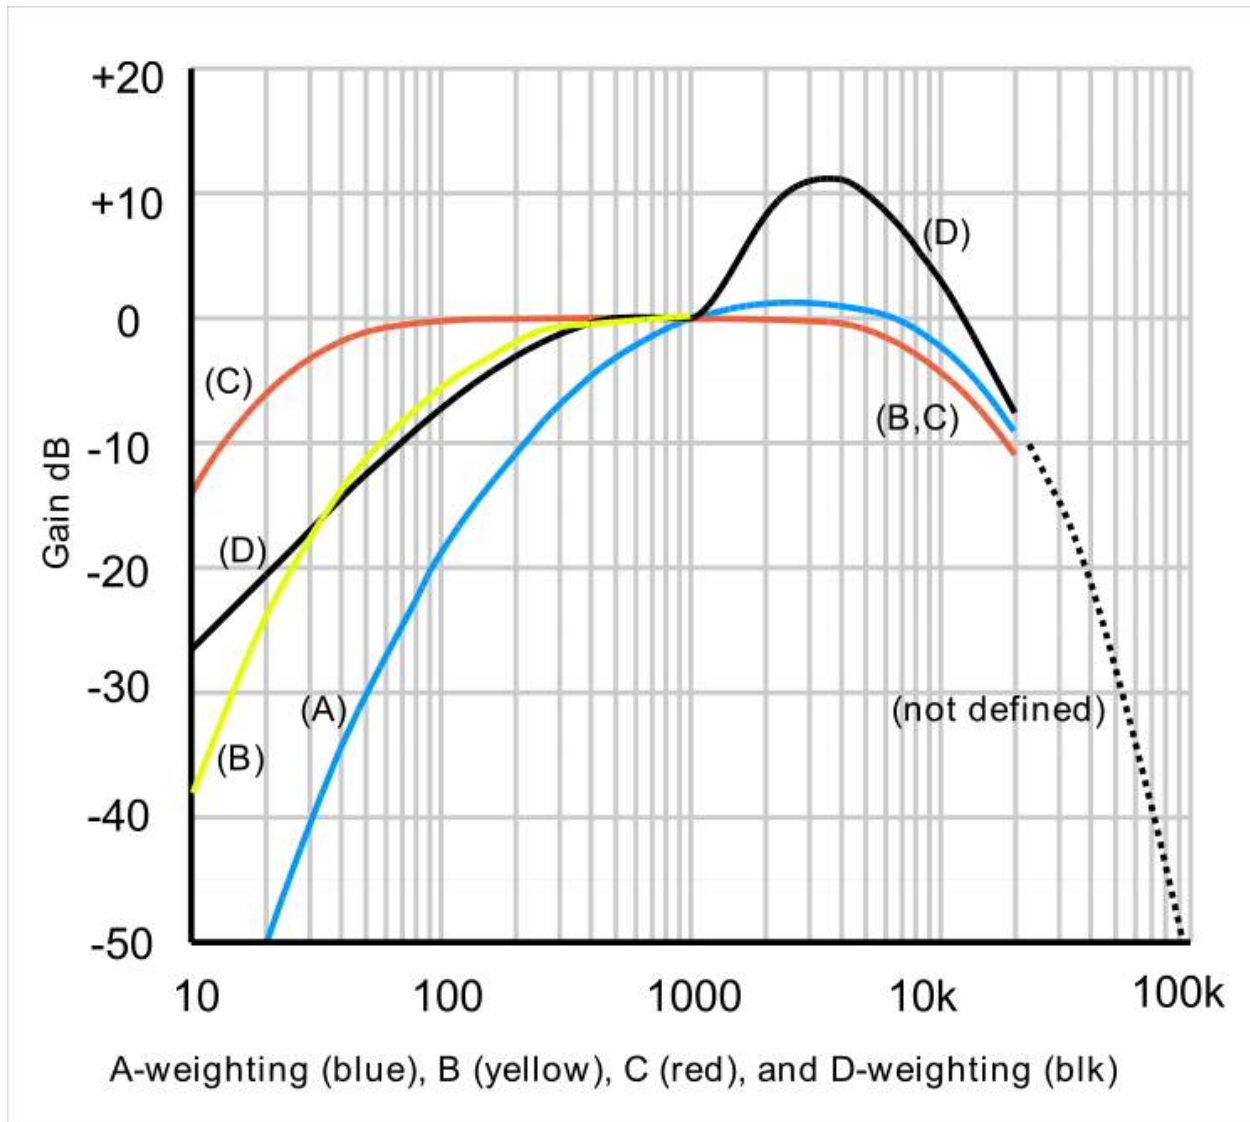

Figure A2.2. Frequency Weighting Filter Curves

Source: [https://en.wikipedia.org/wiki/File:Acoustic_weighting_curves_\(1\).svg](https://en.wikipedia.org/wiki/File:Acoustic_weighting_curves_(1).svg)

The Perception of Sound

The most basic descriptions of sound are loudness (amplitude) and pitch (frequency). The frequency range of human hearing is roughly 20 to 20,000 Hz, although most people can not hear this full range because high frequencies are lost as a natural part of aging and other factors such as illness and exposure to high levels of noise that may cause permanent hearing loss.

Figures A2.3 and A2.4 illustrate the amplitude and frequency ranges of some common acoustical sources.

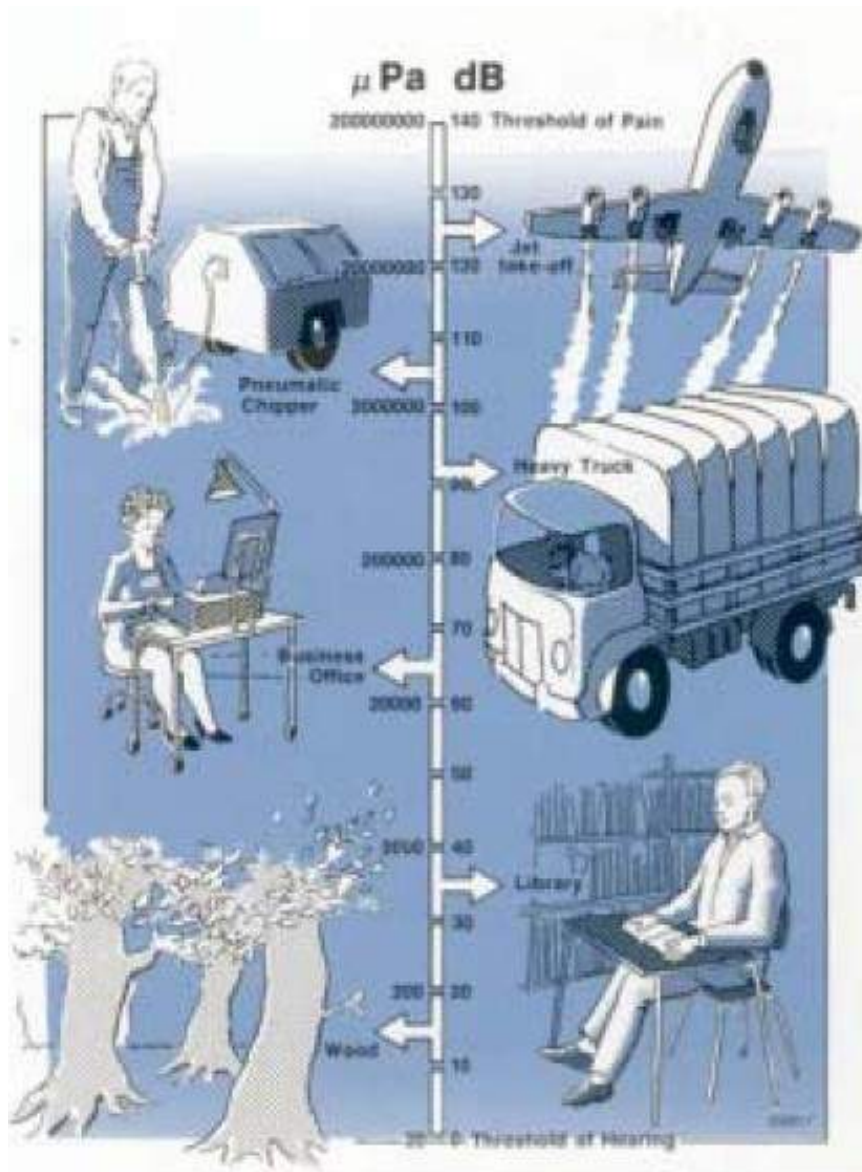

Figure A2.3. SPL Produced by Various Sources
(Briel and Kjaer)

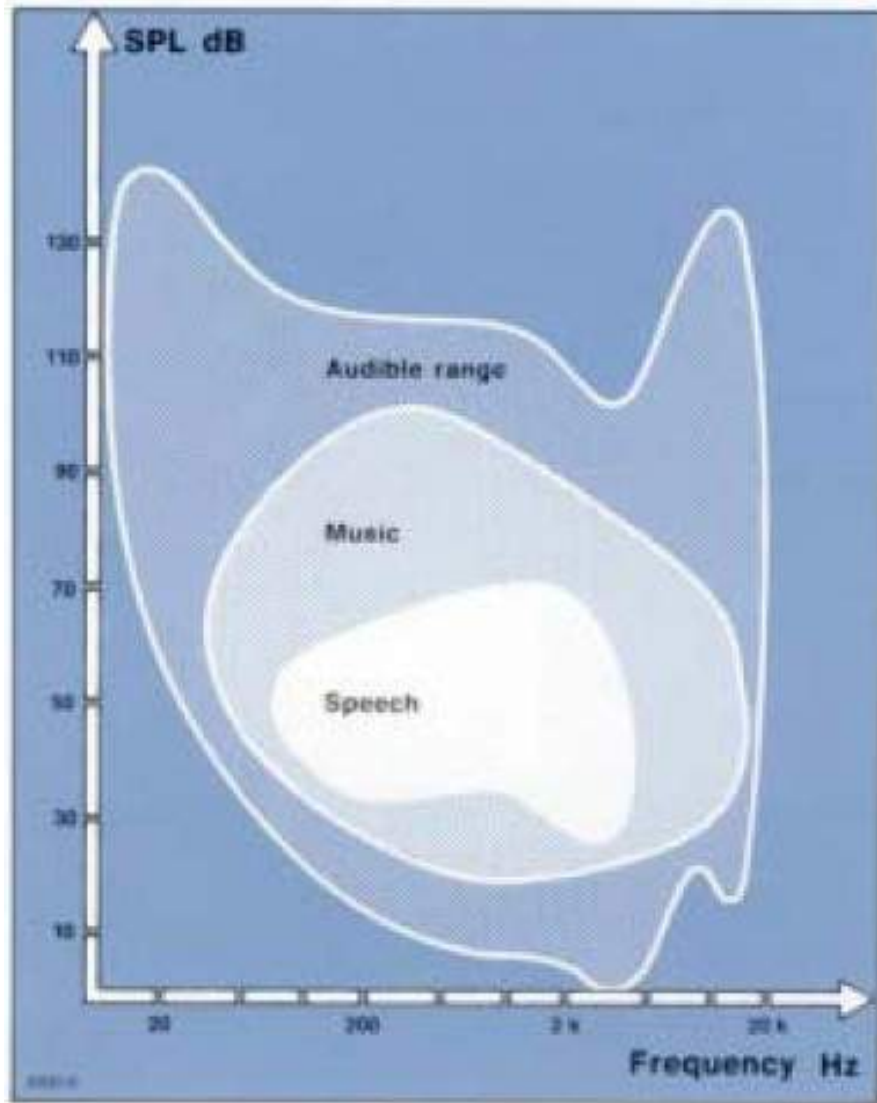

Figure A2.4. Amplitude and Frequency Ranges of Speech and Music
(Bruel and Kjaer)

Amplitude Attenuation with Distance

Sound originating from a small point source will spread spherically in all directions, absent any

Distance from Source (ft)	SPL (dBA)	SPL Loss Relative to 10 ft
10	90	
20	84	6
40	78	12
80	72	18
160	66	24
320	60	30

Table A2.1. Decrease of SPL with Distance Due to Spherical Spreading

nearby surfaces. The conservation of energy requires the sound pressure spreading out from such a source to decrease by half with each doubling of distance. This is known as the inverse square law and is demonstrated in Table A2.1 and Figure A2.5.

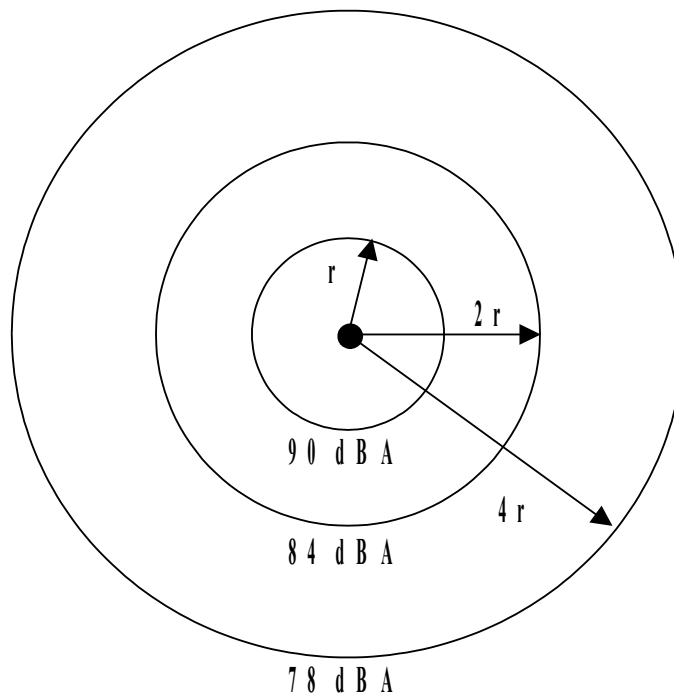

Figure A2.5. Decrease of SPL with Distance Due to Spherical Spreading

Adding Decibels

Summing the contributions from multiple sound sources to obtain the total SPL is *not* done simply by adding the decibel levels because SPL is a logarithmic quantity.

Imagine a fan produces a moderate SPL of 65 dBA at 6 feet. If a second identical fan were turned on the resulting SPL would not be 130 dBA. This would be equivalent to a commercial jetliner taking off at close range.

The correct method of adding the SPL from each source is to sum the acoustic power produced by each source. This implies that each time the number of sources having equal SPL is doubled, the SPL will increase by 3 dBA. Therefore, in the example with two fans, the correct total SPL would be 68 dBA. More examples with multiple sources producing equal SPL are shown in Figure A2.6.

$$65 \text{ dBA} + 65 \text{ dBA} \neq 130 \text{ dBA} \quad \textbf{WRONG} \quad (\text{A2.2})$$

$$65 \text{ dBA} + 65 \text{ dBA} = 68 \text{ dBA} \quad \textbf{RIGHT} \quad (\text{A2.3})$$

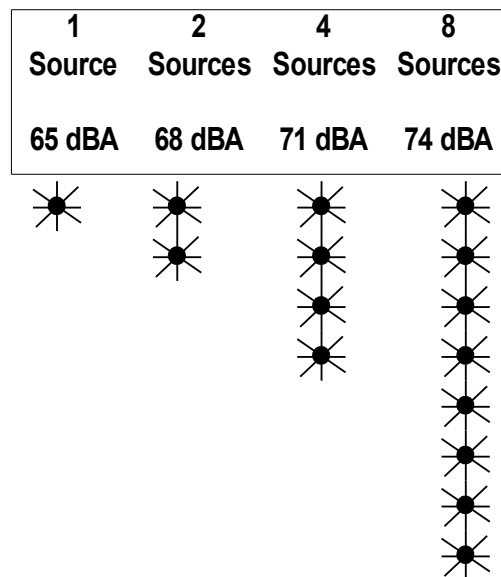

Figure A2.6. Total SPL from Multiple Sources with Equal SPL Output

A3. P-23 Maricopa County Noise Code Excerpt

V. Public Disturbances

A. It shall be unlawful for any person to cause, or for any person in possession of property to allow to originate from the property, any noise which disturbs the peace or quiet of any neighborhood if such noise can be heard from within closed residential structures located within 500 feet of the boundary of the property from which such noise emanates. This subsection shall not apply to noise produced in the normal conduct of business provided that such noise occurs within the normal and customary hours for the conduct of such business, which is based on the normal and customary hours of operation of similar, existing businesses, and the operation is legally conducted within the scope of all ordinances, laws, and statutes of Maricopa County and the State of Arizona.

07 | APPENDIX C: POLLINATOR GARDEN SIGNAGE

A photograph of a wooden park bench in a lush green forest. The bench is made of dark brown wood and is positioned in the lower half of the frame. Behind the bench is a large, thick tree trunk. The background is filled with dense green foliage, and sunlight filters through the leaves, creating a dappled light effect on the grass and the bench. The overall scene is peaceful and natural.

Providence City Interpretive Sign and Programming Proposal

Stokes Nature Center
www.logannature.org

Why Stokes Nature Center

Stokes Nature Center (SNC) was founded in Cache Valley, Utah, in 1997 with the mission of providing nature education and promoting outdoor exploration for people of all ages.

For over 20 years, SNC has been providing fun, inspiring, and educational programs which get people outdoors and loving where they live. In 2020, SNC served over 19,700 people, including over 17,300 with free programming.

SNC Programs

SNC runs over 200 programs each year throughout Cache Valley and the Cache National Forest as its official educational permittee. These programs include: Nature Preschool, K-12 School Programs, Community Events and Workshops, Guided Firefly Walks, the Canyon Jams Concert Series, the Writers in the Woods Author Series, and more. All of these are either free or low cost to reach as many people as possible.

In 2020, SNC offered programs in the Cache National Forest, Garden City, Hyde Park, Hyrum, Logan, Nibley, North Logan, Providence, and Wellsville. SNC programs regularly draw visitors from across Utah, and the United States

Interpreting Cache Valley

SNC is the leader in nature interpretation in Cache Valley. The SNC interpretation team has a combined experience of over 50 years of design and interpretation experience, and focuses on utilizing local topics, professional artwork, and proven effective science communication.

SNC interpretation panels can be seen at Nibley's Firefly Park, at the Stokes Nature Center in Logan Canyon, and have been chosen for a Utah Office of Recreation RRI Grant to be installed along the popular River Trail in Logan Canyon.

Work Examples

Monument to the Monarch

Protecting our Pollinators

Butterflies and other pollinators play a big role in Nibley's ecosystem, which supports its famous fireflies. Some pollinator species migrate through, like the Monarch, while others stay year-round. This garden is in the shape of a Monarch to highlight the importance of these pollinators, and to draw attention to the need for their continued conservation and protection.

What different kinds of pollinators do you see out here today?

This garden is a great habitat and home for our many native pollinators. Please be respectful of their home by giving them space to fly and feed safely. Please admire them from outside the garden.

The Butterfly Effect

Though small, pollinators have big responsibilities! 75% of all the world's food crops rely on pollinators, and so do 90% of all wild flowering plants. That's a lot of work for such small critters! Help them survive and thrive by planting your own pollinator garden, limiting home pesticide use, and learning about our local native pollinators. Helping them helps us all!

Panel for Nibley City Firefly Park

2ft wide trailside panel accompanies a monarch-shaped pollinator garden and speaks to common wild and managed plants, and wild pollinators.

Cost to develop: \$2,500

Work Examples

Panel for Stokes Nature Center

8ftx4ft large interpretive panel set on wall discusses the fauna no longer present in Cache Valley, and engages viewers to reflect upon the consequences and legacy of missing large mammals.

Cost to develop: \$6,500

Interpreting Providence

Jay's Well Park

This little-developed park has a lot of potential for integrating interpretive signage within a new design and mission for the park. Expanding the current footprint of the pavilion to cover the entire northeast corner begins the transformation of this space. This larger area for families to gather, along with an expanded covered area, will act as a prime home base for engaging in the park's main draws.

By utilizing large southern-exposure, a large pollinator garden running the perimeter and park center, along with public art canvassing the well structure can turn this location into a destination for families, small community events, and educational opportunities for all ages.

Interpretive signage can accompany the pollinator garden and speak to local pollinator species, plants, and the importance of reliable food sources for migratory pollinators. With these additional features, this park can be an educational, nature, and family hub in the heart of Providence.

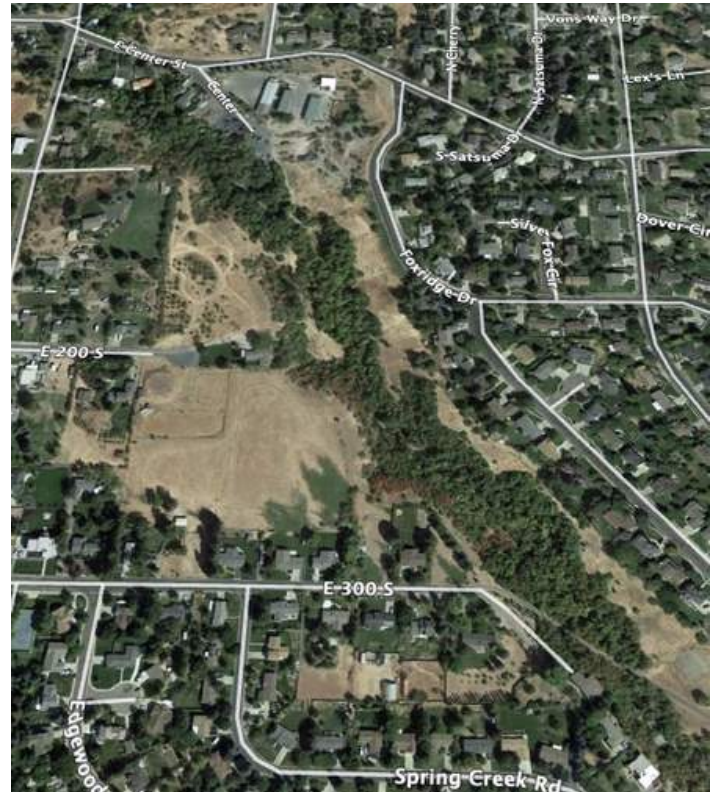

Interpreting Providence

Von Baer Park

This large, well-established park can benefit from improvements and interpretive signage to elevate its appeal to community members and visitors alike as well as expand the potential for nature programming.

Improvements would include utilizing native plants to increase hillside stability, such as rabbitbrush or milkweed. Additionally, additional pollinator plants have excellent habitat along the disc golf course, as well as along established trails. Having set vegetation along trails will also ensure proper trail usage, and can reduce rates of informal trail formation.

Interpretive signage will explore the riparian Spring Creek ecosystem, highlight responsible recreation and trail usage, and inspire birding for iconic and common species as one way for people to interact with the natural world. The large acreage also makes the location well-suited for longer exploration-based programming in the heart of Providence City, such as naturalist educator-led hikes or art workshops led by the staff of SNC.

Interpreting Providence

Spring Creek Parkway Area

With more families than ever choosing Providence as where they'd like to live, work, and raise families, the demand for public parks will only increase. The most effective use of time and taxpayer dollars is to plan ahead, and plan with expansion as our reality. In addition to the existing parks above which are ripe for improvement and interpretive signage, SNC also proposes that the City of Providence consider adding additional park spaces in the rapidly-expanding Spring Creek Parkway area.

One of Cache Valley's continuing struggles for its many communities is the balance of housing with amenities. While some cities have the benefit of decades of dedicated urban planning, most are having to play catch-up with the demand for living in Cache Valley.

By committing to a viability study in the Spring Creek Parkway area, the City of Providence has an opportunity to enhance its citizen's quality of life, highlight its nature, and increase citizen's property values for long-term financial benefit and thus stability.

Furthermore, public parks typically require less up-front costs than more seasonally-restricted amenities such as tennis courts, and have a higher rate of use due to low barriers to participation. All one needs to enjoy one of Providence's many beautiful parks are directions on how to get there.
